

SUBSTATION ACCESSORIES

Bronze and Aluminum Bolted, Welded, Compression Accessories in Voltages up to 765 kV

Product Catalog

Founded in 1984, AFL is a global manufacturer providing end-to-end solutions to the broadband, energy, data center, AI and industrial markets.

With products in over 130 countries, AFL specializes in fiber optic cable and hardware, transmission/compression and substation accessories, connectivity solutions, fusion splicers, and test and inspection equipment.

Guided by customer-focused and community-centered values and a strong commitment to safety, the company operates manufacturing facilities worldwide and provides a comprehensive portfolio of services and solutions supporting network infrastructure, data centers, service providers, wireless and power grid modernization.

Aluminum Bolted Bus Accessories

Bus Conductor Accessories are designed with large contact area and appropriate clamping forces to give them the efficient long life and trouble-free-operation typical. Aluminum Bus accessories, including the bolts and nuts, are made from high strength aluminum alloys. The large aluminum bolts maintain high contact pressure during heating and cooling cycles since the coefficients of expansion of the conductor, fittings and bolts are essentially the same. Bolts have an Alumilte* 205 finish and are coated with lubricant to give additional resistance to corrosion. The reduced friction provided by this lubricant coating gives a higher bolting pressure for a given torque.

AFL Conductor Accessories No. 2 Electrical Joint Compound is recommended for making aluminum- to-aluminum and aluminum -to-copper bolted joints. This compound is an effective seal against the entrance of moisture and corrosive or oxidizing agents. It has the additional advantage of chemically aiding in the removal of the natural oxides of aluminum. The flow point of AFL No. 2 Electrical Joint Compound is a about 150°F (66°C), although tests show that a film remains in the joint up to 200°F (92°C) to seal the joint and maintain stable operation.

Experience has shown that bolted joints on electrical bus conductors made with unbushed electrical fittings with the proper joint preparation and with adequate sealing of the connection, are entirely satisfactory for aluminum-to-aluminum and aluminum -to-copper connections.

Method of Making Bolted Electrical Connections
(1) Remove grease and dirt from contact surfaces.
(2) Coat thoroughly with No. 2 Electrical Joint Compound.
(3) Abrade surfaces through coating with wire brush or emery cloth.
(4) Assemble joint without removal of compound, and any excess may be left on the edges to seal the contact surfaces.

*Trademark of Aluminum Company of America

Aluminum Welded Bus Accessories

AFL Welded fittings (unless otherwise specified) will conduct the rated current of the largest conductor to which they can be applied. The dimensions of bus accessory surfaces to be welded are designed so that the proper weld bead for full conductivity is automatically applied. Conductor socket depths are generous, allowing wide tolerance in cutting conductors to length. For the larger conductors, a choice of terminal pad sizes are available.

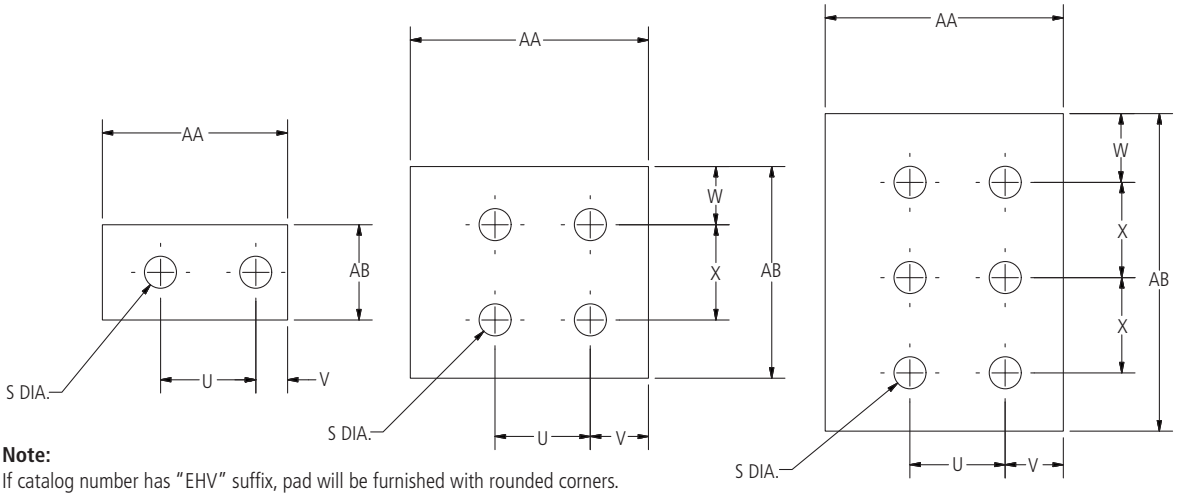

The streamlined design and the absence of protruding bolts (which act as corona points) make AFL Welded Bus Accessories an excellent choice for the construction of Extra-High -Voltage substations. AFL Welded Aluminum Bus accessories will save construction dollars three ways.

FIRST, AFL Welded Bus Accessories pass on to the user the manufacturing economies gained by the elimination of superfluous material. SECOND use of welded bus accessories reduces installation costs through a user-cost-conscious design that provides a minimum welding surface—thus reducing welding time. THIRD, well-engineered and economical fittings accommodate a wide conductor range, permitting users to reduce significantly the number of stock sizes normally needed to handle a wide range of conductor sizes.

Representing the results of years of development and experience, this catalog provides electrical and mechanical details on AFL full line of standard welded electrical bus accessories. Inquiries regarding special design problems are invited and should be directed to your local sales representative.

Specifications are subject to change without notice.

NEMA Standard Pad Sizes

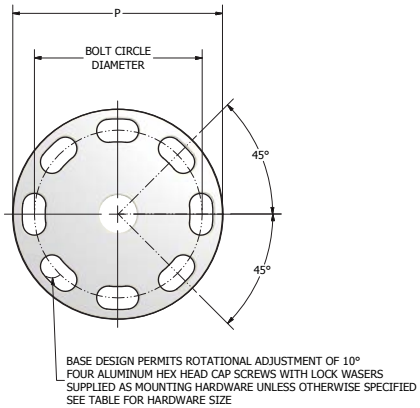

Note:
If catalog number has "EHV" suffix, pad will be furnished with rounded corners.

Pad Size	Dimensions						
	S	U	V	W	X	AA	AB
	in.	in.	in.	in.	in.	in.	in.
B or 2N	0.6	1.8	0.6	—	—	3.0	1.8
D or 4N	0.6	1.8	0.6	0.6	1.8	3.0	3.0
E or 4N4	0.6	1.8	1.1	1.1	1.8	4.0	4.0
F or 5N4	0.6	1.8	1.1	0.8	1.8	4.0	5.0
G or 6N4	0.6	1.8	1.1	1.3	1.8	4.0	6.0

For non-standard pads, specify the S, U, V, W, or X dimensions. If the pad is to be copper faced or specially machined, give detailed information and whether the bottom side, top side or both sides are involved. When centerline of bolt spacing does not coincide with the centerline of the pad, this then becomes non-standard drilling. In this case, the holes are offset on the pad by distance W and/or distance V.

Bus Support Bases

Bolt Circle Mounting	Dimensions		Mounting Hardware Supplied
	Base Thickness	P	
in.	in.	in.	
3	0.5	4.3	1/2-13 x .87 Galvanized Steel Hex Hd. Bolts & 1/2 Lockwashers

Specifications are subject to change without notice.

Expansion, Coupler and Support
Typical Bolted & Welded Types (Welded Type shown)

The expansion space (Dimension "D" on illustration) provided for expansion supports and couplers is based on an installation temperature of 68˚F (20˚C) and an operating temperature range between 200˚F (93˚C) maximum and -20˚F (-29˚C) minimum.

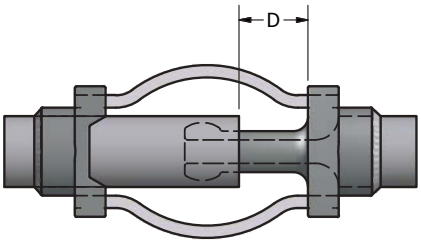

The temperature range is based on a maximum run length between fixed supports of 80 ft. (24.4m) for 3/4" thru 1-1/2" NPS and 150 ft. (45.7m) for 2" thru 6" NPS. Assembly dimensions are based on expansion support or expansion coupler being centered between fixed supports.

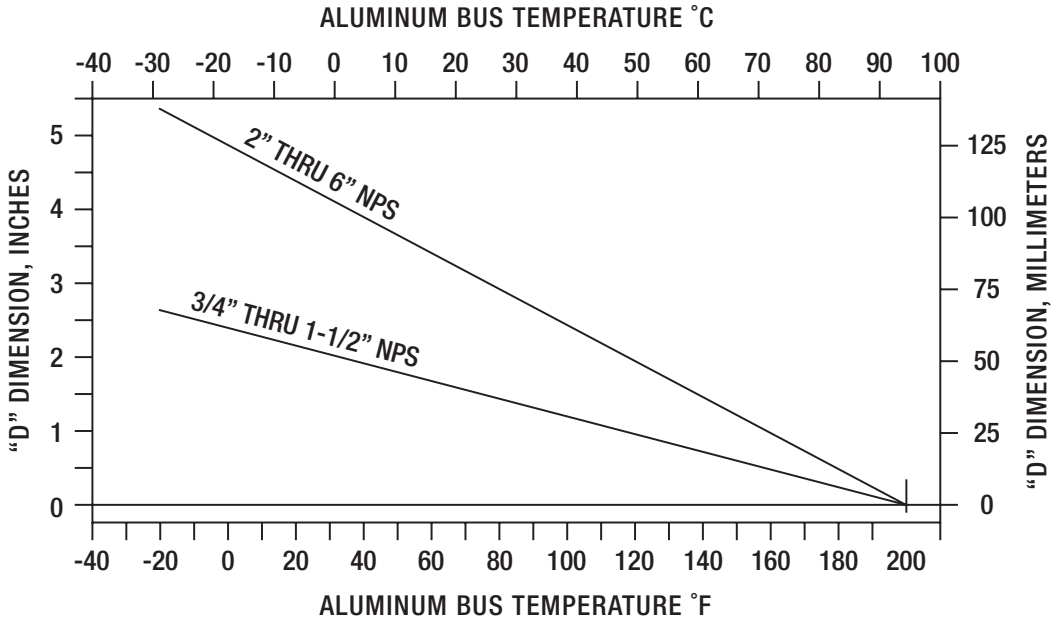

Spaces provided for expansion, based on an installation temperature of 68˚F (20˚C) are 1.75" (44.5mm) for 3/4" thru 1-1/2" NPS and 3.25" (82.6mm) for 2" thru 6" NPS. Installation dimensions must be altered to compensate for installation temperatures other than 68˚F (20˚C) which affects space provided for expansion ("D" on illustration) by using graph shown below.

Expansion Support

Expansion Coupler

Specifications are subject to change without notice.

Expansion Terminal

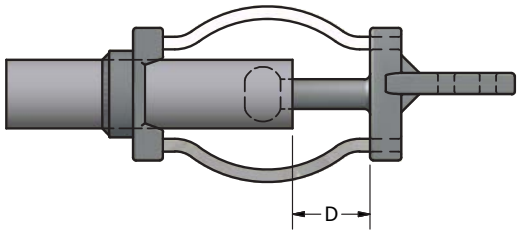

Typical Bolted and Welded Types (Welded Type shown)

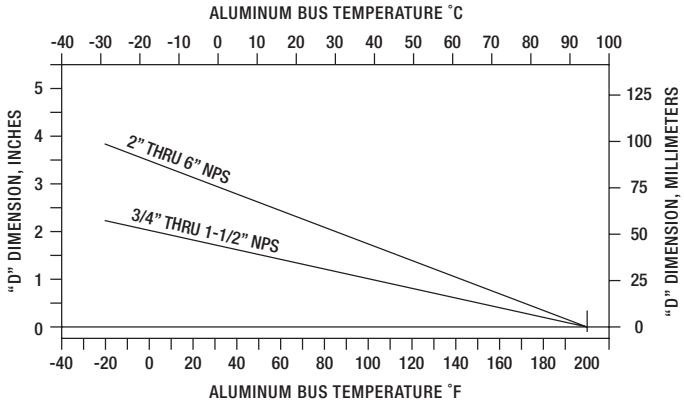

The expansion space (Dimension "D" on illustration) provided for expansion terminals is based on an installation temperature of 68°F (20°C) and an operating temperature range between 200°F (93°C) maximum and -20°F (-29°C) minimum.

The temperature range is based on a maximum run length between fixed support and terminal of 60 ft. (18.3 m) for 3/4" through 1-1/2" NPS and 100 ft. (30.5 m) for 2" through 6" NPS.

Spaces provided for expansion based on an installation temperature of 68°F (20°C) are 1.30" (33 mm) for 3/4" through 1-1/2" NPS and 2.25" (57 mm) for 2" through 6" NPS. Installation dimensions must be altered to compensate for installation temperatures other than 68°F (20°C) which affects space provided for expansion ("D" on illustration) by using graph shown at right.

Terminal

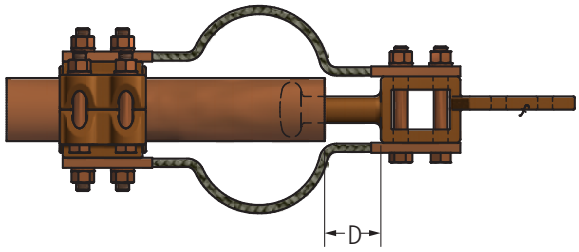

Bronze Expansion Terminal

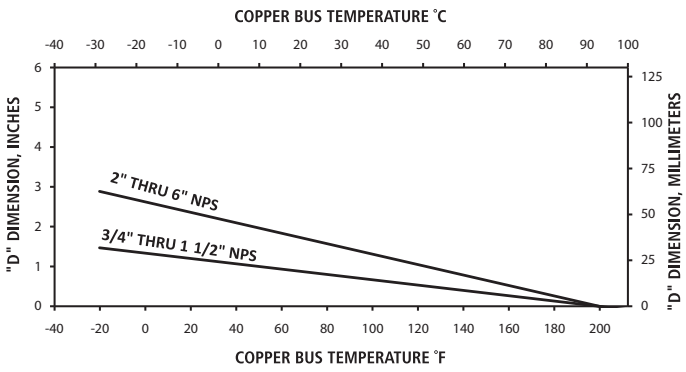

The expansion space (Dimension "D" on illustration) provided for expansion terminals is based on an installation temperature of 68°F (20°C) and an operating temperature range between 200°F (93°C) maximum and -20°F (-29°C) minimum.

The temperature range is based on a maximum run length between fixed support and terminal of 60 ft. (18.3 m) for 3/4" thruough1-1/2" NPS and 100 ft. (30.5 m) for 2" through 6" NPS.

Spaces provided for expansion of bronze terminals based on an installation temperature of 68°F (20°C) are 0.88" (22 mm) for 3/4" through 1-1/2" NPS and 1.5" (38 mm) for 2" through 6" NPS. Installation dimensions must be altered to compensate for installation temperatures other than 68°F (20°C) which affects space provided for expansion ("D" on illustration) by using graph shown at right.

Bus Conductors Deflection & Stress Formulas

	Simple Beam	Beam Fixed at Both Ends	Continuous Beam	
			2 Spans	More than 2 Spans
Maximum Deflection ⑤	$D = \frac{5wl^4}{384EI}$	$D = \frac{wl^4}{384EI}$	$D = \frac{wl^4}{185EI}$	①
Maximum Moment	$M = \frac{wl^2}{8}$ ②	$M = \frac{wl}{12}$ ③	$M = \frac{wl^2}{8}$ ④	$M = 0.107wl^2$ ④
Fiber Stress	$f^1 = \frac{wl^2}{8S}$ ②	$f^1 = \frac{wl^2}{12S}$ ③	$f^1 = \frac{wl^2}{8S}$ ④	$f^1 = \frac{0.107wl^2}{S}$ ④
Maximum Load	$W = \frac{8fS}{l}$	$W = \frac{12fS}{l}$	$W = \frac{8fS}{l}$	$W = \frac{fS}{0.1071}$
Maximum Span	$l = \sqrt{\frac{8fS}{w}}$	$l = \sqrt{\frac{12fS}{w}}$	$l = \sqrt{\frac{8fS}{w}}$	$l = \sqrt{\frac{fS}{0.107w}}$

D = deflection in inches

w = load in lb/in. of length $\frac{\text{lbs. per ft}}{12}$

W = total uniform load in pounds (wl)

l = span in inches

E = modulus of elasticity, lb/sq in.

I = moment of inertia, inches ④

M = bending moment in pounds - inches

S = section modulus, inches ②

f^1 = fiber stress in lb/sq in.

f = maximum allowable fiber stress in lb/sq in. (The value of minimum yield strength is commonly used.)

① Maximum deflection occurs in the end spans and is only slightly more than that for a continuous beam of 2 spans.
② Maximum moment and fiber stress for simple beams occur at the center of the span.
③ Maximum moment and fiber stress for beams fixed ath both ends occur at the points of support.
④ Maximum moment and fiber stress for continuous beams occur at the second support from each end.
⑤ See page S-1 11

General Welding Specification for Tubular Aluminum Bus Conductor

The following items cover key points that should be included in specifications for welding aluminum bus conductors. It is recommended that the references be reviewed in the preparation of proprietary welding specifications:

1. The welding process and all welding operations shall be qualified in accordance with the Aluminum Association, "Aluminum Construction Manual" Section 7.2.4 "Qualification of Welding Procedure and Welding"

2. All joints to be welded shall be free of moisture and hydrocarbon. Moisture can be removed thermally but the temperature applied shall not exceed 250°F (121°C). Degreasing shall be done with a non-toxic solvent so as to leave a minimum of residual on the parts. Sufficient time must be allowed for evaporation of the solvent prior to welding. Wire brushing with a stainless steel wire brush should be employed after solvent cleaning to remove thick heat-treat oxide films, water stains, etc., to permit optimum fusion and soundness of the weld.

3. All welds shall be made by the gas metal-arc (MIG) or the gas tungsten-arc (TIG) welding process. Reversed-polarity direct current shall be used for MIG welding, whereas alternating current shall be used for TIG welding. The shielding gas shall be welding grade argon, helium, or a mixture of the two. Filler alloy 4043 shall be used.

4. The working area should be substantially draft free and should be protected from atmospheric contamination.

5. All welds shall be made with clean metal and the completed weld shall have a smooth finish and shall indicate good fusion with parent metal. Preheating of parts prior to welding shall not exceed 250°F (121°C).

6. All connections shall be checked before, during and after the weld is made. Before the weld is begun, visually inspect the connection to determine proper edge preparation and alignment. During the weld, maintain a smooth and continuous flow of metal into the joint and maintain a constant current setting on the welding station. When several passes are to be made, check the previous pass before laying down the next one to enable detection of poor fusion or cracks.

Defective area shall be removed with a dry chisel prior to application of subsequent weld passes. After the weld has been completed, it shall be again visually inspected for quality and to determine if the weld bead is the correct size. The cross-sectional area of the weld should not be less than that of the smallest member being joined.

7. To repair a defective weld, the defective portion must be entirely removed by chipping or machining. The area to be repaired must be smooth and free of dirt, or foreign matter. The repair weld then may be made in a similar manner as the original.

8. Members being joined should be tack welded in place to prevent misalignment during the welding process.

General Information—Hardware
Method for Determining Bolt Length

The following table is to be used for determining bolt length for bolting accessories together when hardware is ordered separately. Bolt length is determined as follows:

1) Determine “grip”. This is the combined thickness of items bolted together. This does not include nuts, washers or pads.
2) Under “grip” column, find grip determined in Step 1. If grip falls between two thicknesses, use the larger to determine bolt length.
3) Read across to find bolt length required under “Bolt Length - No Cover”.
4) If pad cover(s) are required, use columns “Bolt Length - One Cover” or “Bolt Length - Two Covers”.

Note: The table is based on the following dimensions:

1/2 Nut	0.44” (11mm) Thick
1/2” Flat Washer	0.11” (3mm) Thick (Two washers required on each bolt)
Pad Cover	0.25” (6mm) Thick

Grip		Bolt Length					
		No Cover		One Cover		Two Covers

Notes:
1. The amount of AFC shown in the tabulation is for the purpose of estimating the amount of compound necessary for a consturction project. The tabulated weights of filler compound shown in the above table for the catalog 5100, 5600 and 5800 terminal does not include sufficient quanity to fill the cavity area at the transition of the barrel and flat pad. If the terminal is installed with the barrel in the upright position, it is imperative that an additional quantity of AFC be used to fill the cavity area.

LPP	Connector Grooves and Terminal Pad are Pre-Coated with Alnox and Enclosed in a Polyethylene Bag
MLB	Multi Link Braid
MT	Moisture Seal
NK	Nickel Plated
NP	Item Normally Plated will be Supplied Unplated
P	Pulling Eye
NN	Confined Pad
R	Captive Hex Head Bolts, One Wrench Installation
S	Special Cable Range and Special Terminal Pad
SN	Tin Plated
SO	A Socket Eye will be Supplied with Strain Clamp
SS	Stainless Steel Hardware
SSM	Stainless Steel Mounting Hardware
SW	Split Lockwasher
T	Thickness of Bar is Indicated by the Number Immediately Following the Suffix
TMH	Tongue Mounting Hardware
TMHB	Tongue Mounting Hardware, Stainless Steel, and Belleville Washer
TMHF	Tongue Mounting Hardware with Two (2) Flat Surfaces
TMHSS	Tongue Mounting Hardware, Stainless Steel
TO	Unthreaded Stud
U	Undrilled Tongue on Terminals or Lugs
WP	End Plugs Supplied with Connector
XX	No Oxide Dip
X	Oxidation Inhibitor

Compression Accessories Suffixes	
SS	Stainless Steel Hardware
AL	Aluminum Hardware on terminals when hardware is not normally supplied
P	Pre-Filled with compound
HT	High Temperature accessory
EHV	High Voltage application ≤ 345 kV
NT	No Terminal
NS	Non-specular Finish
BNW	Bolt Nut Washer

Suspension Units	
SC	Socket Clevis
SE	Socket Eye
BNC	Bolt Nut Cotter
YCE	Y Clevis Eye
YCE90	Y Clevis Eye 90

Stockbridge Dampers	
BA	Break-a-way Bolt

Notes:

1. The suffix designations above will not appear as part of the catalog number unless specifically requested, in which case there will be an extra charge to cover the stamping or marking operations.

2. When more than one suffix is required to designate more than one special feature, they should be arranged in alphabetical order.

DOSSERT®

TYPE CAP

Bus Support for Tubular Bus To Insulator Cap

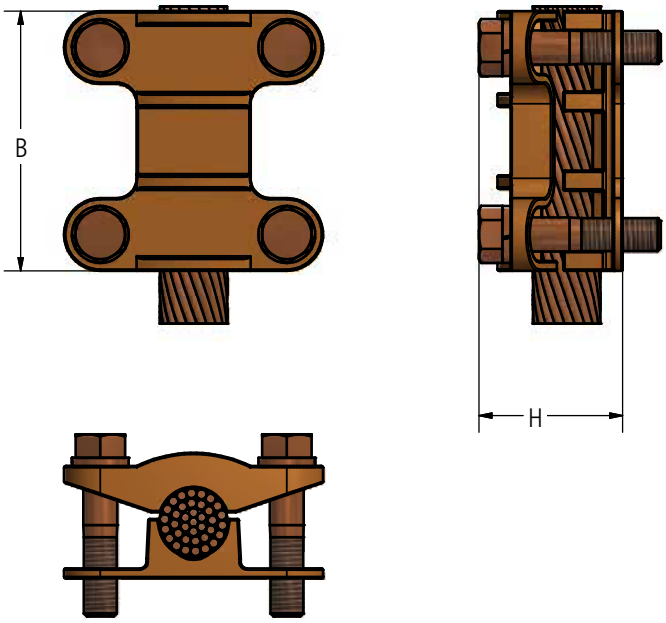

A two piece high strength bronze cable support which mounts conductor to cap of insulator. Furnished with cap screws for threading into tapped holes on insulator. For base mounting, if specified, bolts and nuts will be furnished. When ordering specify conductor size to be employed so that correct length of bolt can be supplied.

Material
Copper Alloy

Hardware
Everdur bolts and lockwashers

Notes
- For Electro Tin Plate, add "-SN" to catalog number. EX: CAP21-3-SN

TYPE CS

Bus Support Clamp For Cable Conductor

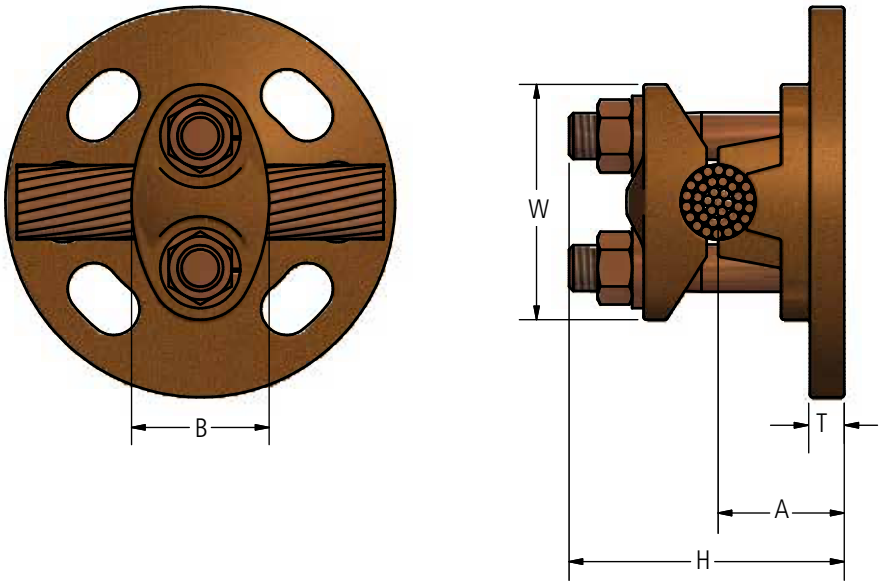

A high strength bronze bus support clamp for cable conductor. For securing to insulator, bolts and nuts are furnished for pin and slotted cap mountings, and cap screws for cap mountings. When ordering specify type of mountings to be used and also cable size to determine clamping bolt length.

Material

Copper Alloy

Hardware

Everdur bolts, nuts and lockwashers
Mounting hardware galvanized steel

DOSSERT®

TYPE PA, PAP

Bus Support For Circle Mount Insulators

A single cap four bolt bus support for mounting on insulator bolt circle positions. Type PA clamps bus directly to insulator while type PAP is provided with an under saddle conforming to bus diameter for higher clamping pressure. Both types can be furnished with cap screws for cap mounting or bolts and nuts for base mounting. Unless otherwise specificed supports are furnished for cap and mounting as illustrated.

DOSSERT®

TYPE PL

Pipe Bus Support Slide or Tight Fit

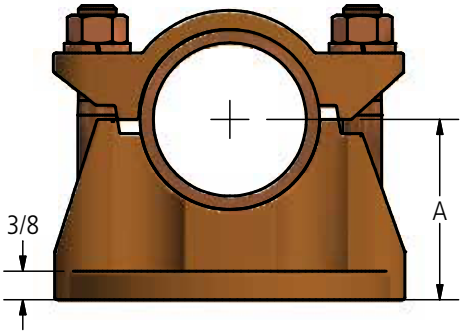

A two bolted clamp type high strength bronze bus support. This unit is non-magnetic and corrosion resistant. The design of this support permits a minimum radius of gyration about the support mounting thus minimizing cantilever stresses. Type PL is both a tight and slip fit action clamp with either action obtained by reversing cap.

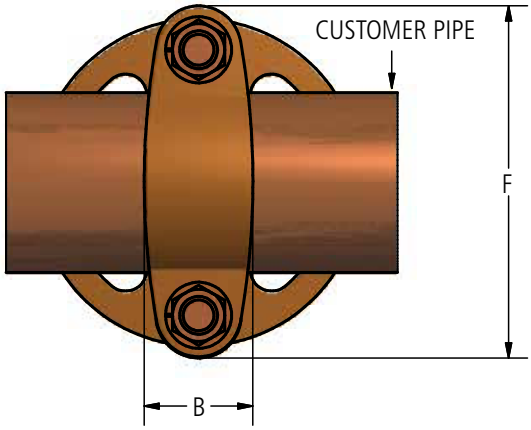

Material

Copper Alloy

Hardware

Everdur bolts, nuts and lockwashers
Mounting hardware galvanized steel

DOSSERT®

TYPE PLC

Bus Support For Tubular Bus To Insulator

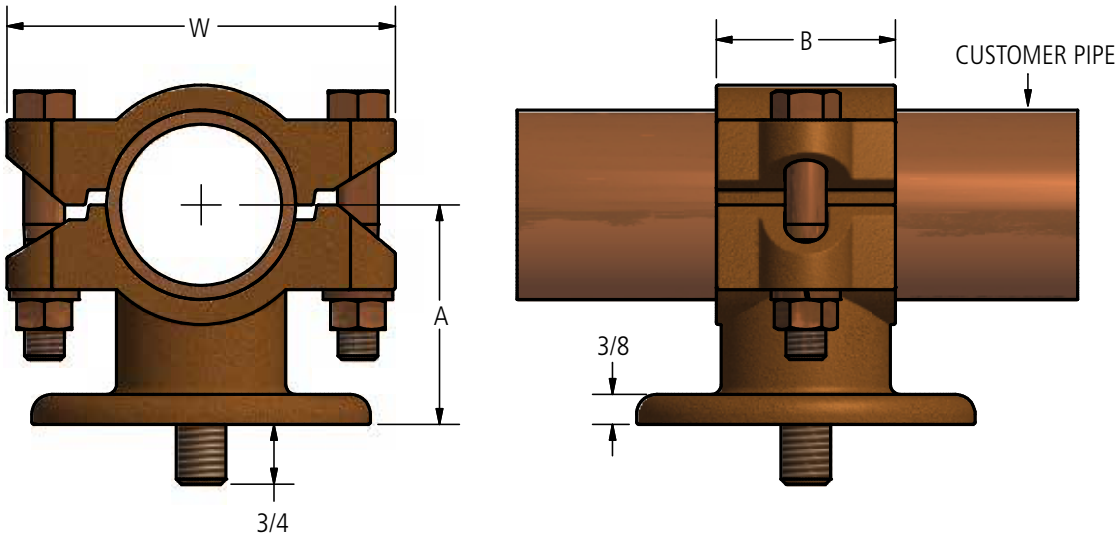

A bus support for mounting a tubular bus to a 3/4-10 NC 2 center tapped insulator. The center tap mounting permits any angular arrangement for bus positioning while a reversible cap allows for slip fit or tight clamping on bus. Other thread sizes for center mounting can be readily supplied.

Material

Copper Alloy

Hardware

Everdur bolts, nuts and lockwashers
Mounting hardware galvanized steel

DOSSERT®

TYPE PSC

Bus Support For Two Tubular Busses

A bus support for joining and supporting two tubular buses on a post type insulator. Designed for a high resistance to impact or sustained cantilever and torsional stresses. Nuts and bolts are furnished for a base mounting or slotted cap mounting or cap screws for an insulator cap mounting.

Material

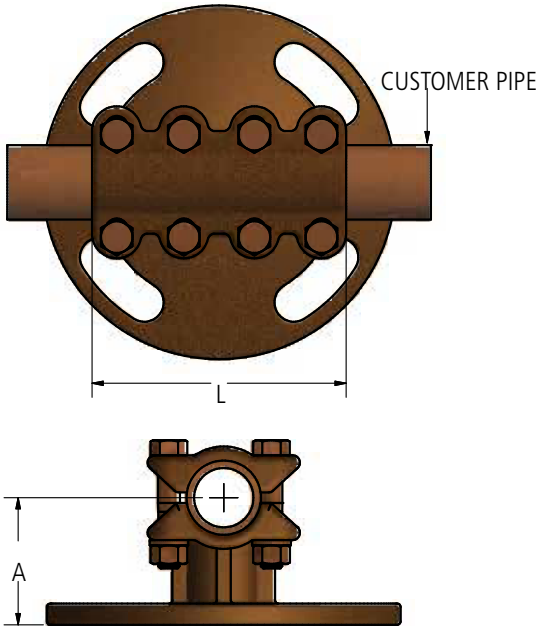

Copper Alloy

Hardware

Everdur bolts, nuts and lockwashers
Mounting hardware galvanized steel

Note

For tin plating add "-SN" to end of catalog number.

DOSSERT®

TYPE PSSR, PSSR-CH

Tubular Bus Support

A high strength bronze support for securing a tubular bus to a post or pedestal type insulator. Fully adjustable to any angle within a complete circle (360°) with the advantage of four bolts maintaining angular setting as well as mounting pressure. Reversible cap permits rigid or slip fit on conductor. Supplied with cap screws for insulator cap mounting or bolts and nuts for base mounting. Unless otherwise specified cap screws are supplied.

Material

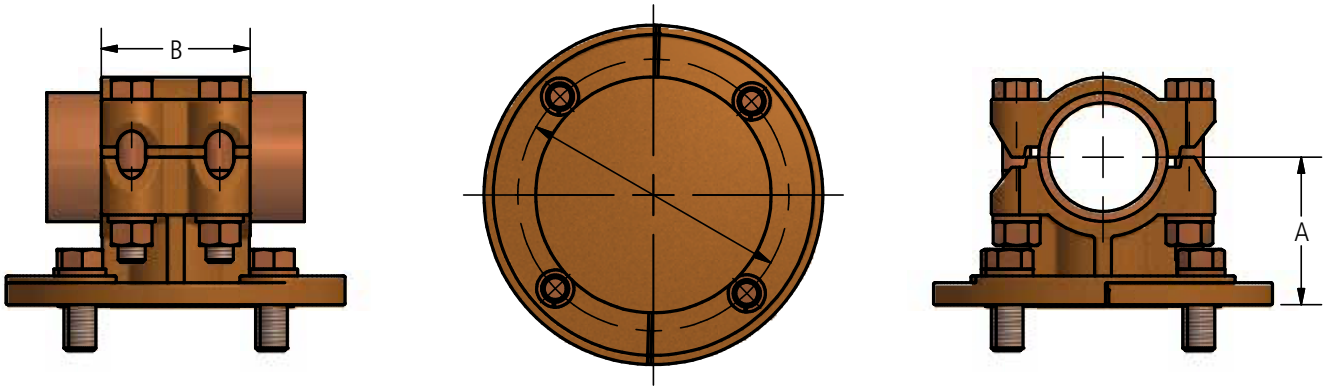

Copper Alloy

Hardware

Everdur bolts, nuts and lockwashers
Mounting hardware galvanized steel

Note

Add suffix "CH" to catalog number for chatter spring. EX: PSSR200-5-CH

DOSSERT®

TYPE SBS

Sliding Bus Support For Tubular Bus

A sliding bus support for standard pipe size tubular bus. The clamp and bracket constitute a rigid member while free axial movement is effected between the bracket and mounting base. Support also permits mounting of tubular buses at slight angular deviation.

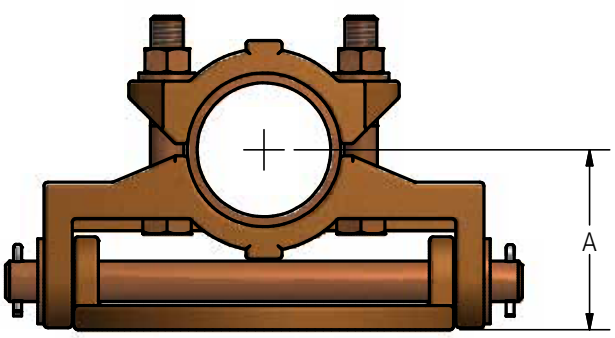

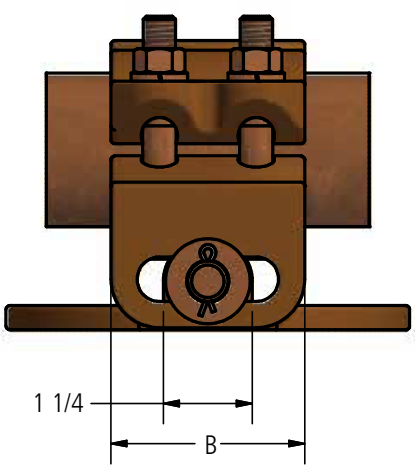

Material

Copper Alloy

Hardware

Everdur bolts, nuts and lockwashers
Mounting hardware galvanized steel

DOSSERT®

TYPE SAVS, SHVS

Sliding Vertical Bus Support For Multiple Flat Bars

Four types of sliding bus support clamps for supporting one or more flat bars in a vertical or upright position. The slotted base provides for 1 1/4 inch of axial traverse. Accommodates any number of bars. Types SAVSD and SHVSD allows for double stack mounting by the provision of a 2 3/8 inch spacer for single or multi-bar systems. Unless otherwise specified types SAVS and SHVS are supplied without spacers and types SAVSD and SHVSD are supplied with only the 2 3/8 inch double stack spacer. Supplied with cap screws for cap mounting or bolts and nuts for base mounting.

SAVS

SHVS

Material

Copper Alloy

Hardware

Everdur bolts, nuts, lockwashers, flat washers, and stainless steel cotter pin
Mounting hardware galvanized steel

Note

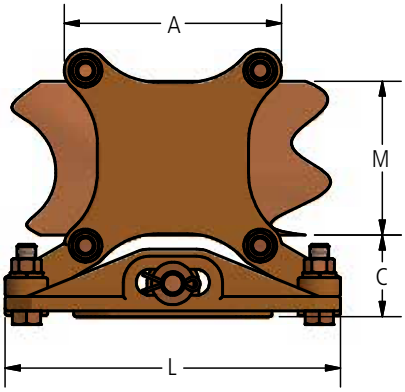

- For additional spacers for 1/4 inch bars spaced 1/4 inch apart please contact AFL
- When ordering add the number of bars to be supported to the end of the catalog number and state bar thickness if other than 1/4 inch. Example: SAVS3-3-4

DOSSERT®

TYPE SSHH, SSHHD

Horizontal Sliding Bus Support

A horizontal type sliding bus support clamp for supporting one or more flat bars. The axle type support with slotted bracket provides for a 1 1/4 inch traverse. Accommodates any number of bars. Type SSHHD allows for double stack mounting by the provision of a 2 3/8 inch spacer for single bar or multi-bar systems. Unless otherwise specified type SSHH is supplied without spacers and type SSHHD is supplied with only the 2 3/8 inch double stack spacer.. Supplied with cap screws for cap mounting or bolts and nuts for base mounting.

Material

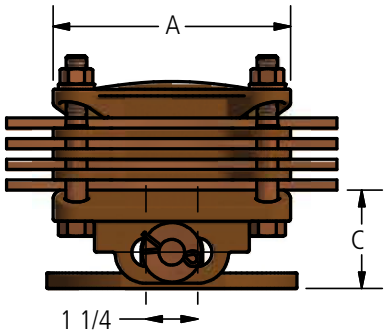

Copper Alloy

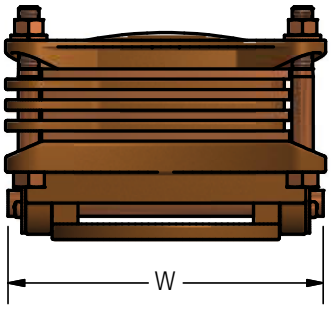

Hardware

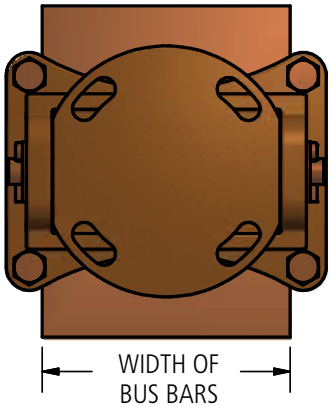

Everdur bolts, nuts, lockwashers, flat washers, and stainless steel cotter pin
Mounting hardware galvanized steel

Note

- When ordering suffix the number of bars to be supported to catalog number and state bar thickness if other than 1/4 inch.
- For additional spacers for 1/4 inch bars spaced 1/4 inch apart please contact Dossert.

DOSSERT®

TYPE XBC

Copper Bus Support Coupler

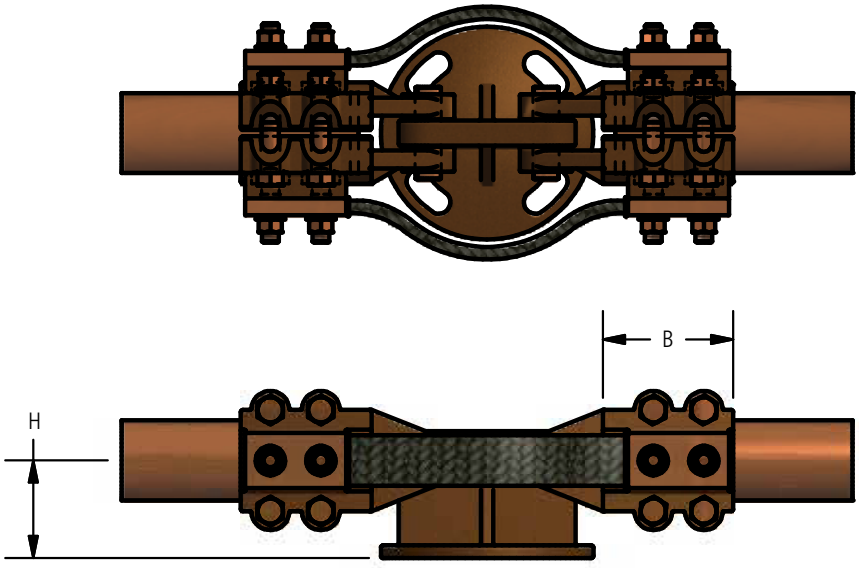

A bus support coupler with a flexible braid linkage designed to conduct the full rated load of the tubular buses and at the same time permit free axial movement of each bus member. The shackle type fitting allows slight angular deviation of the buses from the horizontal where they cannot be kept on a true plane.

Material

Copper Alloy

Hardware

Everdur bolts, nuts, lockwashers, galvanized steel clevis pin, and stainless steel cotter pin

DOSSERT®

TYPE HC, HC-A
Copper Coupler For Cable

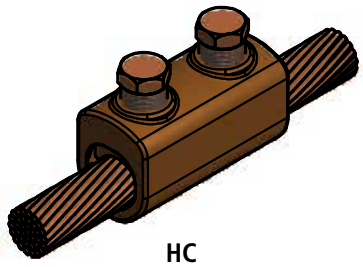

The HERCULON™ Coupler provides an inexpensive means for joining end to end cables of the same size or different size within a wide range of conductors. Complete installation is accomplished by merely tightening the two pressure screws.

Material

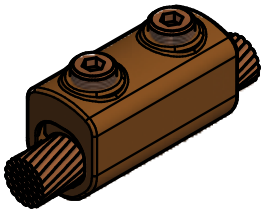

Copper Alloy

Hardware

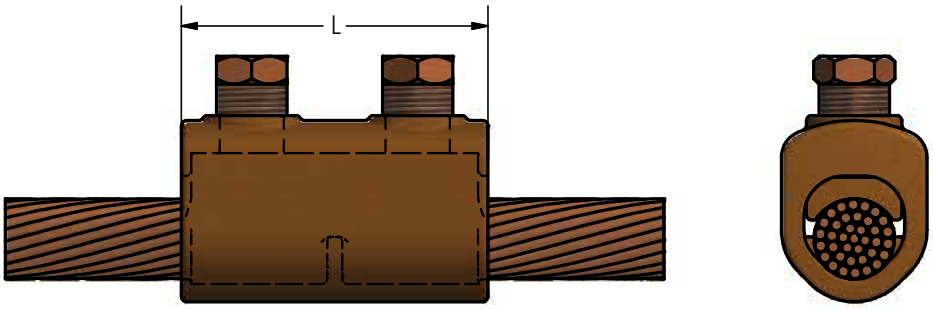

Everdur pressure bolts

DOSSERT®

TYPE RP

Copper Reducing Clamp for Tubular Bus

A clamp type reducing coupler for connecting various sizes of standard pipe size tubular buses end to end. Contact surfaces finished to provide a strong grip on the conductor and a good electrical contact.

Material

Copper Alloy

Hardware

Everdur bolts, nuts and lockwashers

DOSSERT®

TYPE RPCV-S

Copper Pipe to Cable Coupler

A pipe to cable coupler which takes a wide range of cable sizes on the cable clamping member. All clamping members act independently.

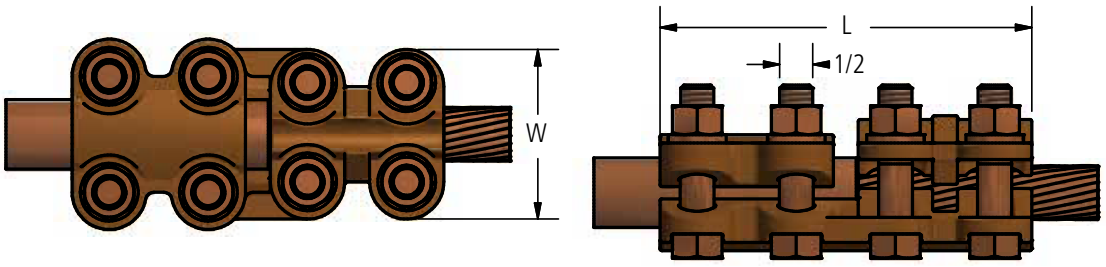

Material

High Conductivity Cast Copper Alloy

Hardware

Everdur bolts, nuts and lockwashers

DOSSERT®

TYPE UK, UKT
Copper U-Bolt Coupler

A U-Bolt type straight connector for coupling two cables end to end. The the UKT connects a total of three cables. Each of the connector takes a wide range of cable sizes. Designed to provide high contact pressure on all cable sizes.

UK

Material

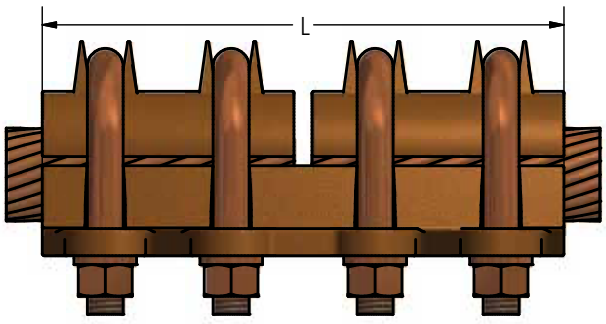

Copper Alloy

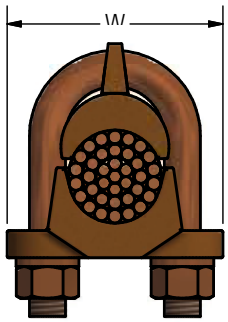

Hardware

Everdur U-bolts, nuts and lockwashers

DOSSERT®

TYPE UP2K, UP4K

Special Coupler For Cables To Tubular Bus

A special coupler for coupling cables to a copper tubular bus. Each cable position is designed to accommodate a wide range of cable sizes.

UP2K

UP4K

Material

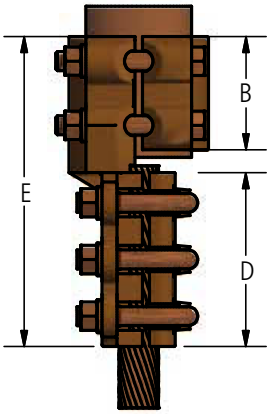

Copper Alloy

Hardware

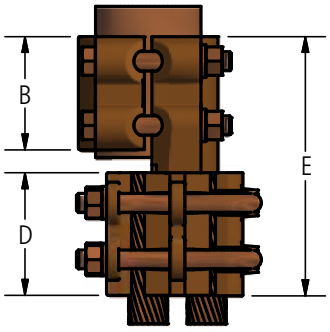

Everdur bolts, nuts, lockwashers, and U-bolt

Note

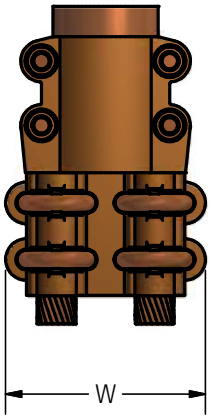

- Please contact Factory for specific sizes
  For a four(4) cable coupler to pipe, replace UP2K with UP4K.
  EX: UP2K300-80 would be with two cables.
- UP4K300-80 would be with four cables.
- For tin plating add "-SN" to the end of catalog number.

DOSSERT®

TYPE UPK

Copper U-Bolt Coupler for Pipe to Cable

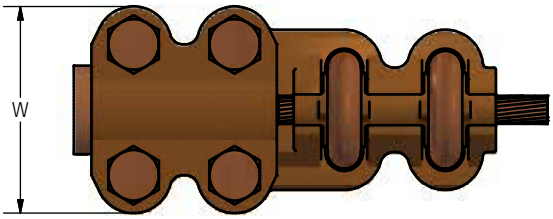

A U-bolt cable to pipe coupler. Made of high conductivity copper alloy and designed for rugged service. The variable U-bolt feature makes it possible for a connector for a given pipe size to accommodate individually several different cable sizes.

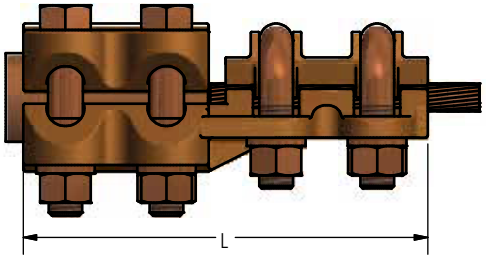

Material

Copper Alloy

Hardware

Everdur bolts, nuts, lockwashers, and U-bolts

DOSSERT®

TYPE CF-N (NEMA Pad Sizes)

Flexible Copper Braid

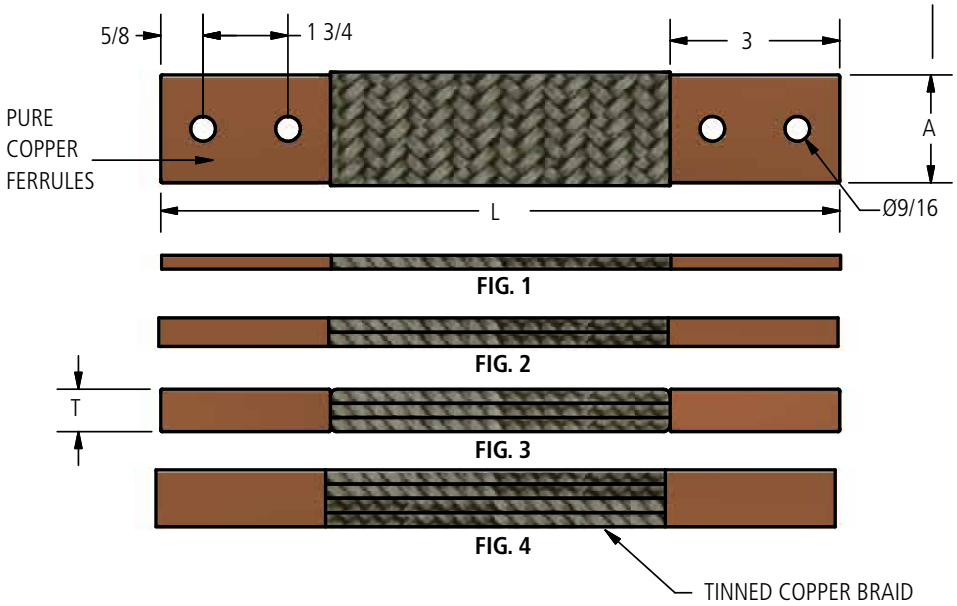

Flexible copper braid for linking conductors that are subject to motion. The braid is tin plated copper wire, terminated at each end by a non-plated copper pad.

Material

Copper Alloy

Notes

- Braid may be custom made for any configuration of length, pad size and hole diameter.
- For Electro Tin Plate, add suffix "-SN" to end of catalog number. Ex: CF771-10-N-SN
- For Undrilled Pad, add suffix "-U" to pad size in catalog number. Ex: CF772-16-N-U

DOSSERT®

TYPE CF
Flexible Copper Braid

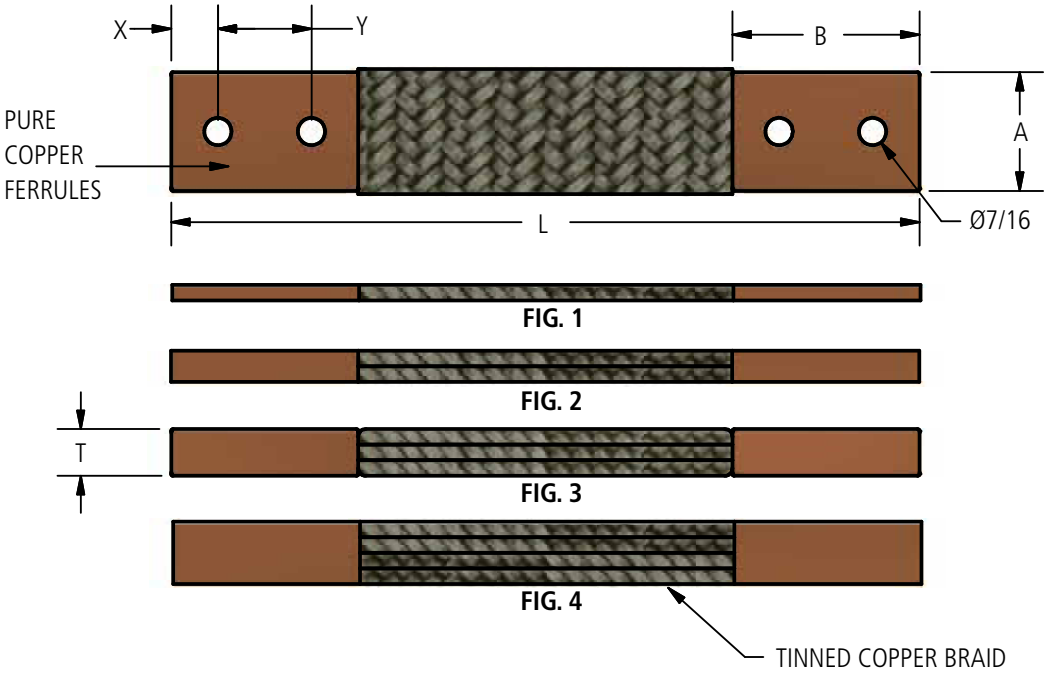

Flexible copper braid for linking conductors that are subject to motion. The braid is tin plated copper wire, terminated at each end by a non-plated pad.

Material

Copper

Note

- Braid may be custom made for any configuration of length, pad size or hole diameter.
- For tin plated contact pads add suffix "-SN" to end of catalog number. Ex: CF771-SN
- For undrilled contact pads add suffix "-U" to end of catalog number. Ex: CF771-U
- For undrilled contact pads and tin plated pads, add suffix "-U-SN" to end of catalog number. Ex: CF771-U-SN

DOSSERT®

TYPE CFC
Flexible Copper Braid

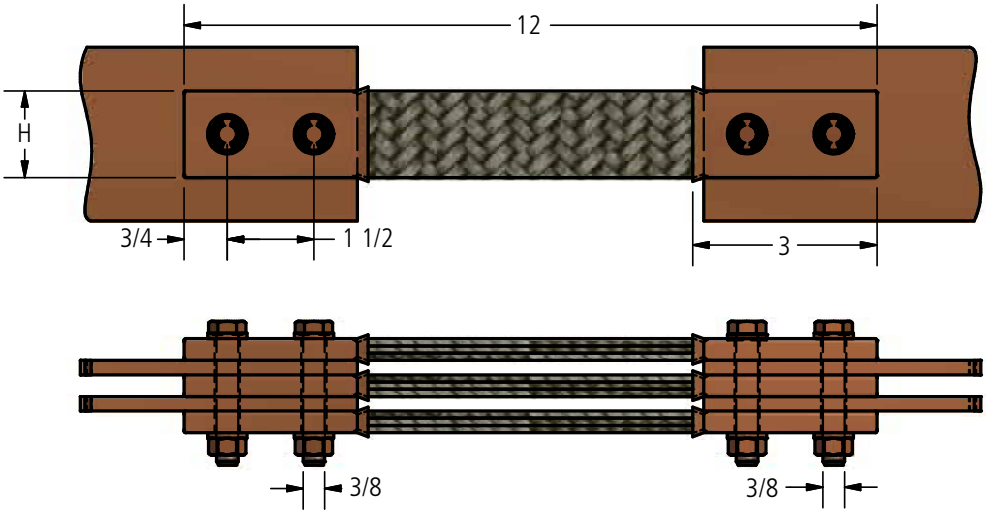

Composite flexible copper braid for linking conductors that are subject to motion. The braid is tin plated copper wire, terminated at each end by a non-plated pad.

Material

Copper

Note

- Braid may be custom made for any configuration of length, pad size or hole diameter.
- For tin plated contact pads add suffix "-SN" to end of catalog number. Ex: CFC1-2-SN
- For undrilled contact pads add suffix "-U" to end of catalog number. Ex: CF771-U

DOSSERT®

TYPE LX

Copper Flexible Connector For Flat to Flat

Laminated of pure copper, this flexible connector permits expansion and contraction due to thermal changes. Bonded ends assure uniform contact surfaces. Variations other than shown can be readily supplied.

Material

Copper

Note

- Braid may be custom made for any configuration of length, pad size or hole diameter.
- For tin plated contact pads add suffix "-SN" to end of catalog number. Ex: LX200-SN
- For undrilled contact pads add suffix "-U" to end of catalog number. Ex: LX200-U

DOSSERT®

TYPE XC, XCP, XBP

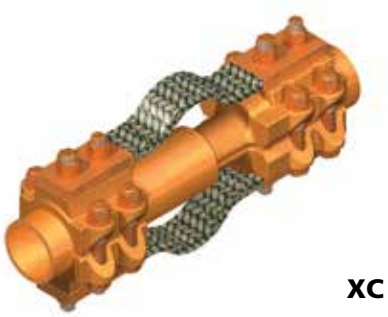

Copper Expansion Coupling

XC, XCP

An expansion connector for coupling two standard pipe size tubular buses.

XBP

An expansion connector for coupling a run to a tap. Pipe size may be same SPS, or varying.

XC

Material

Copper Alloy

Alignment Guide

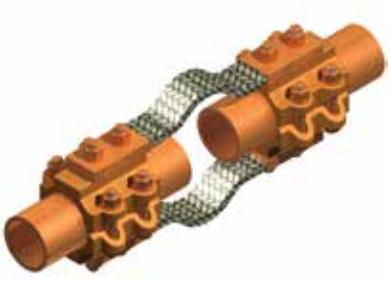

Copper Alloy

Hardware

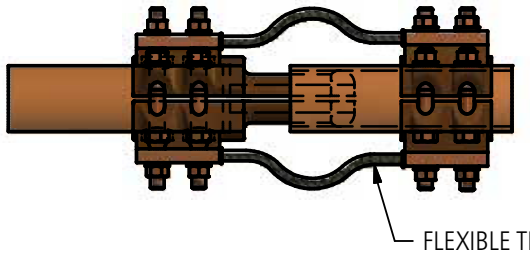

Everdur bolts, nuts, lockwashers and flat washers

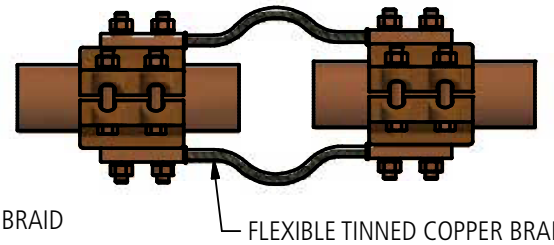

Notes

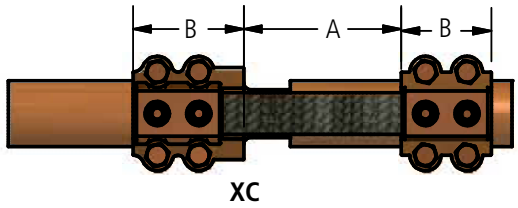

- For laminations add "L" to catalog number. Example: XCL100
- For extra heavy pipe size (Schedule 80), add (E) to pipe size. Example: XC100E
- If alignment guide is not required, add (P) to catalog number suffix. Example: XCP100

DOSSERT®

TYPE XL

Terminal Expansion Pipe

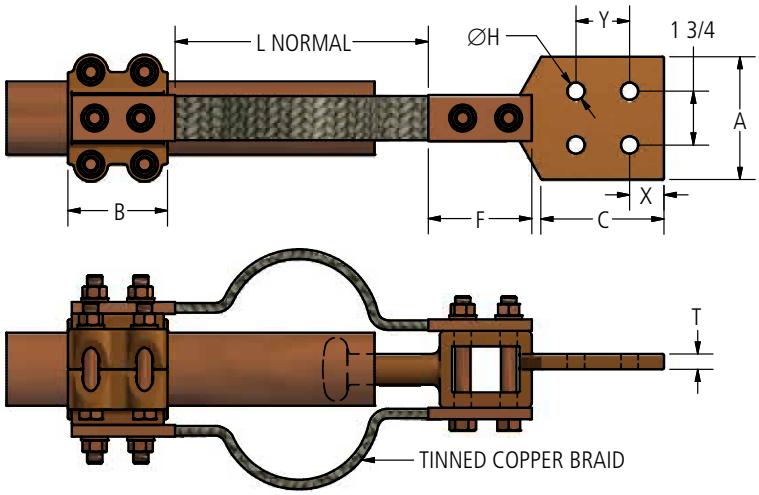

An expansion terminal for connecting a standard pipe size tubular bus to flat conductor surfaces. Designed to permit free axial movement of the bus due to thermal expansion and contraction. High circular mil area of extra flexible linkages ensures cool operation under maximum load conditions. Pad dimensions and drilling other than shown below can be furnished upon request.

Material

Copper Alloy

Hardware

Everdur bolts, nuts, lock washers and washers

DOSSERT®

TYPE XTS

Copper Flexible Connector For Tubular Bus To Flat

A clamp type connector terminating a tubular bus to a flat bus, plate or stud through a flexible copper strap. The flexible copper strap absorbs operating vibrations and permits free axial movement of the tubular bus.

Material

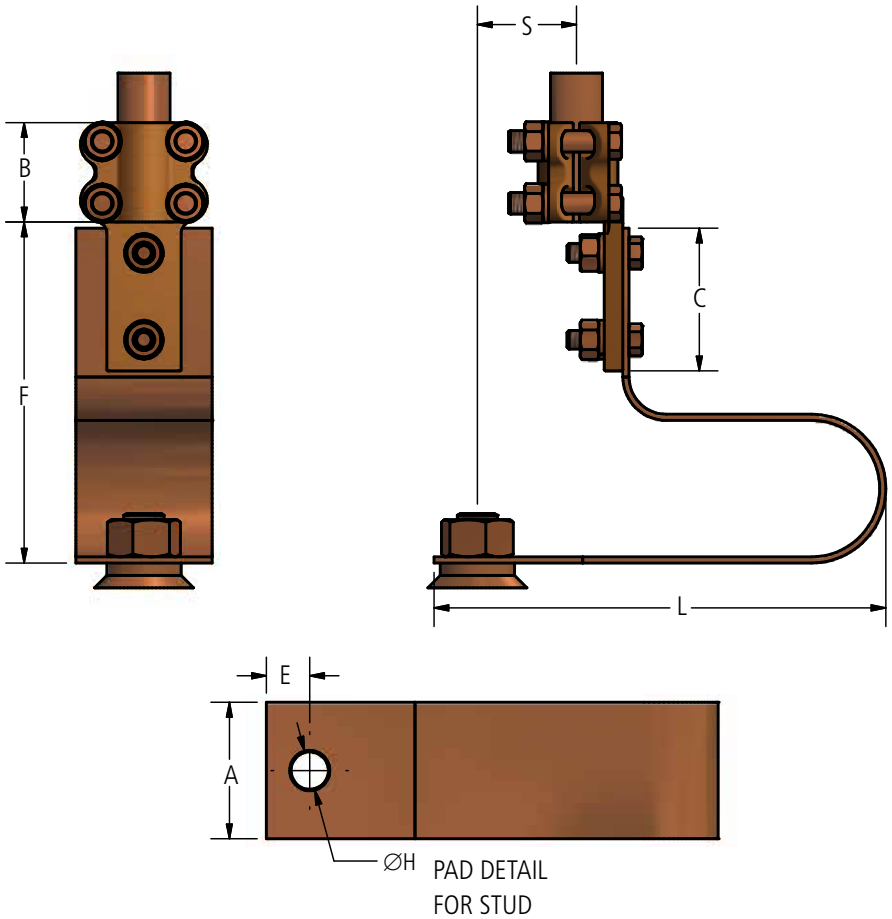

Copper Alloy

Lamination Material

Copper Alloy

Hardware

Everdur bolts, nuts and lockwashers

DOSSERT®

TYPE XTSS, XTSS-N

Copper Flexible Connector For Tubular Bus To Flat

XTSS is used where stud and the tube positioning will not permit any extensive offset. The semi-flexible loop of copper strapping allows for movement caused by the expansion and contraction of conductor members.

Material

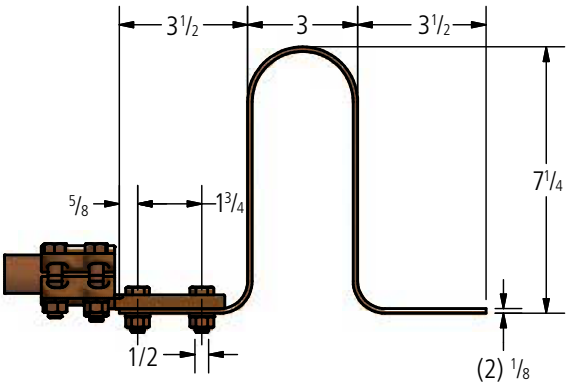

Copper Alloy

Hardware

Everdur nuts, bolts and lock washers.

Lamination Material

Copper

DOSSERT®

TYPE BPCV-S, BP2CV-S

Copper Tee Connector For Tubular Bus To A Cable Tap

A variable tap pipe to cable tee connector. Cable clamping section is provided with two independently acting high strength bronze saddles.

Material

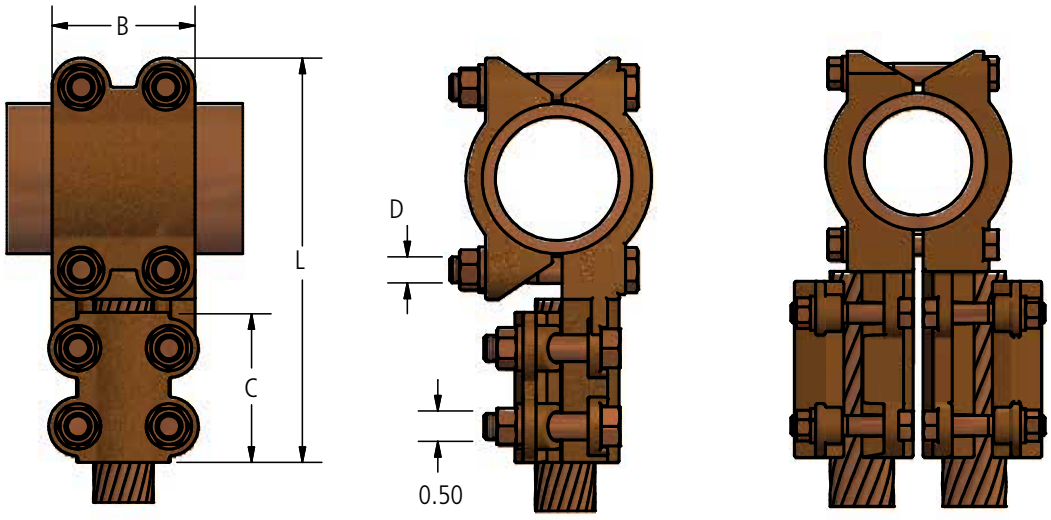

Copper Alloy

Hardware

Everdur bolts, nuts and lockwashers

Notes

- For tin plating add "-SN" to end of catalog number
- For tee connector 1" SPS pipe run and 300kcmil 2 cable tap, and tin plated order: BP2CV100-30-SN

DOSSERT®

TYPE BPE

Copper Heavy Duty Tee For Tubular Bus

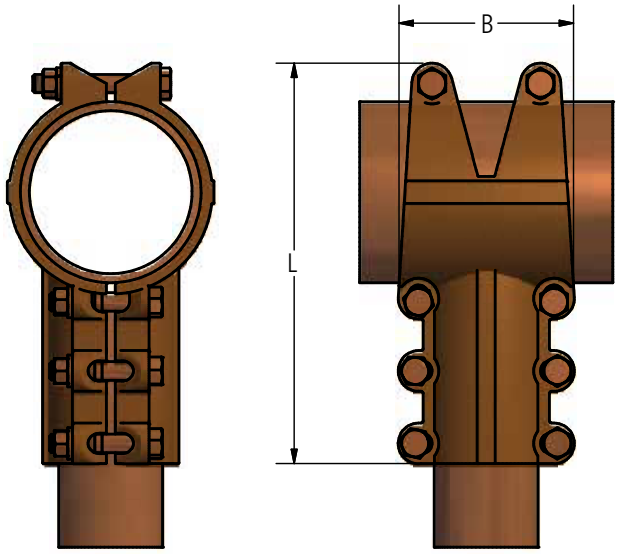

A heavy duty tee connector for standard and extra heavy size of tubular bus. Designed to provide a minimum of four bolts for each conductor. Made of high strength high conductivity copper alloy and designed with a conductive area and contact surface to insure cooler-than-bus operation at maximum load conditions.

Material

Copper Alloy

Hardware

Everdur bolts, nuts and lockwashers

TYPE UPT

Copper Pipe To Cable Tee Connector

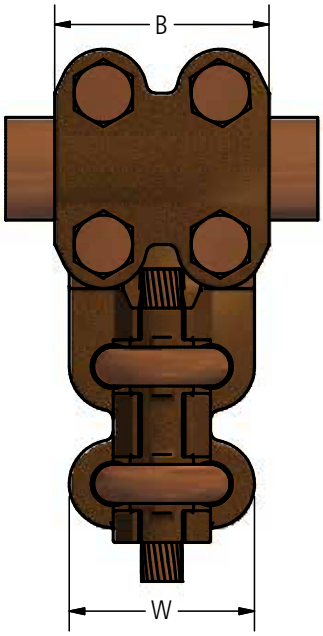

A pipe to cable tee connector. The U-bolt variable clamping feature on the tap permits a number of cable sizes for one size of pipe. All bolts, nuts, lockwashers are of Everdur material.

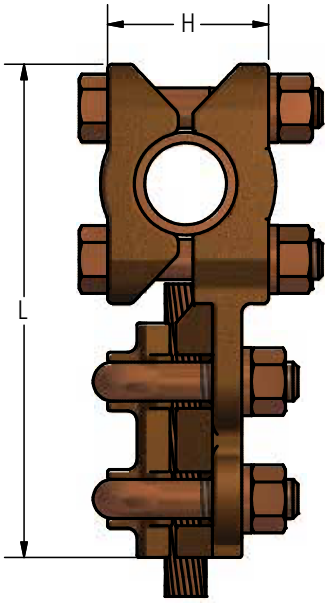

Material

Cast High Conductivity Copper Alloy

Hardware

Everdur bolts, nuts, lockwashers, and U-bolts

DOSSERT®

TYPE UT, UUT
U-Bolt Tee Connector

A rugged U-bolt high compression clamp type tee connector which takes a wide range of cable sizes in both the run and tap sections. Designed to withstand high compressive clamping action on all cables within specified cable ranges.

UT

UUT

Material

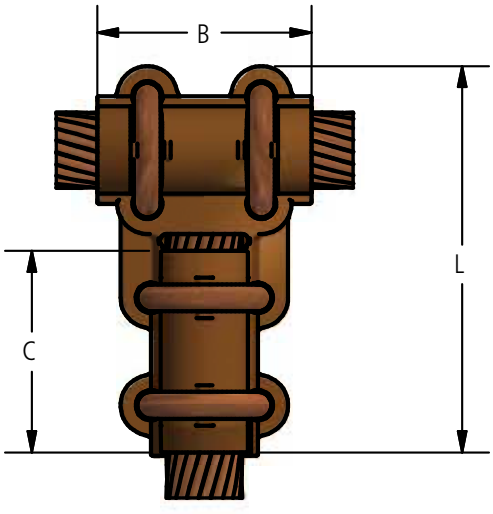

Copper Alloy

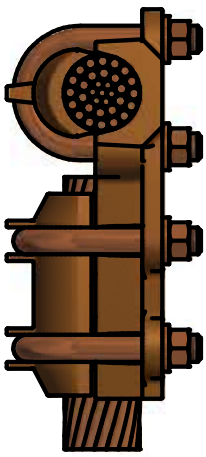

Hardware

Everdur U-bolts, nuts, and lockwashers

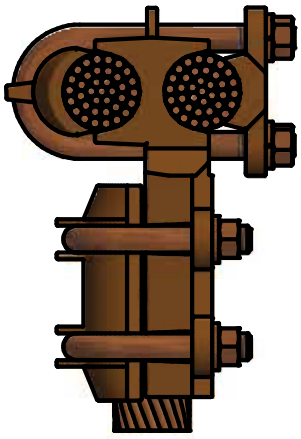

Notes

- For a 500 MCM cable tee connector, single tap, SINGLE run, order UT50-50.
- For a 500 MCM cable tee connector, single tap, DOUBLE run, order UUT50-50.
- For tin plating, add "-SN" to end of catalog number. EX: UT50-50-SN

DOSSERT®

TYPE UTS
Copper U-Bolt Type Tee Coupler

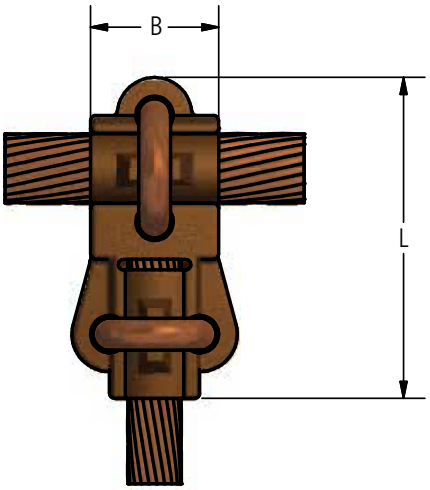

A rugged U-bolt clamp type tee connector which takes a wide range of cable sizes in both the run and tap sections. Designed to withstand high compressive clamping action on all cables within specified cable range. UTS is a compact version of UT.

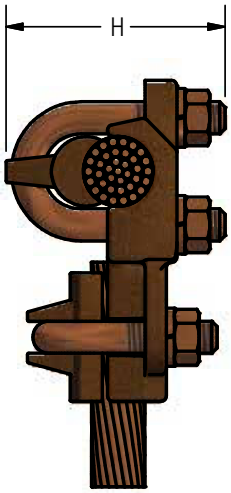

Material

Copper Alloy

Hardware

Everdur nuts, lockwashers and U-bolts

DOSSERT®

TYPE VB

V Brace For Strut To Tubular Bus

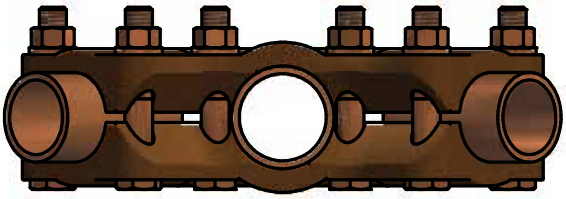

A V-Brace for connecting angular Struts and trusses to tubular buses for Structural support. Eliminates use of Structural steel supports and the required accompanying insulators. With the V-Brace and Angle Brace, various arrangements of trussing may be devised.

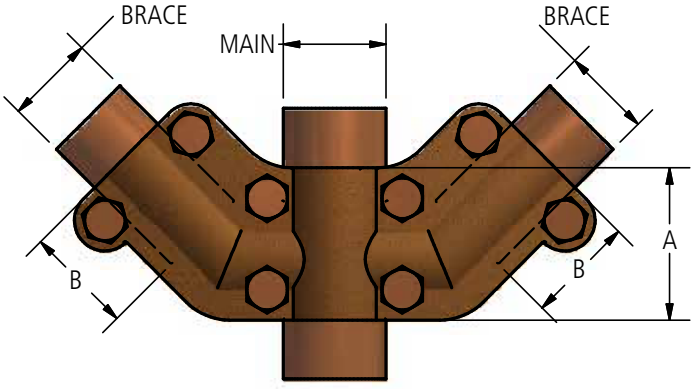

Material

Copper Alloy

Hardware

Everdur bolts, nuts and lockwashers

TYPE ES, ESS, ESSN

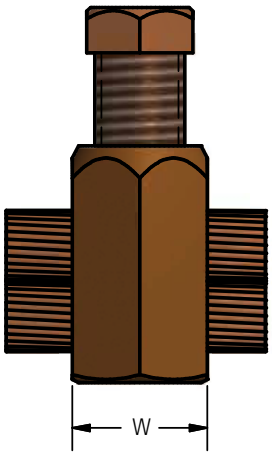

An econmical house service entrance connector for joining two cables on end. This compact connector can be readily installed with either a wrench, pliers or a screw driver. Type ESS has multiple applications, it can be used with Copper and Aluminum conductors. Type ESSN is completely tin plated to prevent galvanic corrosion between two dissimilar metals.

DOSSERT®

TYPE GPEX

Copper Universal Clamp For Cable

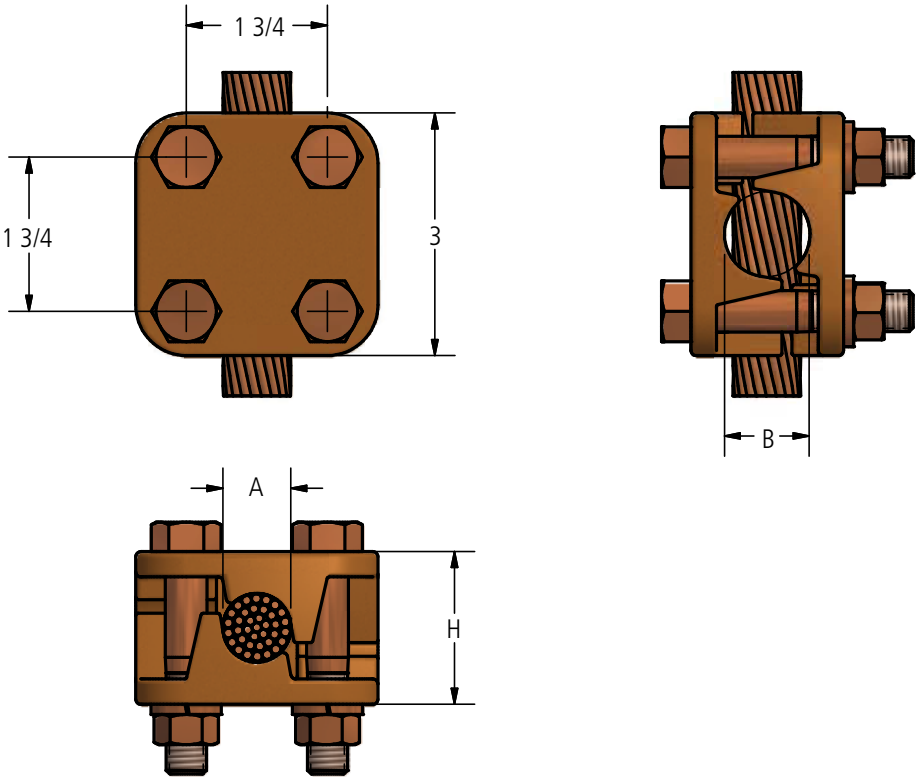

A versatile connector which takes a range of conductor sizes in two positions. Bolt positions held to NEMA standards enabling cable or pipe to be bolted directly to flat bar. Both outside faces machined flat for contact purposes. Used in conjunction with type CF braid straps to make various types of expansion connectors. Unless otherwise specified, bolt length supplied to accommodate one 1/4 inch bar.

Material

Copper Alloy

Hardware

Everdur bolts, nuts and lockwashers

DOSSERT®

TYPE GTV

Copper Gutter Tap Connector

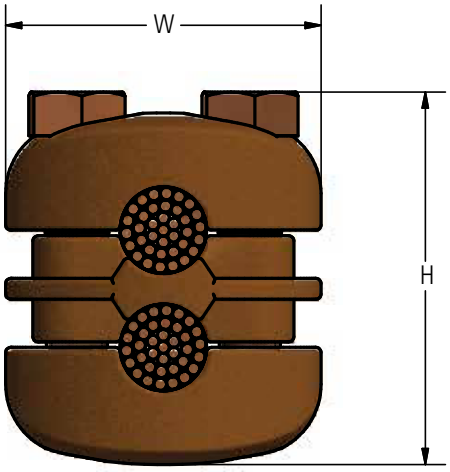

A variable type gutter tap which accommodates a wide range of cable sizes in both main and tap clamping sections. The variability of this unit minimizes the number of connectors required for a given number of combinations of cables. Compact in design and easy to tape.

DOSSERT®

TYPE GTX

Copper Two Position Variable Distribution Tap

A variable type distribution tap for making parallel taps and cross connections. Each connector accommodates a range of cable sizes in each position.

Material

Copper Alloy

Hardware

Everdur bolts and lockwashers

Note

For tin plating add suffix "-SN" to catalog number.

DOSSERT®

TYPE Q2L, Q2L-E

Copper Service Tap Connector For Two Cables To Flat

Double tap lugs series are designed to fit NEMA two hole pads with two 9/16 inch holes on 1 3/4 inch center except the small sizes. Compact construction and two high strength clamp members reduce cantilever distance and increase pull out resistance of conductors.

Material

Copper Alloy

Hardware

Everdur nuts and lockwashers

Note

Type Q2L is for use with 1/4 inch bus bar. Type Q2L-E is for use with 1/2-3/4 inch bus bar.

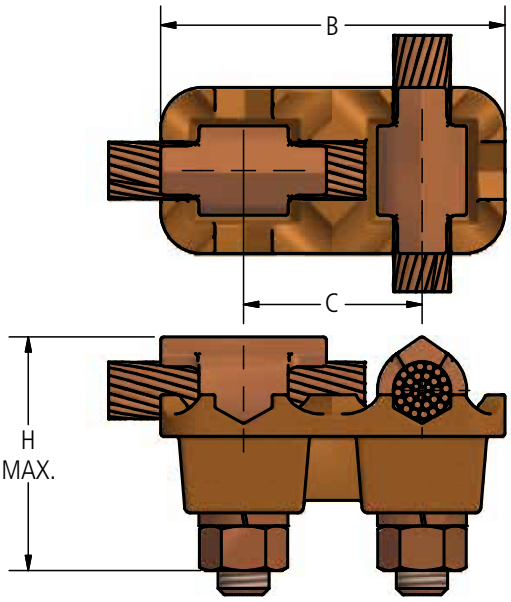

FIG. 1

DOSSERT®

TYPE QL, QL-E

Service Tap Connector For Cable To Flat Bus Bar

A versatile service tap connector which takes a wide range of cable sizes. Used for mounting on switch pads, current transformer terminals, and miscellaneous flat bus conductors. The single hole mounting enables the plane of the flat bus.

Material

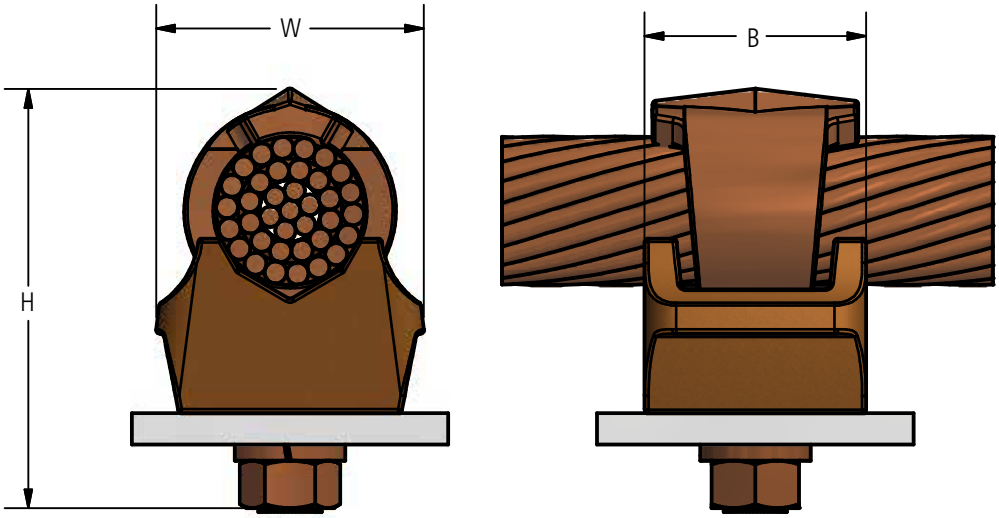

Copper Alloy

Hardware

Everdur nuts and lockwashers

Notes

- QL is for use with 1/4 inch bus bar. Type QL-E is for use with 1/2-3/4 inch bus bar.
- For Stainless Steel Hardware, add "-SS" to catalog number. EX: QL25-SS

DOSSERT®

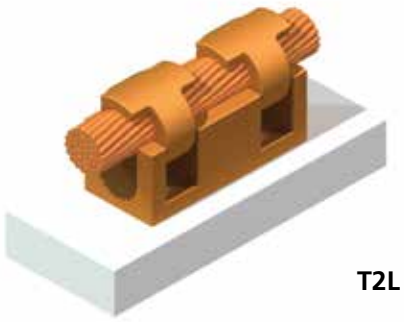

TYPE TL, TL-E, T2L, T2L-E

Copper Low Mount Tap Lug For Cable To Flat Bar

A low mount tap lug for cable to bar connections. Finds wide application on current transformers and tap connections for metering equipment. See Type T2L for double tap design. Type T2L is designed to meet NEMA pad drilling and all sizes can mount side by side without interference.

TL

T2L

Material

Copper Alloy

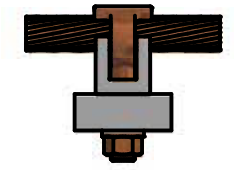

Eyebolt- Aluminum Bronze

Hardware

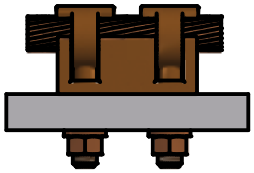

Nut and lock washers-Everdur.

Note

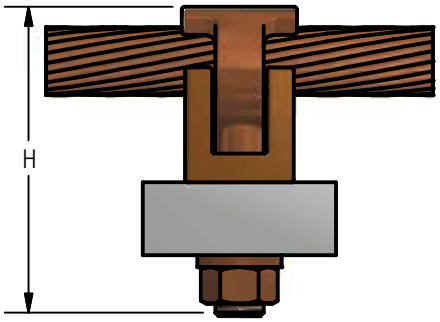

- Type TL is for use with 1/4 inch bar. Type TL-E is use with 1/2 - 3/4 inch bar.
- For Double Tap lug change TL to T2L.
- For Silver palted finish add suffix (AG) to catalog number Ex: TL13-AG

DOSSERT®

TYPE UD

Universal Parallel Clamp

A universal clamp to provide a connection for two cables or wires over a wide range of sizes. The interlocking of the halves of this clamp insures a good grip and high area of a contact for all conductors.

Material

Copper Alloy

Hardware

Everdur bolts, nuts and lockwashers

Notes

- Voltage rating is 230KV
- For tin plating add "-SN" to end of catalog number. EX: UD50-21-SN
- Also add "GS" for galvanized steel hardware.

DOSSERT®

TYPE UP, UP-3

U-bolt Parallel Clamp

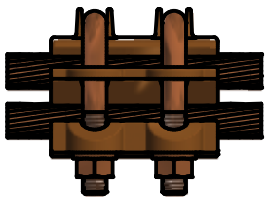

A U-bolt type connector for clamping two cable conductors in parallel. The high compressive action applied by the U-bolts acts directly and uniformly on the two conductors. The variability of each clamping section makes possible numerous combinations of cable.

Material

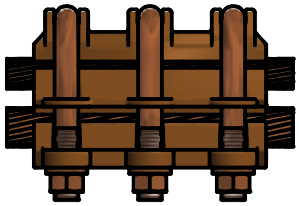

Copper Alloy

Hardware

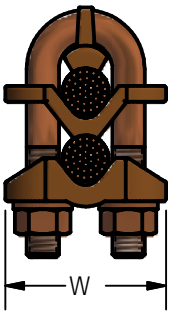

Everdur U-bolts, nuts, and lockwashers.

DOSSERT®

TYPE DH, DA

Copper Clamp For Flat Bus Bars DH is a four bolt design and DA is a three bolt design.

A clamp for developing high contact pressures between flat copper bus bars.This rugged connector may be used for coupling, crossing, aligning bus or tapping conductors.

Material

Copper Alloy

Hardware

Everdur bolts, nuts and lockwashers

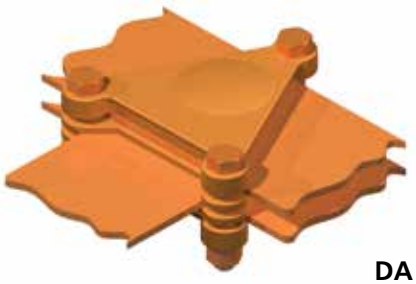

Notes

For a 4" main and 4" tap with three bolt patern order DA44.

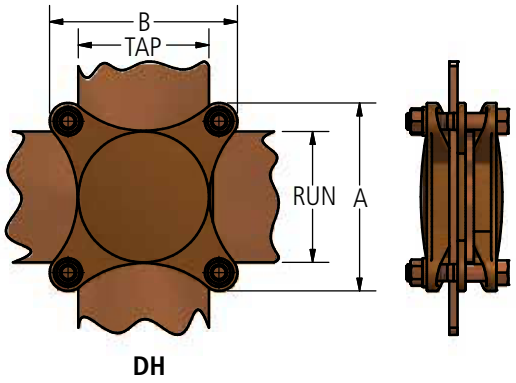

If more than two bars are used, add to the suffix "number of bars to be clamped." EX: DH11-3

DOSSERT®

TYPE HAF, H2AF, H3AF, H4AF

Tee Connector For Tapping Flat Bar With Cable HAF connects one cable to flat bus bars, H2AF connects two cables to flat bus bars, H3AF connects three cables and H4AF connects four cables to flat bus bars.

A tee connector for tapping a flat bus with a cable. The clamp fitting enables the connector to be installed anywhere on the bus without the necessity for drilling holes for clamping bolts. The wide variation of the HERCULON™ fitting enables one connector.

HAF

Material

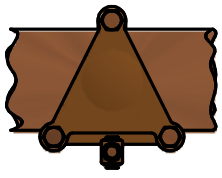

Copper Alloy

Hardware

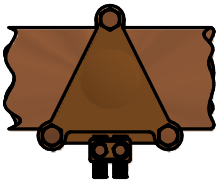

Everdur bolts, nuts and lockwashers

Note

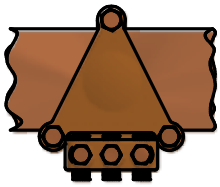

- Above 500 MCM connectors have thicker pads and are mounted outside buses. See catalog number for spacer information. Unless otherwise specified spacer will not be supplied with connectors.
- For 4in wide bus bars and two 350kcmil cables order: H2AF35-4.
- For 4in wide bus bars and three 350kcmil cables order: H3AF35-4.
- For 4in wide bus bars and four 350kcmil cables order: H4AF35-4.

DOSSERT®

TYPE EN, EW, ELW, EILW

Everdur Nuts, Spring Washer, and Flat Washer

Dossert Everdur nuts, EN, are made to the American Standard National course thread Class 2 Semifinished, cold punched. Dossert Everdur spring type lockwasher, ELW, is a tough and durable unit which prevents the loosening of the nut under severe conditions of vibration. Dossert Everdur flat washers, EW, are stamped from cold drawn Everdur sheet and are tumbled to a smooth finish with rounded edges. Dossert Everdur internal lock washer EILW.

DOSSERT®
TYPE G110, G111, G114, G115

All Dossert ground clamps are made of a high copper alloy and are equipped with silicon bronze bolts. These connectors are characterized by their high resistance to corrosion which makes them suitable for burial underground without danger of joint deterioration

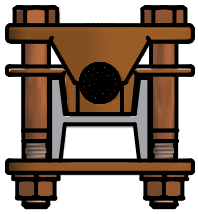

Two types of two conductor ground clamps for grounding to square fence post, type G114 or for gounding to H beam column or fence post, type G115.

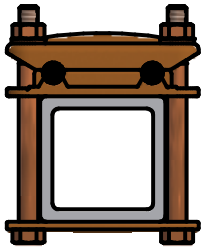

Two single conductor ground clamps for connecting a ground wire to the web of an H beam type fence post. Type G111 provides a clamping saddle between wire and post, while type G110 clamps wire directly to post.

DOSSERT®

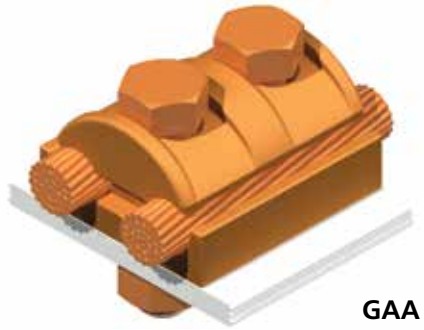

TYPE GA, GAA

Two Conductor Flat Bar Ground Clamp

A single or double bolt ground clamp for clamping two wires or cables to a flat bar,plate, or structural memeber. Permits a slight range of variablility in accomadating different size conductors. Bolts are retained by body to enable assembling with only one wrench. Bolts are supplied to clamp a 1/4 inch bar. GAA is similar to GA except that it is designed for heavier service.

GA

GAA

Material

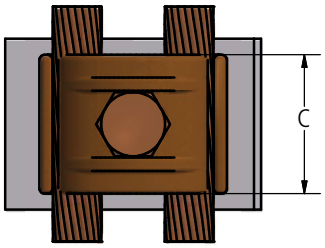

Copper Alloy

Hardware

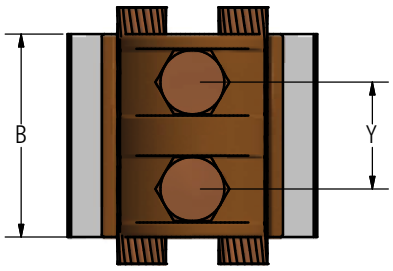

Everdur bolts, nuts and lockwashers

Notes

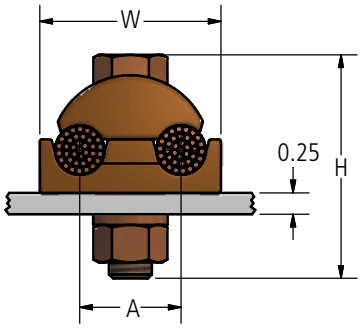

- Bolt length supplied to clamp a 1/4 inch bar with maximum conductor in place.
- For thicker bars, longer bolts will be furnished upon request.
- For tin plating, add suffix "-SN" to catalog number EX: GA13-SN
- For galvanized steel hardware, add suffix "-GS" to catalog number EX: GA13-GS
- For stainless steel hardware, add suffix "-SS" to catalog number EX: GA13-SS

DOSSERT®

TYPE GB, GBB

Copper Grounding Connector for Three Cables to a Flat Surface.

GB style is a two bolt design and GBB is a four bolt design. These clamps are used for clamping three cables of equal size to a flat bar, plate, or structural member. Bolts are retained by body to enable assembling with only one wrench. Bolts are supplied to clamp a 1/4 inch bar.

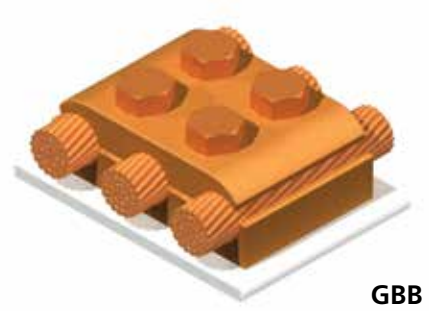

GB

Material

Copper Alloy

Hardware

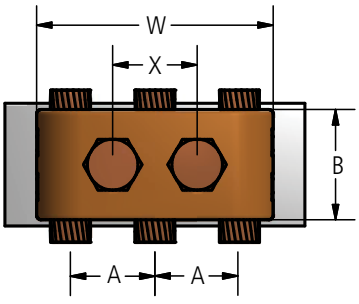

Everdur bolts, nuts and lockwashers

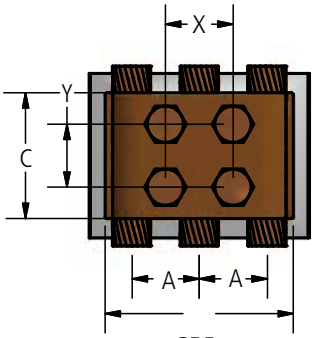

GBB

Note

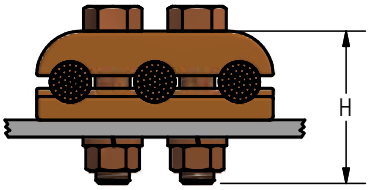

- Bolt length supplied to clamp a 1/4 inch bar with maximum conductor in place.
- For thickerbars, longer bolts will be furnished upon request.For tin plating add suffix (SN) to catalog number. Example: For a 4 solid conductor, 2 bolt clamp, and tin plating, order: GB13-SN
- For a galvanized steel bolt add suffix (GS) to catalog number. Example: For a 4 solid conductor, 4 bolt clam, and galvanized steel bolts, order: GBB13-GS

DOSSERT®

TYPE GCF, GCG

Ground Connector For Rotating Pipe To A Flat Surface

A flexible ground connector for grounding a rotating pipe or rod to a flat surface. Finds wide application in grounding switch operating pipes and fence gates.

TYPE GCG modification is for grounding one pipe or rod to another.

GCF

GCG

Material

- Copper Alloy
- Braid is tin plated copper wire, terminated at each end by a non-plated pad.

Hardware

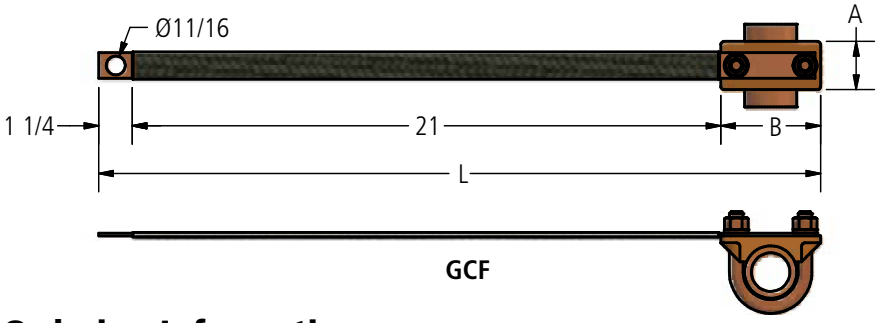

Everdur bolts, nuts and lockwashers

Note

Braid may be custom made for any configuration of length, pad size or hole diameter.

GCG

GCF

DOSSERT®

TYPE GD

Grounding Connector For Flat Bar to Pipe Or Rod

A ground connector for securing a flat bar to a grounding rod or pipe. The flat bar may be assembled in a horizontal or vertical position. Connector can accommodate any thickness of bar.

Material

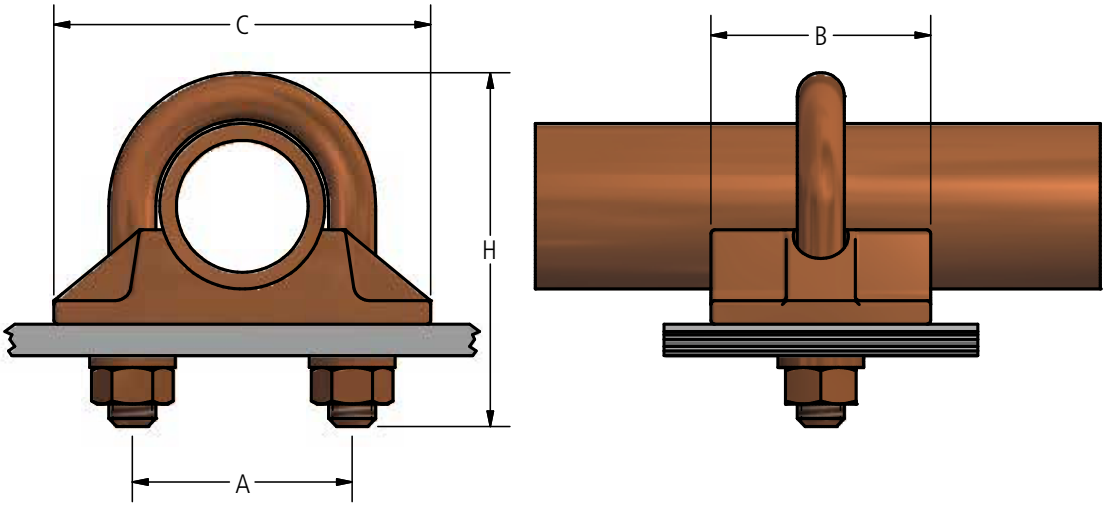

Copper Alloy

Hardware

Everdur U-bolts, nuts and lockwashers

Note

Where bars to be used will exceed 1/4 inch please contact the Factory due to the necessity of larger U-Bolts.

DOSSERT®

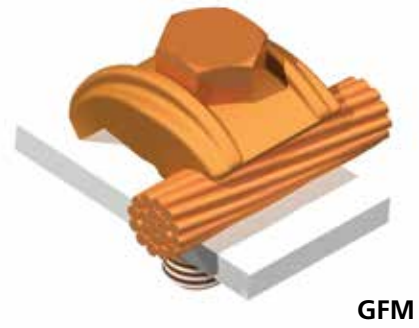

TYPE GF, GFM

Copper Grounding Connector for Cable to a Flat Surface

A ground clamp for grounding a cable or wire to a flat bar, plate or flat structural steel member. The bolt is retained by the body to enable assembly with only one wrench. GFM comes without the base.

GF

GFM

Material

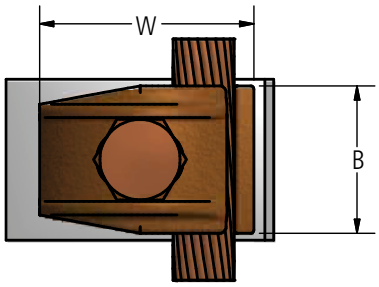

Copper Alloy

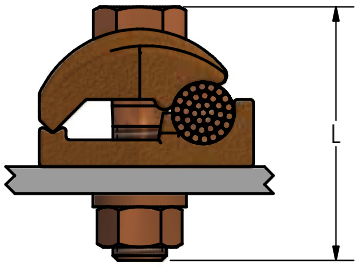

Hardware

Everdur bolts, nuts and lockwashers

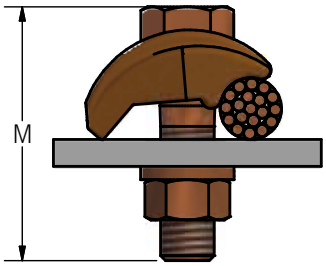

Notes

- Bolt length supplied to clamp a 1/4" bar with maximum conductor in place. For thicker bars, longer bolts will be furnished upon request.
- For tin plating add suffix "-SN" to end of catalog number. Example: GF13-SN
- For a 300 mcm conductor and one piece assembly, order GFM50.
- For Galvanized Steel Hardware, add "-GS" to catalog number. EX: GF13-GS
- For Stainless Steel Hardware, add "-SS" to catalog number. EX: GF13-SS

DOSSERT®

TYPE GG

Copper Grouund Connector For Crossing Two Cables Or Ground Rod

A ground connector for crossing two wires or cables or for securing a cable or wire to a ground rod. Can also be used for equalizing over head cables and wire. Its high resistance to corrosion enables this connector to be buried in the ground after a connection is made.

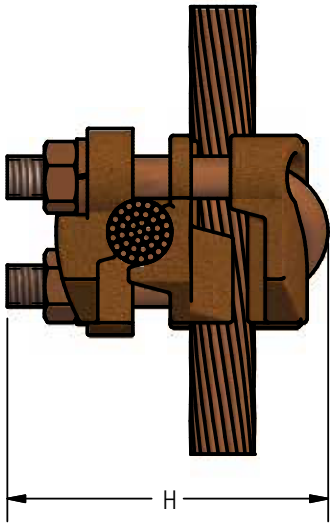

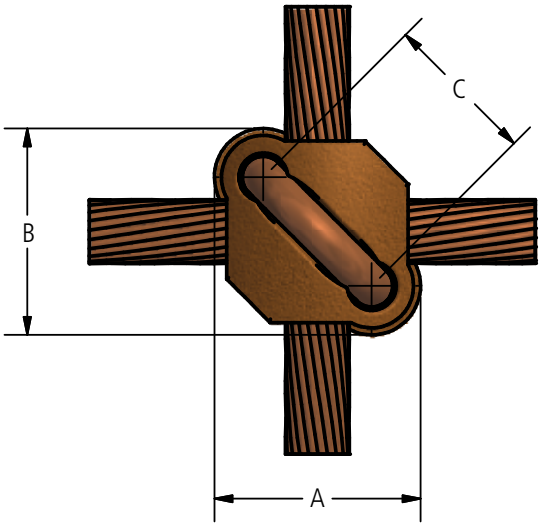

Material

Copper Alloy

Hardware

Everdur U-bolts, nuts and lockwashers

DOSSERT®

TYPE GK

Ground Clamp For 3 Cables To Fence Post

A ground connector for grounding three equal size cables at right angles to a grounding pipe or rod. Use of highly corrosion resistant materials allows the connector to be buried in the ground after connection is made. Finds wide application in the grounding of fences and structural members about a substation.

Material

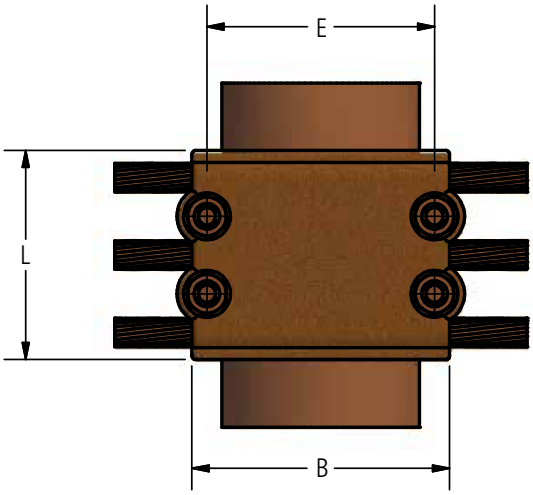

Copper Alloy

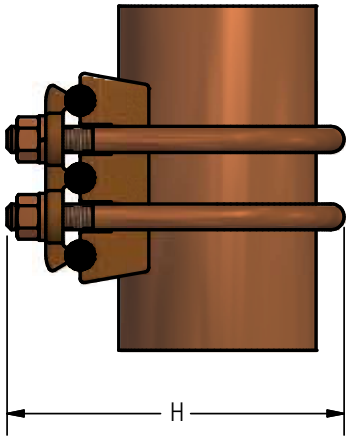

Hardware

Everdur bolts, nuts and lockwashers

Note

For tin plating add suffix (SN) to catalog number. Example: GK25-4-SN

DOSSERT®

TYPE GL

Ground Clamp for Cable to Flat Bar

A connector for grounding a cable or wire to flat bar, plate or structural frame. The looping of the conductor about the clamping bolt insures a secure electrical contact and a high pull out strength. Standard bolt length is provided to mount the connector on a 1/4 inch thick member.

Material

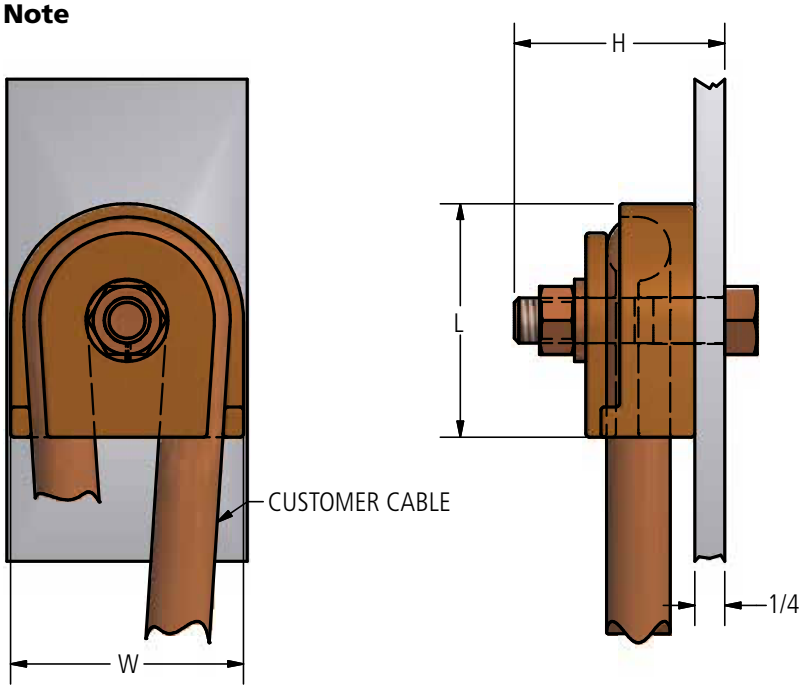

Copper Alloy

Hardware

Everdur bolts, nuts and lockwashers

Note

- Longer bolts can be furnished on request.
- For tin plating add suffix "-SN" to end of catalog number. Example: GL13-38-SN

DOSSERT®

TYPE GPC

Ground Clamp for Cable to Pipe in Parallel

A ground clamp for connecting a cable to a rod or pipe in a parallel or right angle position. Each position will accomodate a wide range of cable sizes. The cable can be placed in either clamping position without disassembly of clamp. Whole clamp is highly corrosion resistant.

Material

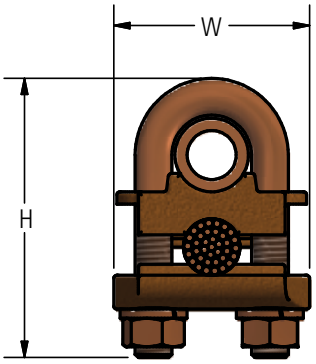

Copper Alloy

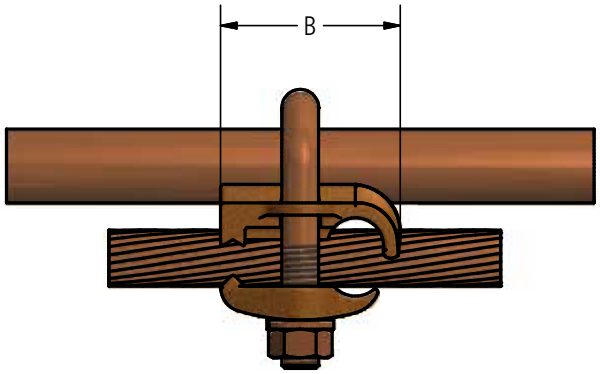

Hardware

Everdur U-bolts, nuts and lockwashers

Notes

- For O.D. pipe sizes to specified, add -R to catalog number, EX: GPC38R-4
- For tin plating, add suffix "-SN" to end of catalog number. EX: GPC38-4-SN
- For stainless steel bolts, lockwashers and Everdur nuts, add "-SSHBN" to catalog number. EX: GPC38-4-SSHBN
- All sizes are not shown, please contact customer service.

DOSSERT®

TYPE GPF

Universal Ground Connector for Cable to Pipe

A universal ground connector for connecting a groundwire or cable to pipe. The rotatable feature of the conductor clamping element permits the positioning and clamping of the wire or cable at any angle through a full 360° arc.

Material

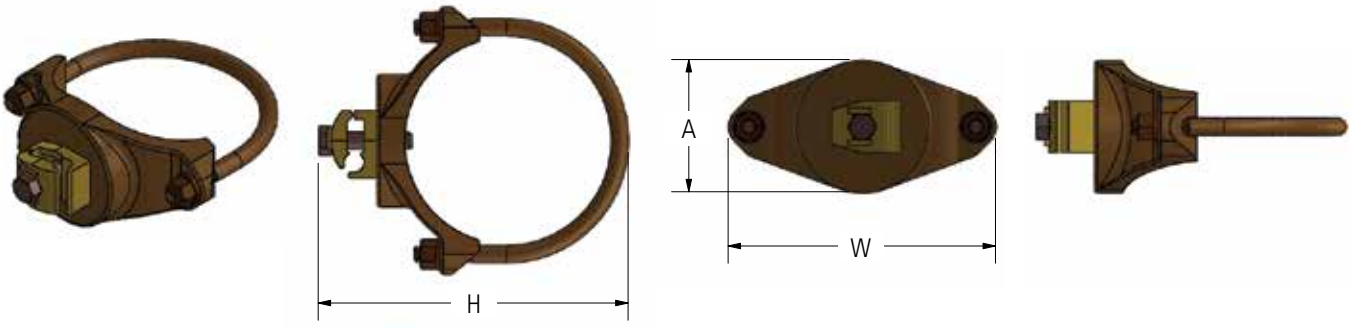

Copper Alloy

Hardware

Everdur bolts, lockwashers and nuts

Note

For tin plating, add suffix "-SN" to catalog number. Example: GPF250-13-SN

DOSSERT®

TYPE GR

Grounding Connector for Braid to Pipe

A ground connector for grounding flexible braid, laminated copper band, and copper bar to a pipe. Will also accommodate stranded cable when cable is unbraided and flattened out.

Material

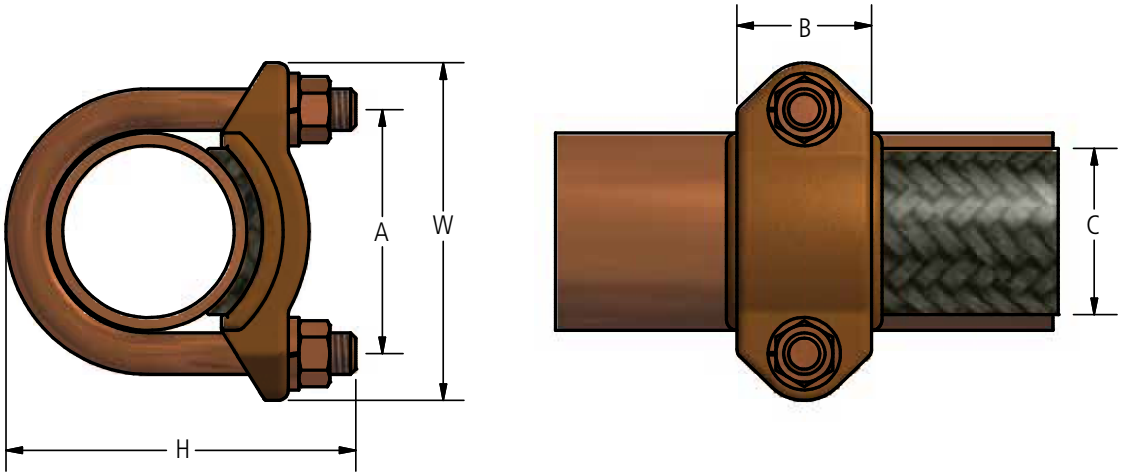

Copper Alloy

Hardware

Everdur U-bolts, nuts and lockwashers

Notes

- All sizes are not shown; item is available up to 6 inches SPS and other braid-to-pipe configurations.
- For Electro Tin plate, add suffix "-SN" to catalog number. Example: GR400A-SN

DOSSERT®

TYPE GW

Grounding Clamp for 2 Cables to Pipe in Parallel

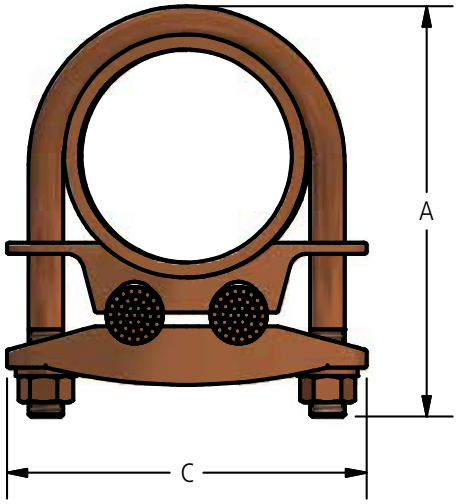

A clamp type grounding connector for grounding two cables to a single rod or pipe. A single cable may be used by looping back on itself. Each connector is designed to accommodate a wide range of conductor sizes. Other sizes than those listed can be promptly furnished.

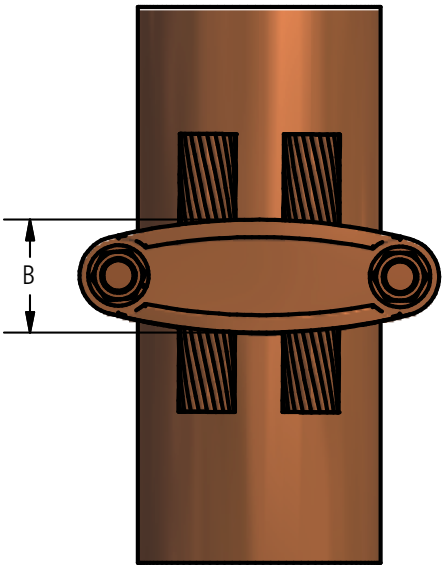

Material

Copper Alloy

Hardware

Everdur U-bolts, nuts and lockwashers

DOSSERT®

TYPE GX

Grounding Connector For Direct Contact Cross Conductors

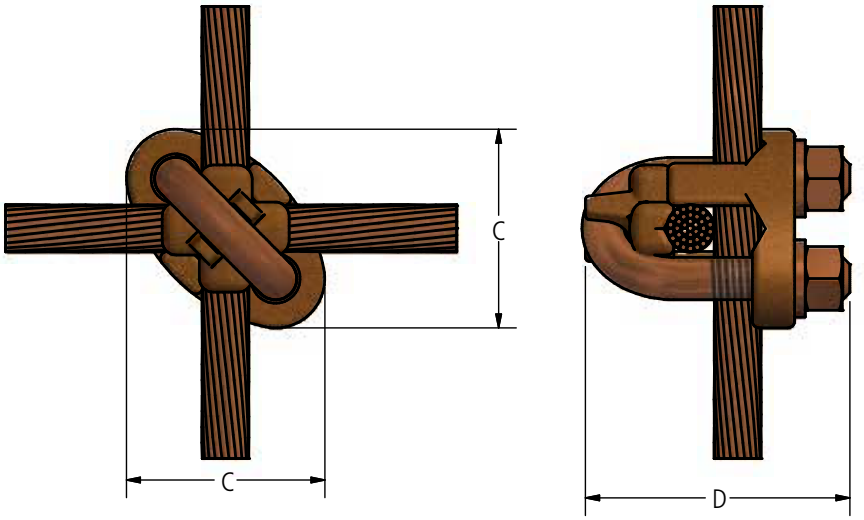

A grounding connector for direct contact cross grounding wire or cable. Each clamp accommodates two conductors of the minimum or maximum size or any intermediate combination of conductors.

Material

Copper Alloy

Hardware

Everdur U-bolts, nuts and lockwashers

DOSSERT®

TYPE GZ

Grounding Clamp for 3 Cables to Pipe in Parallel

A triple conductor grounding clamp for grounding three wires or cables to the same ground rod or pipe. The high range of variability permits use of a number of conductor sizes for one connector. The high corrosion resistance of the connector permits the entire assembly to be covered with earth after installation is made.

Material

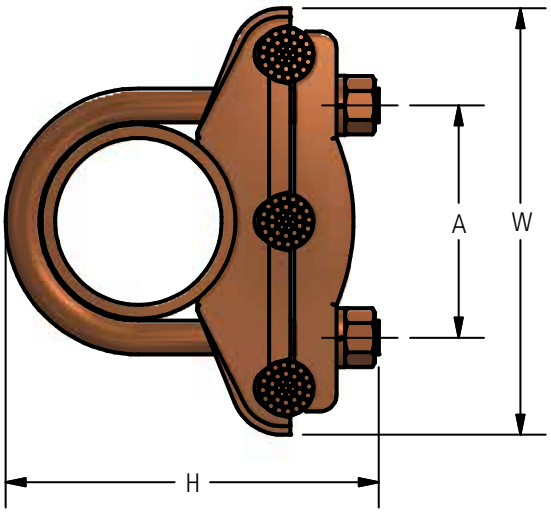

Copper Alloy

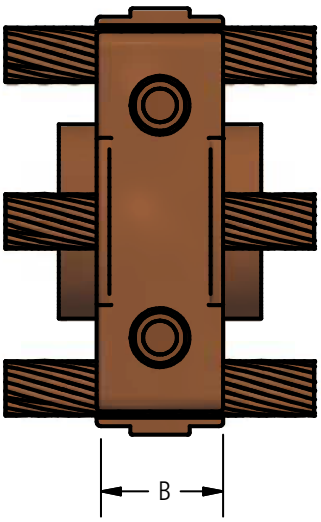

Hardware

Everdur U-bolts, nuts and lockwashers

Notes

- For tin plating, add suffix "-SN" to catalog number. EX: GZ125-50-SN
- For stainless steel bolts, lockwashers and Everdur nuts, add suffix "-SSHBN" to catalog number. EX: GZ125-50-SSHBN
- All sizes are not shown. Please contact the factory.

DOSSERT®

Type MTRC, MTR2C, and MTR3C

Multiple Tie Transformer Connector

A multiple tie transformer connector which provides a convenient means of connecting a number of cables to a single transformer terminal. Allows maximum conductor sizes to be run directly to the transformer, thereby minimizing voltage drop.

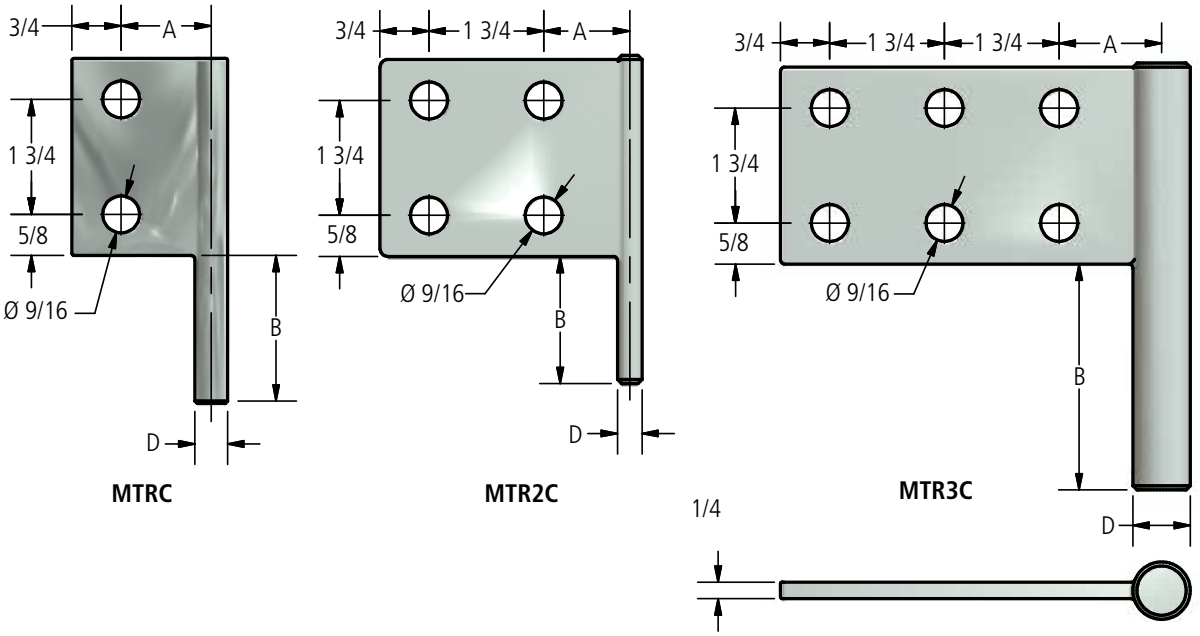

Material

Tin plated copper

Hardware

- MTR2C: Four hole NEMA standard drilled contact.
- MTR3C: Six hole NEMA standard drilled contact.

DOSSERT®

TYPE Q2TE, Q3TE, Q4TE

Cast Copper multiple tee connector for securing a number of cables to a single transformer terminal.

A cast type multiple tee connector for securing a number of cables to a single transformer terminal. Each cable clamping position is designed to receive a wide range of conductor sizes. Installation of each cable is simply accomplished by insertion of cable into eyebolt member and tightening nut with a single wrench. Body is of high conductivity copper alloy and eyebolt elements are of high strength bronze with silicon bronze nuts and lockwashers.

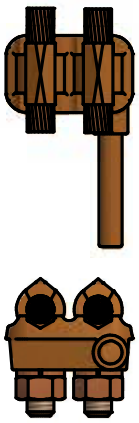

Q2TE

Material

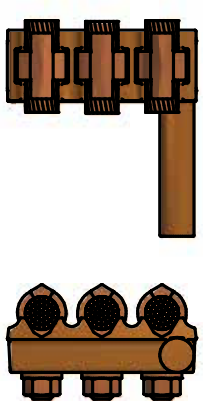

Copper Alloy

Hardware

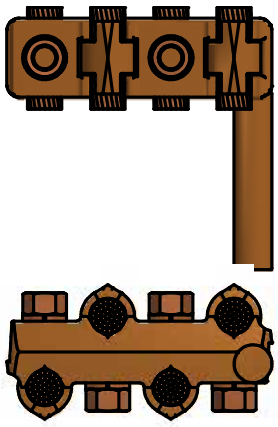

Everdur nut and lockwashers.

DOSSERT®

TYPE HSC, HS2C, HS3C

Copper Stud Connector for Cable or Wire. HSC connects one conductor to a stud, HS2C connects two conductors to a stud, and HS3C connects three conductors to a stud.

A HERCULON™ variable type connector for joining a cable or a wire to a threaded stud. The stud end of the connector can also be furnished to accommodate a plain stud or pipe.

Material

Copper Alloy

Hardware

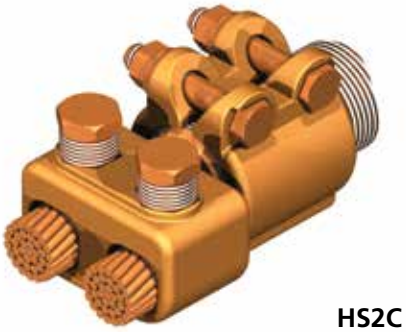

Everdur bolts, nuts and lockwashers

Notes

- Other sizes of studs and various threads to the inch can be promptly furnished.
- For two 500 MCM cables to a .75" T16 stud order HS2C75-50-T16
- For three 500 MCM cables to a .75" T16 stud order HS3C75-50-T16
- For two 500 MCM cables to a .75" T0 stud order HS2C75-50-T0

DOSSERT®

TYPE NP, NF
Copper Contact Nuts

Contact nuts for clamping flat bus bars or terminal pads to threaded studs. For greater contact surface flange nuts, Type NF, provide additional area. Designed to conduct the full rated load of the stud. Large face areas offer a high electrical contact efficiency. All nuts are machined to a high percent full thread to effect maximum thread bearing area.

NP

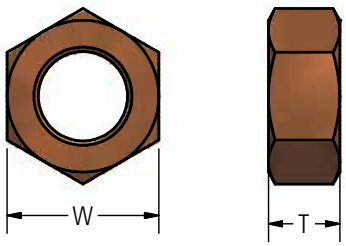

NF

Material

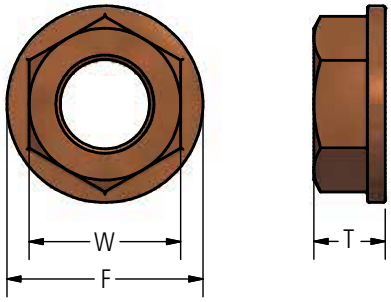

Copper Alloy

Note

- Other numbers of threads per inch can be furnished for any given stud diameter upon specification.

TYPE SCX, S2CX

Copper Stud Connector for Cable

SCX connects one cable to one stud and S2CX connects two cables on one stud. A variable conductor stud connector which takes a wide range of cable sizes in line or in a 90° position. The reversible cap permits optimum clamping for all cable sizes within the assigned ranges. In addition, one flat surface on SCX can be machined to accommodate flat bar conductors. SCX can be furnished upon request in type SCX-N with bolt holes to accommodate NEMA standard bar drilling.

DOSSERT®

TYPE SP, SP-90

Stud Connector For Tube To Threaded Stud

A connector for joining a tubular bus conductor to a threaded stud. The stud end can be threaded to any specified number of threads per inch or bored for an unthreaded stud.

SP

Material

Copper Alloy

Hardware

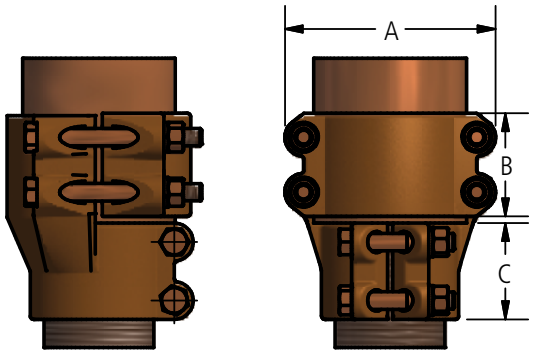

Everdur bolts, nuts and lockwashers

Notes

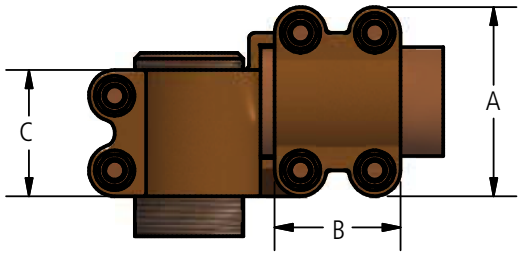

- For Stud threads not listed, add suffix 'T' and the number of threads per inch to category number. Ex: For a 1 1/8" stud to a 1 1/4" bus, 90°, without threads order SP112-125-T0-90.
- For a 1 1/8" stud to a 1 1/4" bus, straight , without threads, order SP112-125-T0.

DOSSERT®

TYPE SX-A, SX-A-90

Stud Expansion Connector for Pipe

Both SX-A and SX-A-90 connect copper stud to aluminum bus.

An expansion stud connector for joining a tubular bus to a threaded or unthreaded, transformer or terminal, stud. The movements of the conductors caused by thermal expansion and contraction or settling foundations are efficiently absorbed by the flexible braided linkages. Type SX is furnished with an alignment guide for connections where axial alignment is required.

SX-A

Material

Stud - Copper Alloy

Bus - Aluminum Alloy

Hardware

See image

Notes

For a 90 degree stud connector add -90 to the Catalog Number. EX. For at 1"-T14 stud to 1in SPS connector with 90 degree stud connector order: SX100-100A-T14-90

TYPE SX, SX-90, SXP

Stud Expansion Connector for Pipe

SX

An expansion stud connector for joining a tubular bus to a threaded or unthreaded transformer stud. The movements of the conductors caused by thermal expansion and contraction or settling foundations are efficiently absorbed by the flexible braided linkages. Type SX is furnished with an alignment guide for connections where axial alignment is required.

SXP does not have an alignment guide.

Material

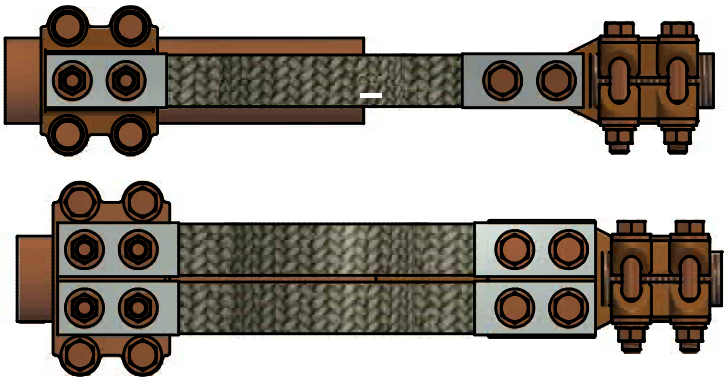

Copper Alloy

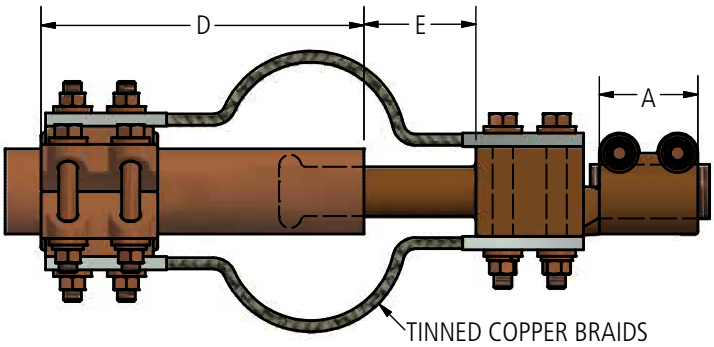

Hardware

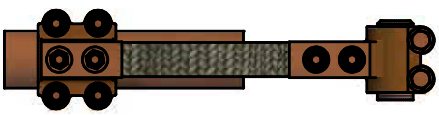

Everdur bolts, nuts and lockwashers

Notes

- For a 90 degree stud connector, add -90 to the Catalog Number. EX. For a 1"-T14 stud to 1" SPS connector with 90 degree stud connector, order: SX100-100-T14-90.
- SXP has no alignment guide. EX. For a 1"-T14 stud to 1" SPS connector with no alignment guide connector, order: SXP100-100-T14.
- For Tin Dipped, add -SN to the Catalog Number: SX100-100-T14-SN.
- For Laminates in place of Braids, add "L" to the Catalog Number: SXL150-125-T12.
- For stud threads not listed, add suffix "T" and the number of threads per inch to catalog number. EX. For a 1" stud to 1" SPS connector with no threads order: SX100-100-T0.

Copper U-bolt Stud Connector For Cable

Material

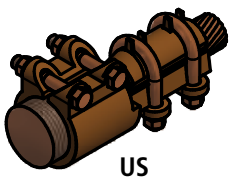

Copper Alloy

Hardware

Everdur bolts, nuts, lockwashers, and U-bolts

Notes

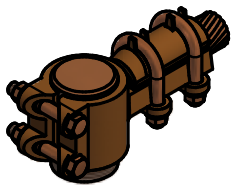

- Can also be readily furnished for plain unthreaded studs.
- For a 90 degree add -90 and for double connector change 'US' to 'U2S'
- For a 1/2" stud, 2/0 Str cable, and 90 degree angle order: US50-13-T13-90
- For a 1/2" stud, two 2/0 Str cable, and 90 degree angle order: U2S50-13-T13-90
- For a 1/2" stud, two 2/0 Str cables and no thread order: U2S50-13-T0

DOSSERT®

TYPE CFT

Tee Connector For Cable To Flat Bar Tap

A cable run to flat bar tap tee connector. Designed for one 1/4 inch bar, Fig. 1 and for two ¼ inch bars spaced 1/4 inch apart, Fig. 2.

Material

Copper Alloy

Hardware

Everdur-bolts, nuts, and lockwashers.

Notes

- Can also be furnished upon specification to accommodate additional bars, other bar spacing, and other drilling or any combination thereof.
- Pad size and drilling can also be furnished to conform to NEMA standards.

DOSSERT®

TYPE D

Copper Screw Terminals For Cable To Flat

An inexpensive lug of rugged construction yet very compact. These lugs are suitable for all types of installations and are completely reusable. Acceptance of wide range of conductor sizes limits the need for large stock.

Material

Copper Alloy

Hardware

Zinc Plated Steel Screw

Note

Also available with Hex head set screw. Add (H) to catalog number. Example D35H.

DOSSERT®

TYPE HHL, HHL-A

Copper Heavy Duty Terminal for Cable

A variable terminal connector whose double clamping element provides for additional secureness where heavy duty service is required. The simplicity of installation and rugged design make this connector a serviceable unit. Made of high conductivity cast copperalloy and equipped with bronze pressure screws and clamping members. HHL-A has cap screws instead of hex bolts for clapping the conductor.

Material

Copper Alloy

Hardware

Zinc Plated Steel Screw

Note

For a 350MCM cable to a 2 NEMA pad with cap screws order: HHL350-2N-A

DOSSERT®

TYPE HL, HLA-45, HLA-90

Copper Set Screw Terminal. HL conductor runs parallel to the pad, HLA45 the pad is at a 45° angle to the conductor, and HLA90 the pad is at a 90° angle to the conductor. HL-A has a set screw instead of the hex bolt.

The HERCULON™ Lug is designed for quick and efficient installation. Its compact rigid structure makes it especially adaptable for assembly in inaccessible quarters. A high compressive clamping force on the cable conductors plus the additional gripping action of special serrated bearing areas makes for high electrical contact efficiency and pull out strength.

HL

HL-A

Material

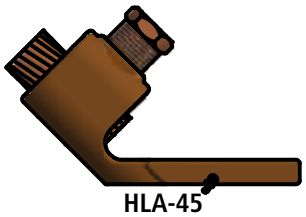

Copper Alloy

Hardware

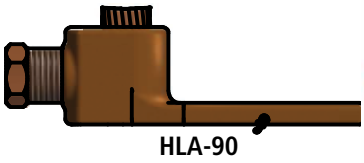

Everdur pressure bolt

Note

For set screw instead of bolt, add "A" to end of part number. Example: HL1-1A

TYPE HLB, H2LB

A side entrance HERCULON™ variable type terminal for connecting wire or cable at right angles to terminal bar. Easily installed with any ordinary wrench. Serrated pressure bar confines conductor making for high contact efficiency. Its rugged design permits it to be re-used over and over. H2LB is for connecting two cables at right angle to terminal bar.

DOSSERT®

TYPE HLS, HLSC

Copper Terminal for Cable to Stud Posts

An efficient and easy to install variable type terminal for connecting wires or cables to studposts of electrical equipment. The wire or cable connector is securely clamped in position by merely tightening the pressure screw. The full bearing length of cable is clamped by means of an internal pressure pad curved to fit the conductor.

TYPE PFTS

Pipe To Flat Bar Tee Connector

A tee connector for joining a single bar tap conductor to a tubular bus run. Made of high conductivity cast copper alloy.

Material
Copper Alloy

Hardware
Everdur bolts, nuts, and lockwashers.

Notes

- For finish on both surfaces, add suffix "F" to end of catalog number.
  EX: PFTS100-1-2NF
- For tin plating add suffix "-SN" to end of catalog number.
  EX: PFTS100-1-2N-SN

DOSSERT®

TYPE QLB, QLLB

Copper Variable Entrance Angle Terminal

An extremely versatile terminal which will accept a wide range of conductor sizes. Connector is constructed so as to allow cable entrance from various angles and to provide strong clamping pressure at points of contact.

QLB

QLLB

Material

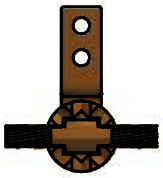

Copper Alloy

Hardware

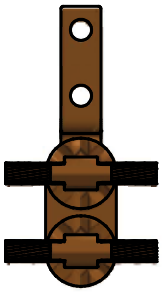

Everdur bolts, nuts and lockwashers

Notes

- Contact pads furnished to any specification of drilled or undrilled hole size and spacing.
- For one cable variable terminal for a 500mcm cable, only one "L" should be placed in the catalog number, EX: QLB50-4N
- For two cable variable terminal for a 500mcm cable, place two "L"s in the catalog number, EX: QLLB50-4N
- For tin plating add suffix "-SN" to end of catalog number, EX: QLLB50-4N-SN

DOSSERT®

TYPE SCB-90H, SCB-90V

Copper Stud Connector To Flat Bar

A single bar connector for connecting bar conductors at right angles to a threaded or smooth stud. Furnished complete with all clamping bolts.

SCB-90H

Material

Copper Alloy

Hardware

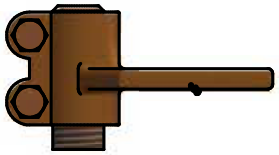

Everdur bolts, nuts and lockwashers

Note

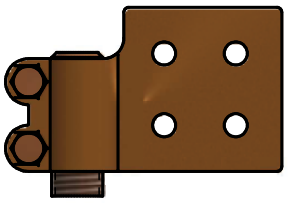

Also available for other sizes of studs and bar arrangements.

SCB-90V

SCB-90H

SCB-90V

DOSSERT®

TYPE SCB-F

Stud Connector to Flat Bar Type

A single or multi-bar connector for connecting one or more flat bars to a threaded or plain stud. Can be furnished to accommodate stud diameters or threads per inch other than listed below.

Material

High Conductiviity Cast Copper Alloy

Hardware

Everdur bolts, nuts and lockwashers

Note

For Tin Plating, add suffix "-SN" to end of catalog number. EX: SCB200-1/2F-4N4-T12-SN

DOSSERT®

TYPE T2CVH, T2CVHA-45, T2CVHA-90

Terminal Connector

A heavy duty variable clamp type terminal for connecting a cable to a flat bar bus. Each size terminal accommodates a wide range of cable sizes. Designed to carry the full rated load of the maximum conductor without overheating. Contact pads other than those listed below can be promptly furnished to any specified size or drilling. The variable type terminal exhibits its advantage in that one connector will accommodate a number of cable sizes. This minimizes greatly the problem of stocking various sizes of connectors and the errors which occur in specifying connectors for specific cable sizes.

T2CVH

Material

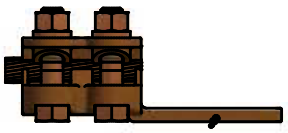

Copper Alloy

Hardware

Everdur bolts, nuts and lock washers.

Notes

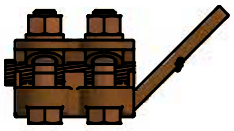

- For tin plating add suffix (SN) to catalog number. Ex: T2CVH50-2N-SN
- For undrilled pads, add the suffix (U) to the part numbers. Ex: T2CVH50-2U
- For a 45° angle add -45, and for a 90° angle add -90.
  For an angled pad add an 'A' after TCVH.
  Ex: For 45° 2 hole NEMA pad to two 500MCM cables order: T2CVHA50-2N-45

DOSSERT®

TYPE TCX

Bar to Variable Cable or Pipe

TCX can be used as a tap or a terminal. A variable clamp type terminal or tap for connecting a cable or pipe to a flat bar bus. Each size accommodates a wide range of cable sizes.

Material

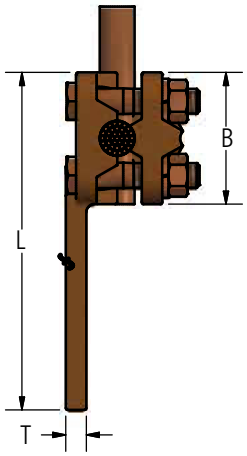

Copper Alloy

Hardware

Everdur-bolts, nuts, and lockwashers.

Note

For tin plating add "-SN" to the end of the catalog number.

TYPE TP, TPA-30, TPA-45, TPA-60, TPA-90

Copper Clamp Terminal for Tubular Bus to Flat

A bolted clamp type terminal for connecting standard pipe size tubular buses to flat surfaces.

TP

Material

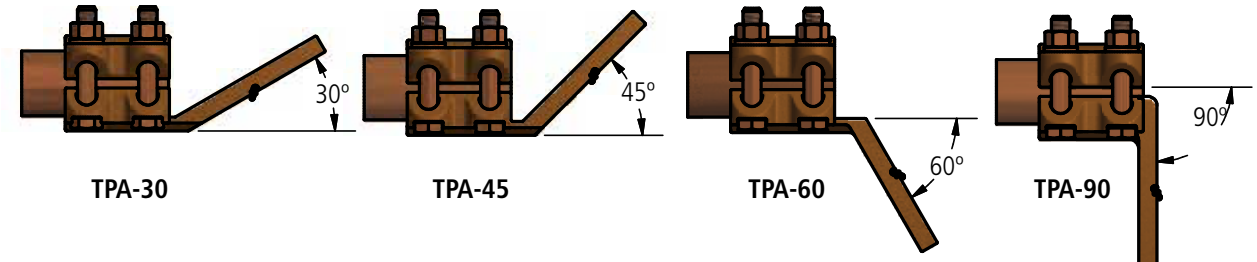

Copper Alloy

Hardware

Everdur-nuts, bolts and lock washers.

Notes

- Contact pads can be furnished to any specification of size undrilled or drilled to specified hole sizes and center to center dimensions.
- For Electro Tin Plate, add "-SN" to catalog number. EX: TP300-4N-SN
- For Angled Pad, add "A" to prefix and angle to catalog number. EX: TPA350-4N-60
- For Undrilled Pad, add "U" to pad size in catalog number. EX: TP350-4U

DOSSERT®

TYPE UL-90V
Copper Vertical Mouting Terminal

A vertical side mounting type terminal lug for connecting cables to flat bar busses. The side clamping feature provides clearance to enable terminal to be mounted well within the bus surface without interference of the U-bolts.

Material
Copper Alloy

Hardware
Everdur U-bolts, nuts and lockwashers.

Note
Contact pads can be furnished to any specification of size undrilled or drilled to specified hole sizes and center to center dimensions.

DOSSERT®

TYPE ULB, U2LB

U-Bolt Terminal Lug

Material

Copper Alloy

Hardware

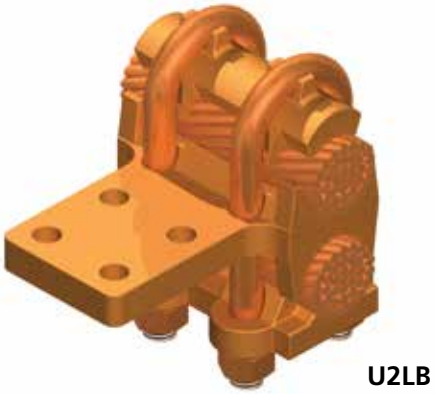

Everdur U-bolts, nuts, and lock washers.

Notes

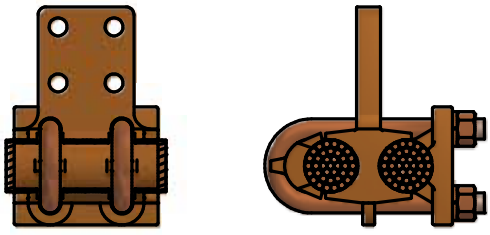

- For tin plating add "-SN" to end of catalog number. Ex: ULB13-2N-SN
- For a Two Conductor Side Entrance Terminal add a '2' in the UL catalog number. Ex: U2LB13-2N

DOSSERT®

TYPE ULI, UULI

Copper U-Bolt Variable Range Terminal

A single and double U-bolt type terminal. Each size accommodates a wide range of cable sizes. The inverted clamping member and the offset pad provides for contactmounting clearance when required.

ULI

UULI

Material

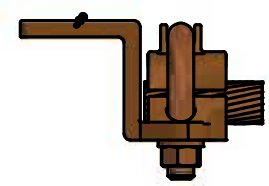

High Conductivity Copper Alloy

Hardware

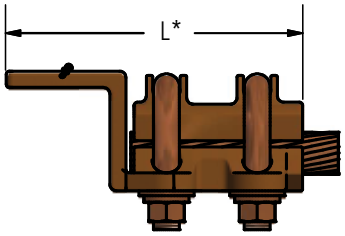

Everdur U-bolts, nuts and lockwashers.

Note

Contact pads can be furnished to any specification of size undrilled or drilled to specified hole sizes and center to center dimensions.

DOSSERT®

TYPE CST

Copper Compression Tee Connector For Cable To Cable

A tee connector with compression elements on both run and tap. Designed to make tap connections on a continuous run. Run member is U-shaped before installation and after compression the heavily tapered tabs conform to cable to produce a secure electrical and mechanical connection.

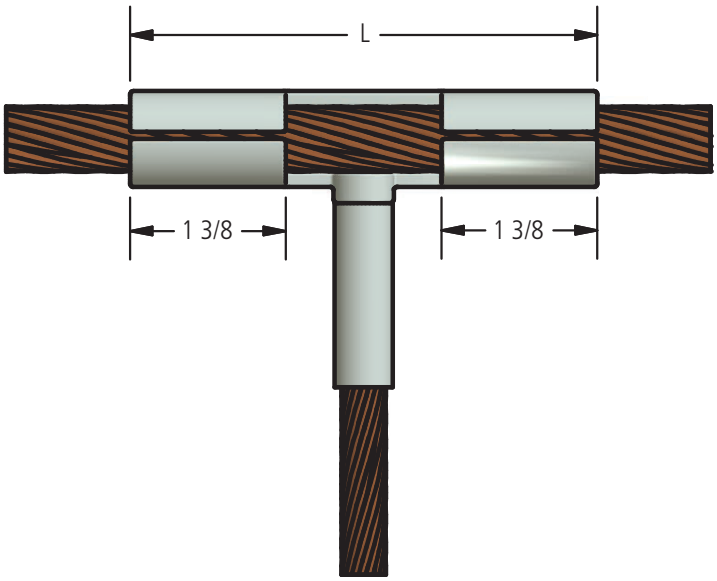

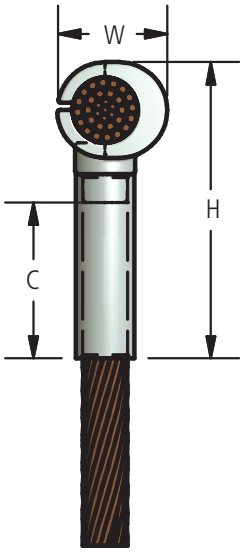

Material

Tin plated copper alloy

Note

Tool references furnished upon request.

DOSSERT®

TYPE DPC-SH1, DPC-SH2, DPC-SH-90

Cable Terminal

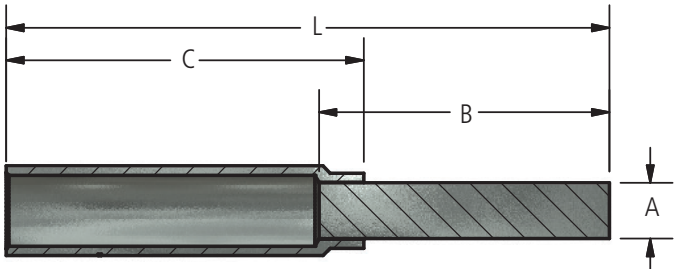

A compression seal plug for terminating a cable with a straight stud end. The cable receiving socket is provided with a shroud which makes a close fit over cable insulation. A weather seal for cable risers is provided by the shroud. Stud is specially bonded to cable socket element to form a single unit possessing high mechanical strength and high electrical conductivity. Made of pure copper and tin plated.

Material

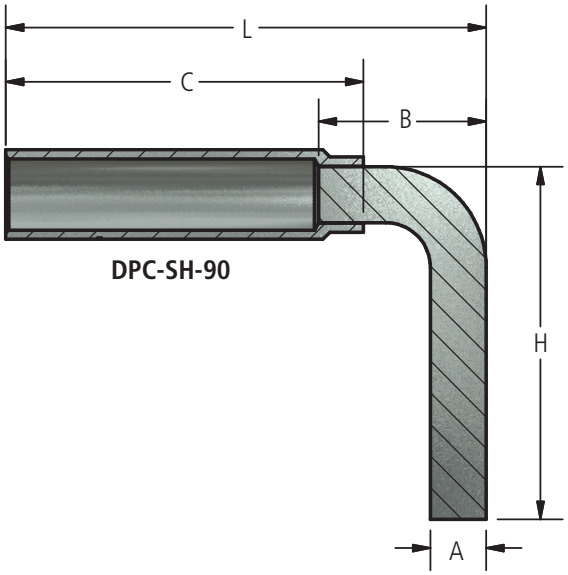

Copper Alloy Electro Tin Plated

DOSSERT®

TYPE DPL, DPLA-45, DPLA-90

Copper Long Barrel Compression Terminal
DPLA-45 is at an angle of 45° and DPLA-90 is at an angle of 90°.

A precision made compression terminal lug for a full range of conductor sizes with 1, 2 and 4 hole pads in the larger sizes. Conductor is secured by indenting the barrel with any standard compression tool made for electrical lugs.

Material

Tin plated high conductivity copper alloy

Notes

- Terminal pads can be drilled to custom hole sizes and spacing.
- For a 45° angle, add suffix "-45" to end of catalog number and an "A" in the catalog number. EX: DPLA2-1-45
- For a 90° angle, add suffix "-90" to end of catalog number and an "A" in the catalog number EX: DPLA2-1-90

DOSSERT®

TYPE DPLE-N

Copper Heavy Duty Terminal For Cable

A compression terminal lug designed to provide the necessary pad width for NEMA two-hole and four-hole standard drilling. The barrel element is made of high conductivity copper specially bonded to the cast copper alloy body. Competely tin plated for maximum resistance to corrosion. All sizes are designed to indentations in cable socket.

Material

Tin-plated Copper Alloy

Notes

- Add suffix (F) to catalog number for pad to be machined on both sides. Ex:DPLE150-4NF
- For an angled pad, add the desired angle to the catalog number: Ex: DPLE100-2N-15

DOSSERT®

TYPE DPLS

Copper Short Barrel Terminal

For connecting cable to flat contact. A short barrel compression terminal lug for a complete range of cable sizes from 6 str. to 2000 MCM. The short barrel feature enables terminal to be installed where space is at a minimum. An inspection aperture insures full insertion of cable. A generous entrance chamfer facilitates cable insertion. NEMA standard drilling and stud or screw spacing are identified by the letter "N" suffixed to catalog number.

Material

Tin plated copper alloy

Note

Terminal pads can be drilled to custom hole sizes and spacing. Angled pads also available, please contact the factory.

DOSSERT®

TYPE DPR
Copper Reducing Coupler

A Seamless reducing coupler for splicing two different sized cables end-to-end. The larger cable is inserted first and stops against the center of the connector where the small diameter portion begins. This insures that both conductors are at the proper depth before crimping. Entrance chamfers are provided to aid in cable insertion. Accepting a wide range of cable diameters, connectors are stamped with full catalog numbers and conductor sizes for quick identification.

Material

Tin plated copper alloy

DOSSERT®

TYPE LCA
Compression Terminal Lug

Material
Pure Copper Tubing

Note
- Barrel lined with Silicon Carbide Powder. For a tin plating add suffix 'SN' to catalog number. Available with solder sealing add suffix 'MT' to catalog number.
- For a 3/0 STR cable with a 2 hole terminal pad, tin plated use LCA17-2N-SN.

INSTALLATION TOOL REFERENCES

The following tool references list a number of existing tools which can be used to install all connectors listed in catalog whose tabular listing is foot-noted to refer to pages 246 and 247. For any given cable size, irrespective of connector type, the proper tool and dies (if required) can be quickly selected.

230 kV Aluminum Bolted Bus Supports

DOSSERT®

TYPE 16300, 16500, 16700

Cable Support

The 16300, 16500 and 16700 series supports are designed for mounting stranded aluminum or ACSR conductors. New cable support reduces stock with extended range taking capabilities. These supports can be used for two or four conductors and the cables can be oriented in any angle from the base. Three supports provide cable range from 4/0 to 3500 MCM. Available in 3", 5" and 7" bolt circles.

Material

Aluminum Alloy

Hardware

Yellow anodized aluminum nuts, bolts and lockwashers.
Galvanized steel mounting hardware included.

230 kV Aluminum Bolted Bus Supports

DOSSERT®

TYPE 31400

Bus Support Slip Or Fixed

The 31400 Series support is designed to provide reliable mounting for integral web channel bus (IWCB) conductors. Support may be used for tight fit or slip fit applications by rotating keeper. Assembly includes four galvanized steel flat head cap screws for mounting on insulator.

Material

Aluminum Alloy

Hardware

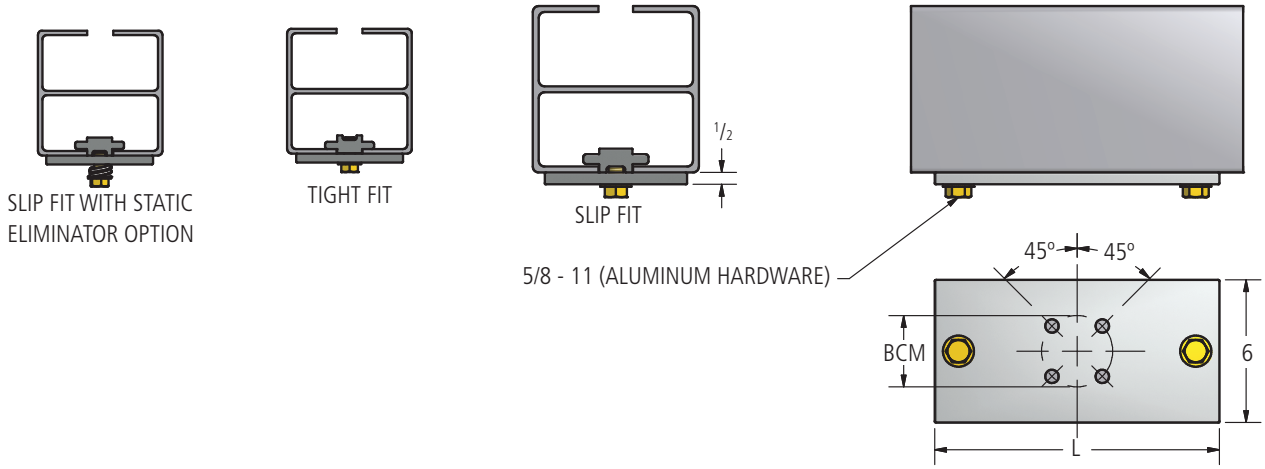

Yellow anodized aluminum bolts, nuts, and lockwashers.
Galvanized steel mounting hardware included.

Ordering Instructions

Step 1: Determine the catalog number based on the IWCB being used and the bolt circle mount (BCM).

Step 2: For slip application, add 'AC'. For Fixed application, leave blank. Ex: A bus support for 4"x 4" IWBC with a 5" BCM for a slip application, the complete catalog number is: 31444-5AC

Step 3: Build Catalog Number
Slip or Fixed Application + Catalog Number

DOSSERT®

TYPE CBP-AA

Two Unit Bus Support For Cable

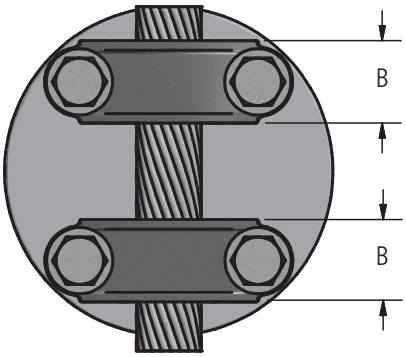

A two unit, four piece cable support which mounts conductor to cap of insulator. A single unit for light service can be supplied on request. Clamp is furnished with cap screws for threading into tapped holes of insulator.

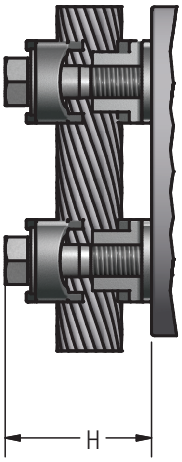

Material

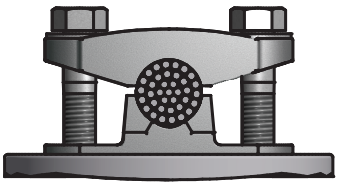

Aluminum Alloy

Hardware

Galvanized steel bolts and lockwashers.

DOSSERT®

TYPE CSP-AA, C2SP-AA

One or Two Pipe Cable Bus Support

Pipe or Cable Bus Support for two cables or pipes.

Material

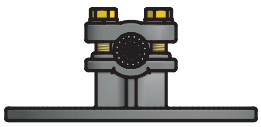

Aluminum Alloy

Hardware

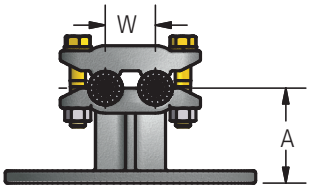

Yellow anodized aluminum nuts, bolts, and lockwashers.
Galvanized steel base mounting hardware is included.

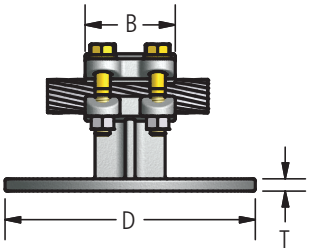

Notes

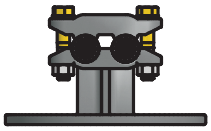

1. For a Double Cable Bus Support add a 2 after 'C'.
2. For two 300 MCM cable, with a 3 in Bolt Circle C2SP87-3-AA.
3. For base mounting dimensions and hardware see page 3 in the general catalog index.

DOSSERT®

TYPE CVSP-AA

Cable Bus Support

Base mounting holes are slotted to allow for misalignment in insulator stack. Used for both cable and pipe applications. Reversible for covering a broad range of conductor sizes.

Material

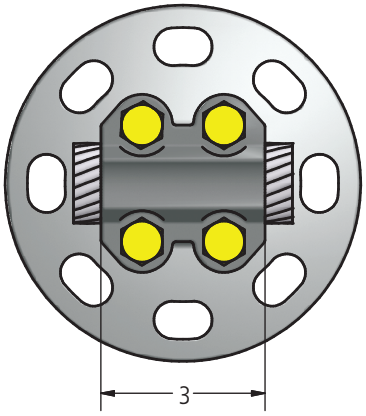

Aluminum Alloy

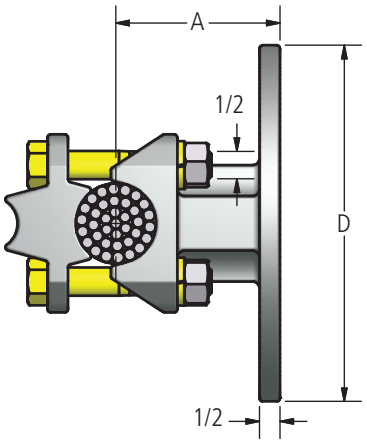

Hardware

Yellow anodized aluminum nuts, bolts, and lockwashers.
Galvanized steel base mounting hardware is included.

Note

For base mounting dimensions and hardware see page 3 in the general catalog index.

TYPE PB-AA, PBP-AA

Bus Support With Two Unit Caps

A two unit cap clamping bus support for mounting on insulator bolt circle. Type PB clamps bus directly to insulator while type PBP is provided with two independent matching bus saddles. Available for either cap or base mounting. Unless otherwise specified supports are furnished for cap mounting as illustrated.

PB-AA

PBP-AA

Material

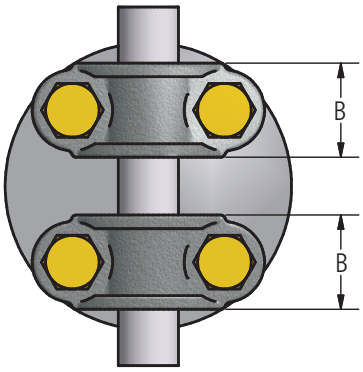

Aluminum Alloy

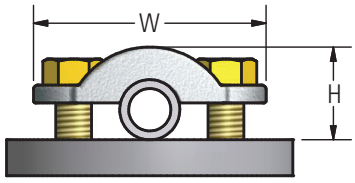

Hardware

Yellow anodized aluminum bolts, nuts, and lockwashers.

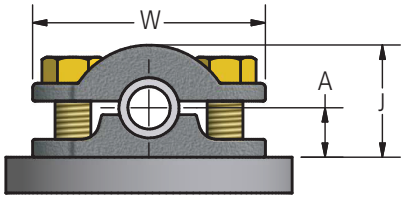

Note

For a 1" SPS pipe, 3" bolt circle, and saddle order PBP100-3-AA.

TYPE PSC-AA

Pipe Bus Support Coupler

A bus support coupler for joining and supporting two tubular buses on a post type insulator. Designed for a high resistance to impact or sustained cantilever and torsional stresses. Nuts and bolts are furnished for base mounting.

Material

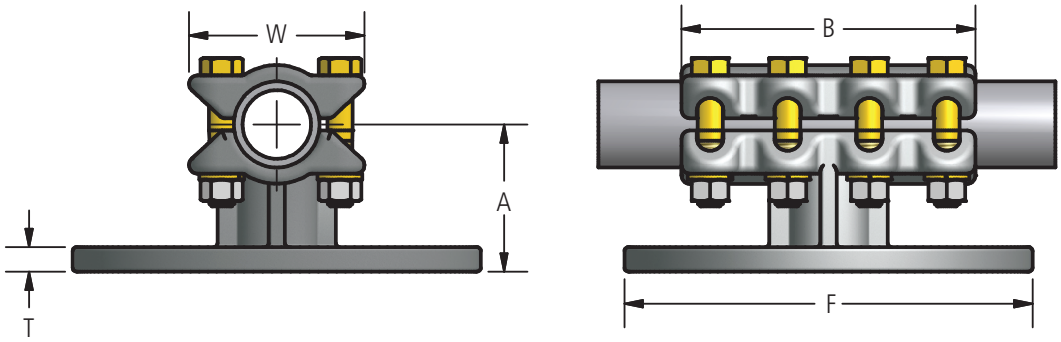

Aluminum Alloy

Hardware

Yellow anodized aluminum bolts, nuts, and lockwashers.

Note

For base mounting dimensions and hardware see page 3 in the general catalog index.

TYPE PSDC-AA

Bus Support, Pipe, Slide or Tight Fit

A bus support coupler for joining and supporting two tubular buses on a post type insulator. Designed for high resistance to impact and cantilever and torsional stresses.

Material

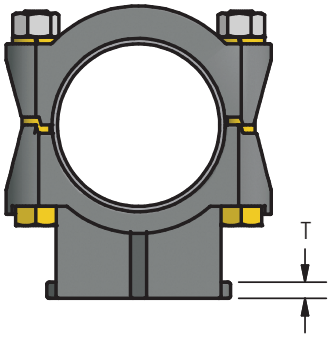

Aluminum Alloy

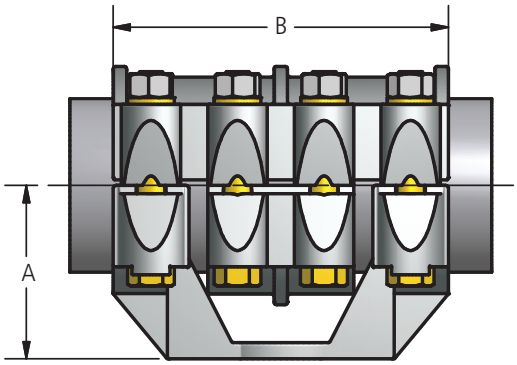

Hardware

Yellow anodized aluminum nuts, bolts and lockwashers.
Galvanized steel mounting hardware included.

Note

For base mounting dimensions and hardware see page 3 in the general catalog index.

AFL's Dossert® product line offers a wide range of substation accessories in low voltage up to 765 kV applications in bronze or aluminum materials.

230 kV Aluminum Bolted Bus Supports

DOSSERT®

TYPE PSRE-AA

Low Mounting Variable Bus Support for Cable/Pipe

A cost effective low mounting variable bus support clamp. The wide range of conductor sizes accommodated by each clamp size minimizes the number of clamps to cover a given range of bus sizes.

Material

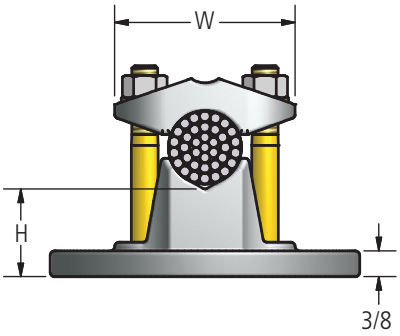

Aluminum Alloy

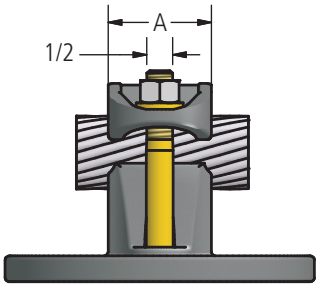

Hardware

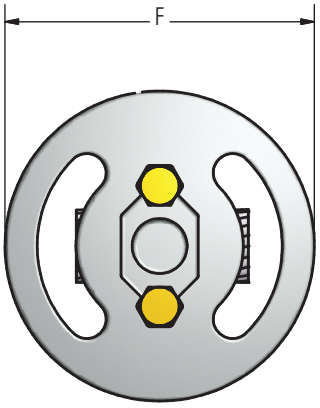

Yellow anodized aluminum nuts, bolts, and lockwashers.
Galvanized steel base mounting hardware is included.

Notes

For base mounting dimensions and hardware see page 3 in the general catalog index.

TYPE PSS-AA, PSS-CH-AA

Pipe Bus Support Slide or Tight Fit

A high strength aluminum support for securing a tubular bus to a post or pedestal type insulator. Designed with a high resistance to impact and sustained cantilever and torsion stresses. Entire unit is non-magnetic and corrosion resistant. Nuts and bolts are furnished for base mounting or slotted mounting. Reversible cap permits rigid or slip fit on conductor.

PSS-AA

PSS-CH-AA

Material

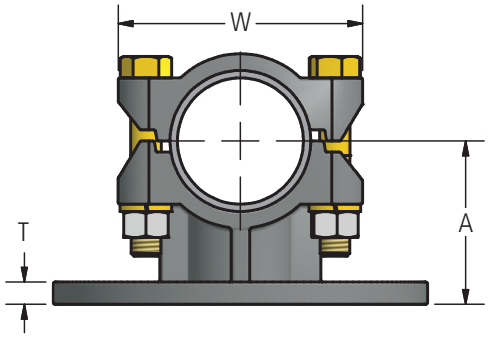

Aluminum Alloy

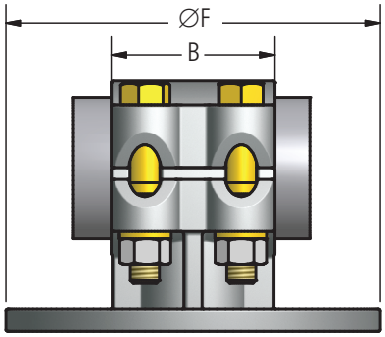

Hardware

Yellow anodized aluminum bolts, nuts, and lockwashers. Galvanized steel base mounting hardware is included.

Note

Specifications are subject to change without notice.

TYPE PSSR-AA, PSSR-CH-AA

Tubular Bus Support

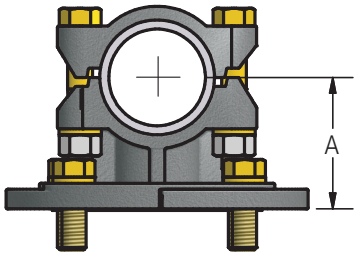

An aluminum support for securing a tubular bus to a post or pedestal type insulator. Fully adjustable to any angle within a complete circle (360°) with the advantage of four bolts maintaining angular setting as well as mounting pressure. Reversible cap permits rigid or slip fit on conductor. Unless otherwise specified cap screws are supplied.

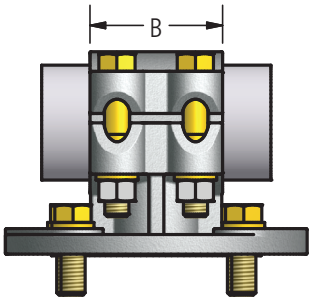

Material

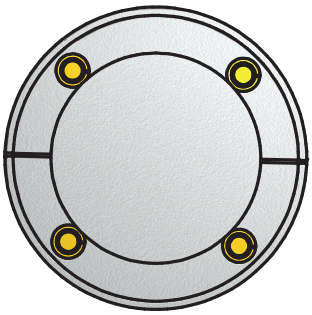

Aluminum Alloy

Hardware

Yellow anodized aluminum bolts, nuts, and lockwashers.
Galvanized steel base mounting hardware is included.

AFL

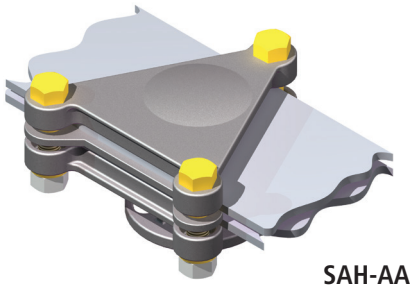

230 kV Aluminum Bolted Bus Supports

DOSSERT®

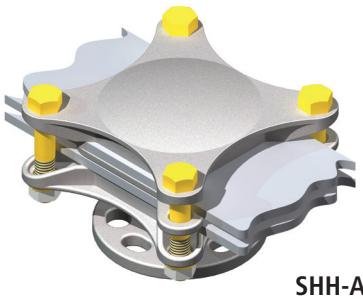

TYPE SAH-AA, SHH-AA

Horizontal Bus Support For Flat Bus Bars

A horizontal bus support for supporting one or more flat bus bars in a horizontal position. The following supports do not include spacers. The Double Group Type includes a single wide spacer only.

SAH-AA

SHH-AA

Material

Aluminum Alloy

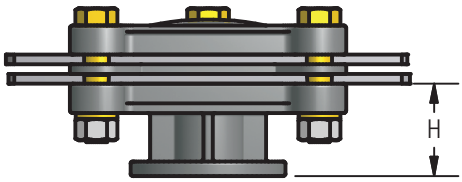

Hardware

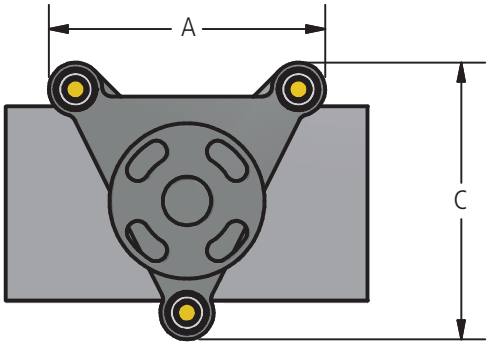

Yellow anodized aluminum nuts, bolts, and lockwashers.
Galvanized steel base mounting hardware is included.

Note

For more than 2 bars supported; follow the bolt circle number with number of bars to be supported. For example for a 4 inch width bus and a 5 inch bolt circle with 4 bars to be supported order: SAH4-5-4-AA

For bar spacing greater than 1/4" see page 11 for spacers.

230 kV Aluminum Bolted Bus Supports

DOSSERT®

TYPE XBC-AA

Aluminum Bus Support Coupler

A bus support coupler is designed to conduct the full rated load of the tubular buses, and at the same time permit free axial movement of each bus member. The shackle type fitting allows slight angular deviation of the buses from the horizontal position where they cannot be kept on a true plane.

Material

Aluminum Alloy

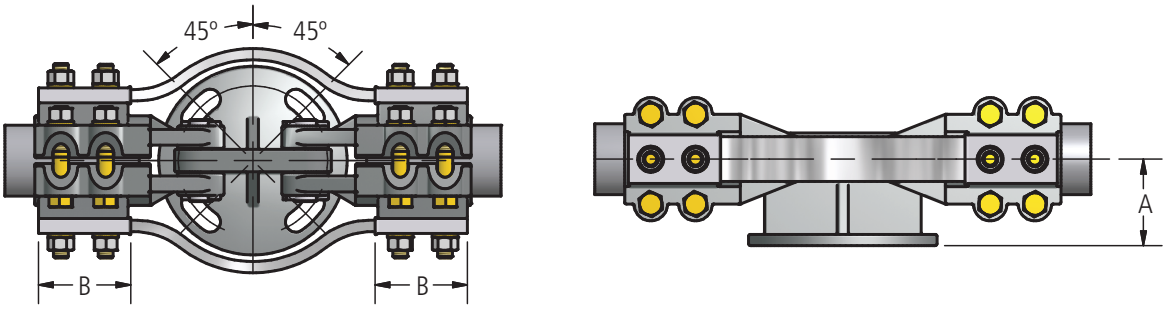

Lamination Material

Pure Aluminum

Hardware

Yellow anodized aluminum nuts, bolts and lockwashers.
Galvanized Steel mounting hardware included.

For base mounting dimensions and hardware see page 3 in the general catalog index.

230 kV Aluminum Bolted Bus Supports

DOSSERT®

TYPE XBCW-AA

Expansion Bus Support

Expansion support is designed to compensate for expansion and contraction during long bus runs. Laminated straps provide for 1.4"of expansion or contraction for pipe sizes 3/4" through 1-1/2" NPS. For pipe sizes 2" through 6" NPS, the straps allow for expansion or contraction of 2.6".

Material

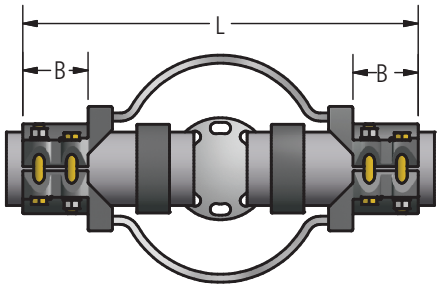

Aluminum Alloy

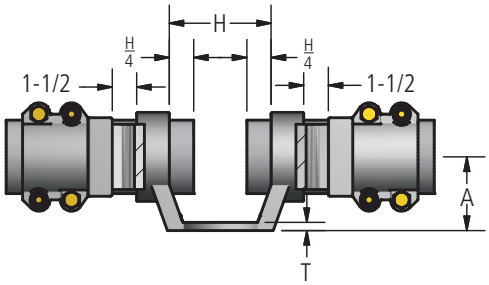

Hardware

Yellow anodized aluminum bolts, nuts, and lockwashers.
Galvanized steel base mounting hardware is included.

Notes

For base mounting dimensions and hardware, see page 3 in the general information section.

230 kV Aluminum Bolted Couplers

DOSSERT®

TYPE BCX-AA

Variable Cable Tee Tap and Straight Connector

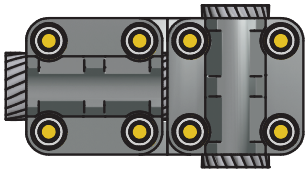

A clamp type tee connector, or reducer connector for joining two cables. This connector allows for multiple applications, and the variable cable tap and coupler accepts a wide range of conductor sizes. High conductivity Aluminum alloy body plus well balanced conductive and contact areas make for cool operation under all load conditions

Material

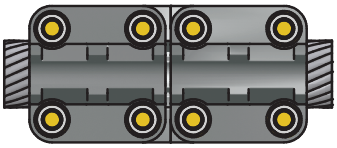

Aluminum Alloy

Hardware

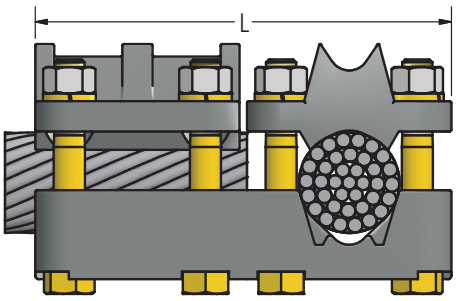

Yellow anodized aluminum nuts, bolts and lockwashers.

230 kV Aluminum Bolted Couplers

DOSSERT®

TYPE RP-AA

Aluminum Reducing Clamp for Tubular Bus

A clamp type reducing coupler for connecting various sizes of standard pipe size tubular buses end to end. Contact surfaces are finished to provide a strong grip on the conductor and good electrical contact.

Material

Aluminum Alloy

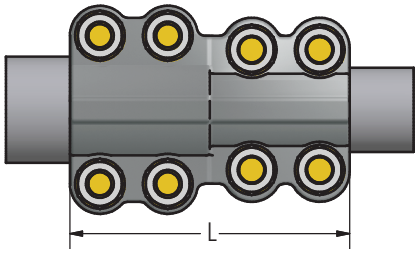

Hardware

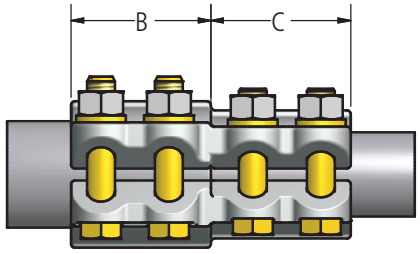

Yellow anodized aluminum nuts, bolts and lockwashers.

230 kV Aluminum Bolted Couplers

DOSSERT®

TYPE RPCV-AA

Aluminum Pipe to Cable Coupler

A pipe to cable coupler which takes a wide range of cable sizes on the cable clamping member. All clamping members act independently.

Material

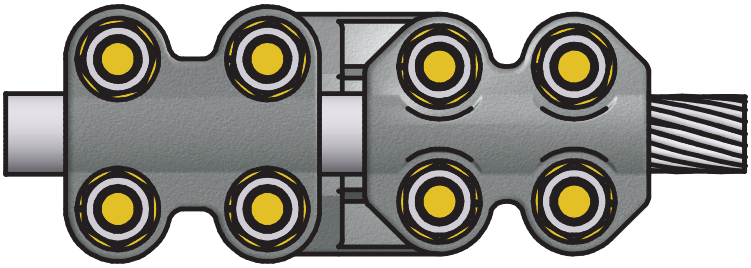

Aluminum Alloy

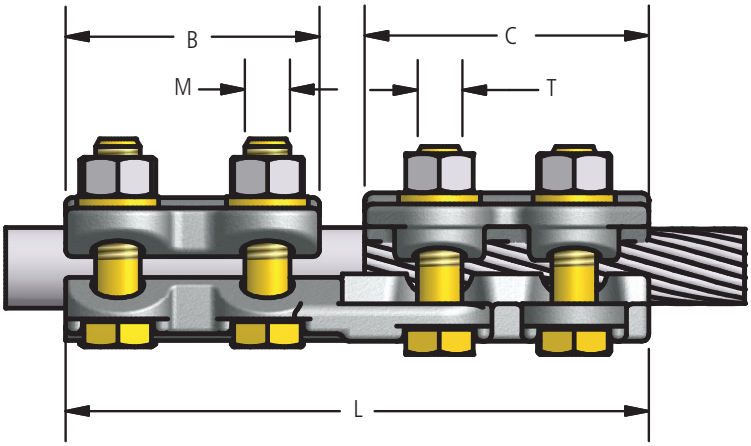

Hardware

Aluminum nuts, bolts and lockwashers.

Notes

- For Electro Tin plate, add "-SN" to catalog number. EX: RPCV75-90-AA-SN
- For Grade Five Galvanized Steel Hardware add "-GS5" to catalog number. EX: RPCV75-90-AA-GS5
- For Stainless Steel bolts, lockwashers and Everdur nuts, add "-SSHBN" to catalog number. EX: RPCV75-90-AA-SSHBN

DOSSERT®

TYPE UK-AA

Aluminum U-Bolt Coupler

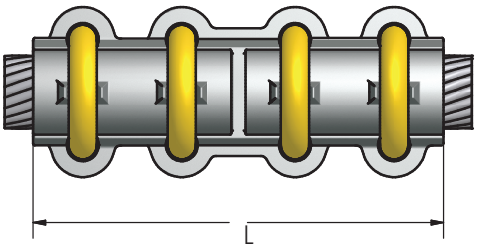

A U-Bolt type straight connector for coupling end to end two cables. Each half of the connector takes a wide range of cable sizes. Designed to provide high contact pressure on all cable sizes.

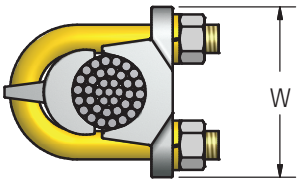

Material

Aluminum Alloy

Hardware

Yellow anodized aluminum nuts, U-bolts and lockwashers.

Ordering Information

DOSSERT®

TYPE UKR-AA

Aluminum U-Bolt Coupler Reducer

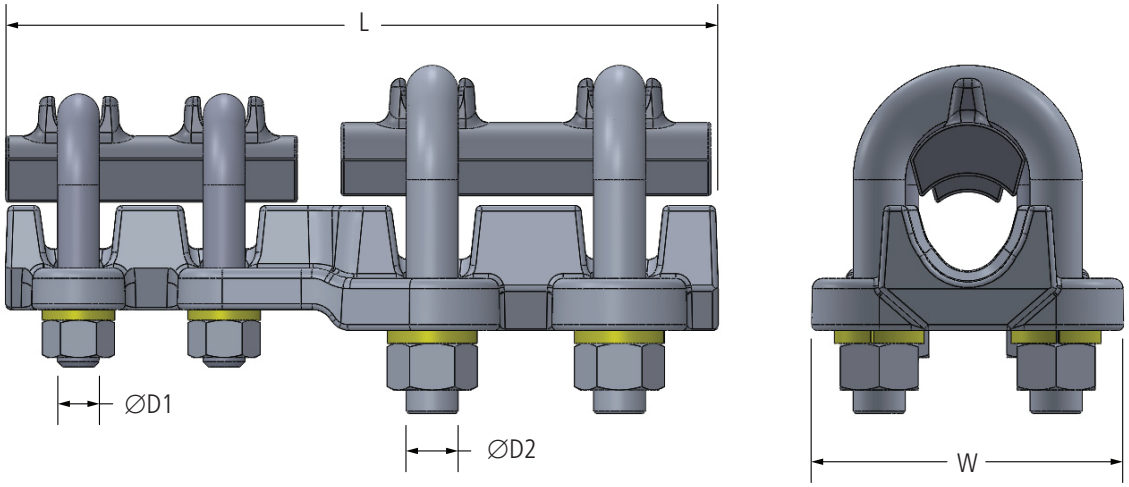

A U-Bolt type reducer connector for coupling end to end two unequal size cables. The variability of each half of the connector makes possible the combination of many sizes of cable.

Material

Aluminum Alloy

Hardware

Yellow anodized aluminum nuts, U-bolts and lockwashers.

230 kV Aluminum Bolted Couplers

DOSSERT®

TYPE UPK-AA

Reducing U-Bolt Pipe to Cable Coupler

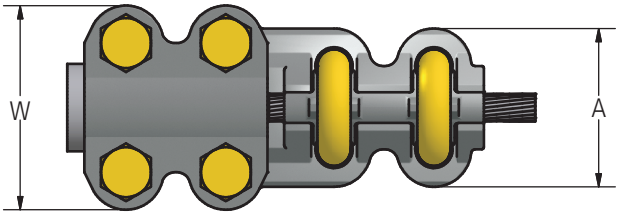

A U-bolt cable to pipe coupler. The variable U-bolt feature makes it possible for the connector for a given pipe size to accommodate several different cable sizes.

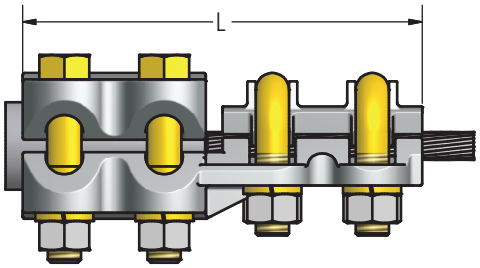

Material

Aluminum Alloy

Hardware

Yellow anodized aluminum nuts, bolts, U-bolts and lockwashers.

DOSSERT®

TYPE CI-AA SERIES

'Drive Fit' End Plug

'Drive fit' end plugs are designed to be forced into end of bus tube. End plug reduces electrostatic losses, seals out moisture and prevents birds from nesting in tube ends.

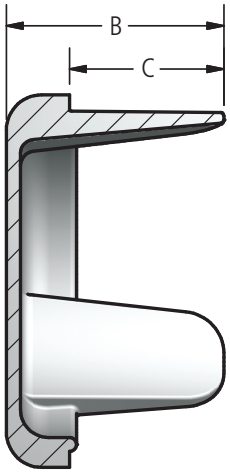

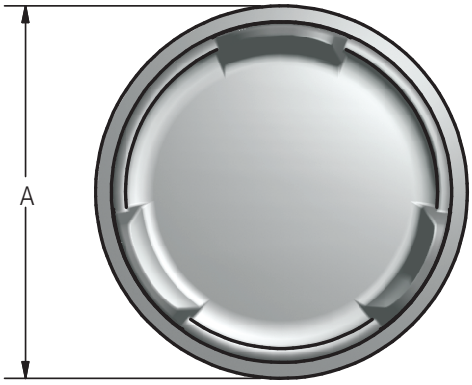

Material

Aluminum Alloy

Ordering Instructions

Step 1: Determine Catalog Number based on the bus conductor being used.
Example: End Plug for 4" schedule 40 bus pipe, the complete catalog number is: CI400-AA.

DOSSERT®

TYPE 16200

Internal Bolted End Plug

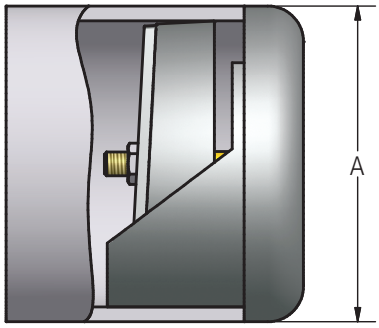

Bolted end plug is designed to wedge on inside of bus tube. End plugs reduce electrostatic losses, seal out moisture and prevent birds from nesting in tube ends. Bolted end plugs can be easily removed for modifications or future expansions.

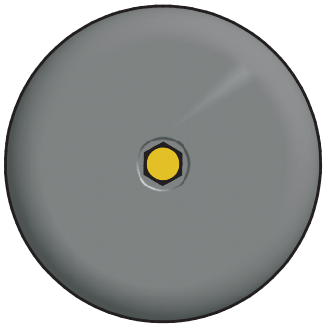

Material

Aluminum Alloy

Hardware

Yellow anodized aluminum bolts, nuts, and lockwashers.

DOSSERT®

TYPE CX-AA

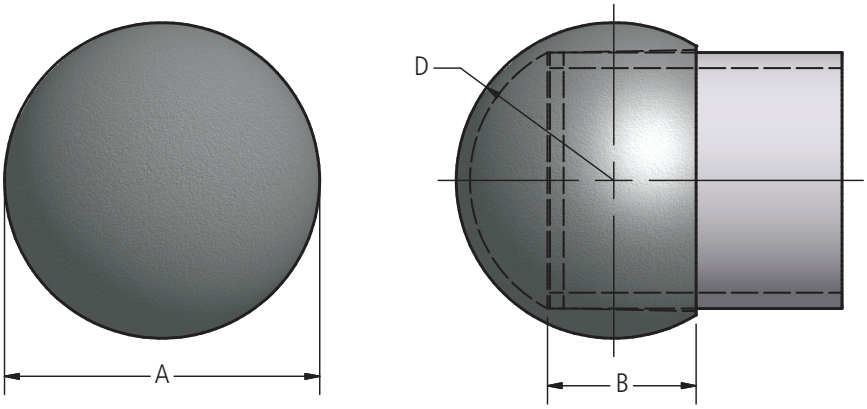

Aluminum Corona Bell For Tubular Bus

Corona Bell for sealing the exposed ends of standard pipe size tubular buses. Prevents rain and undue condensation from accumulating inside the bus. The smooth rounded surfaces reduce electrostatic discharge thereby aiding in the reduction of power transmission losses.

Material

Aluminum Alloy

DOSSERT®

TYPE SEC-AA, SEC-P-AA

Dead End Clamp

The SEC-AA is a straight dead end clamp with no pulling eye. The SEC-P-AA is a dead end clamp with a pulling eye.

SEC-AA

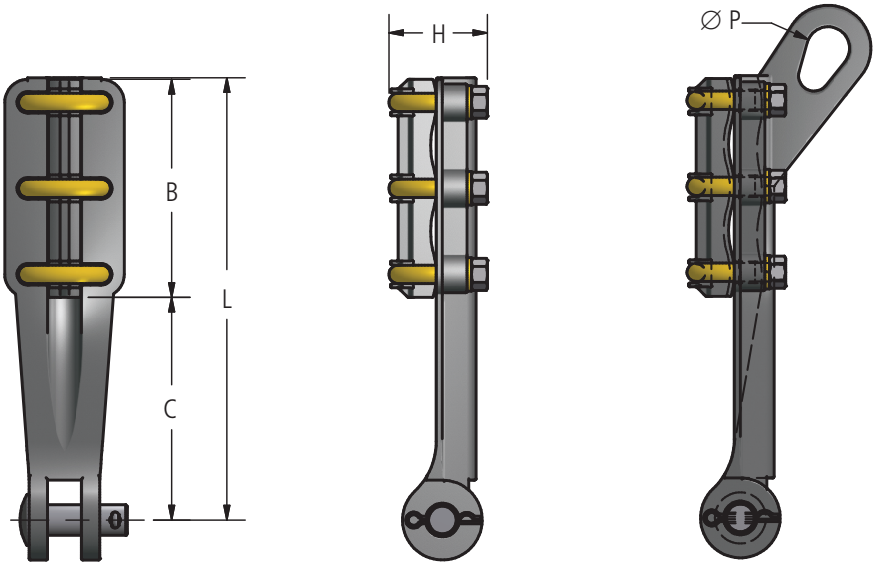

SEC-P-AA

Material

Aluminum Alloy

Hardware

Yellow anodized aluminum U-bolts, nuts and lockwashers.
Galvanized steel clevis pin, stainless steel cotter pin.

DOSSERT®

TYPE EP-AA, EP-30-AA, EP-45-AA, EP-60-AA

Clamp Type Elbow For Tubular Bus

A clamp type elbow for connecting standard pipe size tubular buses at 30, 45, 60, and 90 degree angles to each other. Conductor bearing areas are accurately machine finished with a special surface to provide good electrical contact and high pull-out strength.

EP-AA

Material

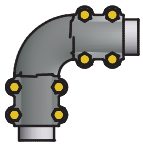

Aluminum Alloy

Hardware

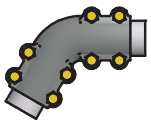

Yellow anodized aluminum bolts, nuts, and lockwashers.

Example

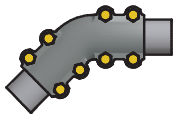

Example: For a 2" SPS Pipe, 30 degree angle, order EP200-30-AA.

DOSSERT®
TYPE DA-AA

Connectors For Bus Bar Alignment And Coupling

Ruggedly constructed, this connector permits the coupling or aligning of bus while securing high uniform contact pressure between surfaces.

Material

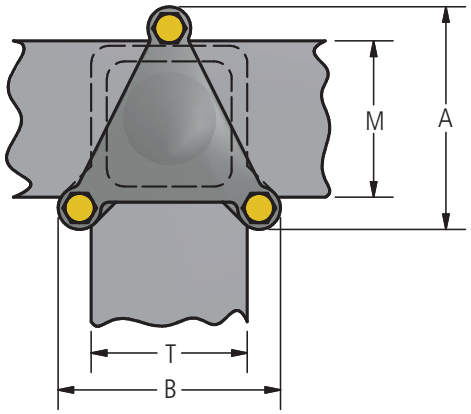

Aluminum Alloy

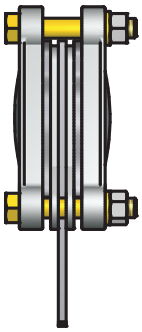

Hareware

Yellow anodized aluminum bolts, nuts and lockwashers.

Notes

Unless otherwise specified clamps are provided with bolts of sufficient length to clamp three 1/4" bars (3/4" total thickness). For proper length of bolts specify total number of 1/4" bars and spacers to be clamped or combined thickness or bar and spacer lay up to be clamped. For spacers see BS-AA page 277.

230 kV Aluminum Bolted Ground Clamps

DOSSERT®

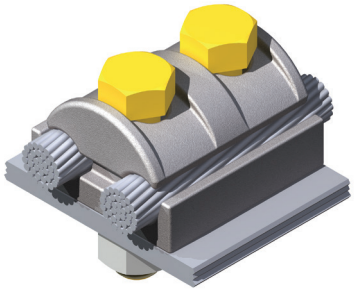

TYPE GA-AA, GAA-AA

Two Conductor Flat Bar Ground Clamp

A two piece ground clamp for clamping two wires or cables to a flat bar, plate, or structural member. Permits a slight range of variability in accommodating different size conductors. Bolts are retained by body to enable assembling with only one wrench. Bolts are supplied to clamp a 1/4 Inch bar.

GA-AA

GAA-AA

Material

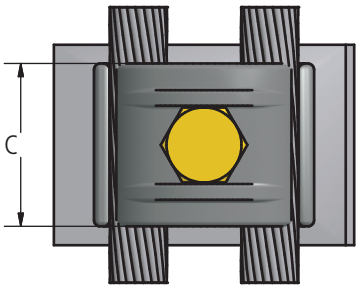

Aluminum Alloy

Hardware

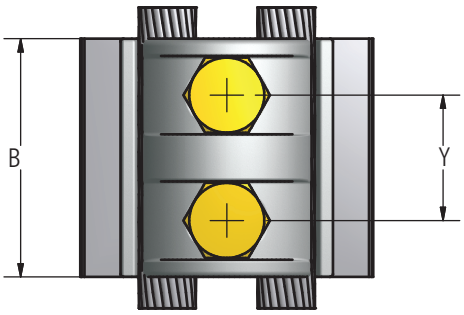

Yellow anodized aluminum bolts, nuts, and lockwashers.

Note

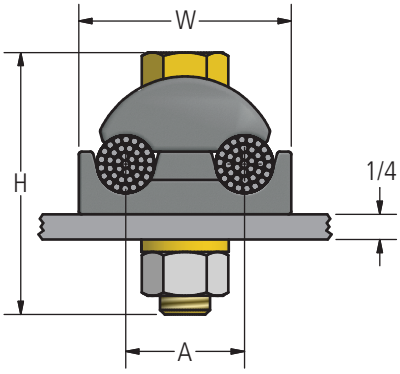

Bolt length supplied to clamp a 1/4" bar with maximum conductor in place. To obtain longer bolt add thickness of bar to the CAT.#. EX: For 1/2" thick bar order: GA13-T1/2-AA

DOSSERT®
TYPE GS-AA

Ground Clamp for 2 Cables to Perpendicular Pipe

Ground clamp is designed to clamp two cables to pipe.

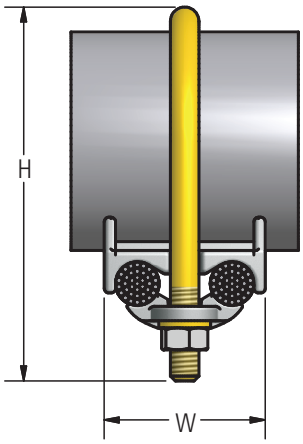

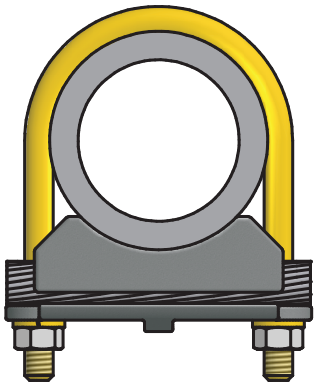

Material

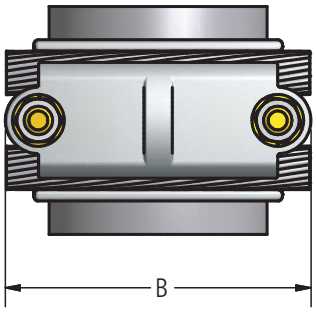

Aluminum Alloy

Hardware

Yellow anodized aluminum nuts, U-bolt and lockwashers.

DOSSERT®

TYPE AC100-AA

Parallel Connector

Single bolt type parrallel connector for joining two cables. Bolt retainer built into casting for one wrench installation.

Material

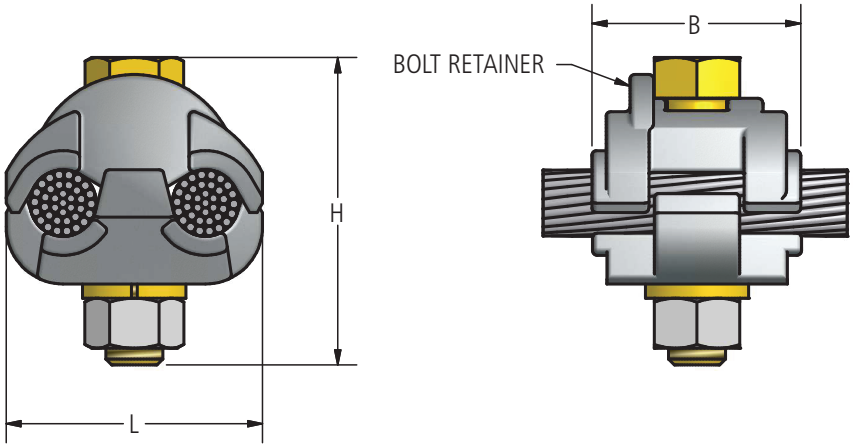

Aluminum Alloy

Hardware

ACA100 Series: Aluminum bolts, lockwashers and nuts
AC100 series: Galvanized steel bolts, lockwashers and nuts

Notes

1. For Stainless Belleville washers and add "-BW" to catalog number. EX: AC102-BW
2. For Electro Tin plate add "-SN" to catalog number. EX: ACA103-SN
3. For ALNOX prefilled connector add "-LP" to catalog number. EX: AC103-LP

230 kV Aluminum Bolted Parallel Clamps

DOSSERT®

TYPE PC-AA

Connector For Two Cables In Parallel

A clamp type connector for connecting two cable or wire conductors in parallel. Any combination accommodating unequal size cables is avaliable.

Material

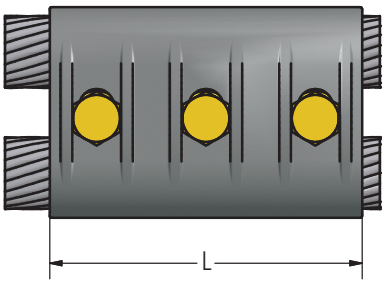

Aluminum Alloy

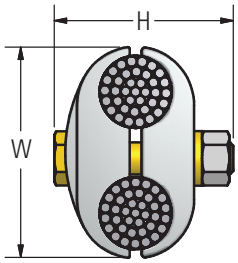

Hardware

Yellow anodized aluminum bolts, nuts and lockwashers.

Notes

1. To order an unequal size cable clamp create a catalog number. EX: for a 636 MCM run and 300 MCM tap, order: PC65-30-AA.
2. For Galvanized steel hardware, add suffix "-GS" to catalog number order: PC65-30-AA-GS.
3. For Grade Five Galvanized Steel Hardware, add "-GS5" to catalog number. EX: PC25-25-AA-GS5

DOSSERT®

TYPE TRV-AA

Parallel Connector

Connects a cable main parallel to a cable tap, features clamping members made of aluminum. The bolts, nuts and lockwashers are stainless steel to enhance clamping efficiency and resistance to corrosion. The assembly is encased in a plastic cover.

Material

Aluminum Alloy

Hardware

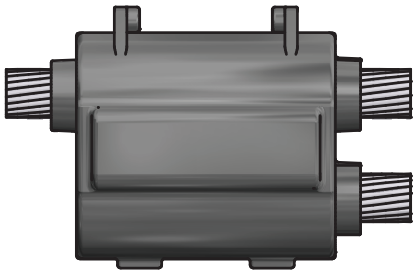

Stainless Steel bolts, Belleville spring washers, and Neoprene bolt retainers.

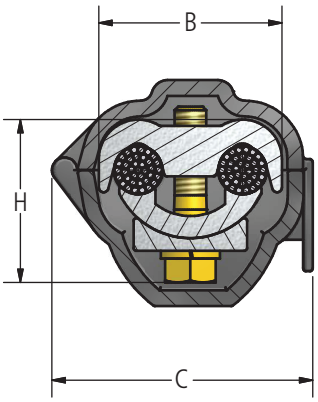

Cover

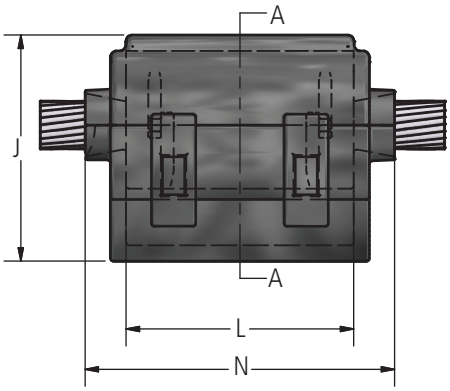

Black Polyethylene

Note

For conductor grooves coated with Alnox, order by adding prefix -LP.
EX: TRV10-10-AA-LP

DOSSERT®
Distribution Parallel Groove Clamps
(Series 390 and 490)

Catalog 390 and Catalog 490 Series Distribution Parallel Groove Clamps with a single bolt accomodate a range of conductors in each groove. This type of clamp is commonly used for service drop connections and as a tap from large to relatively small conductors.

Material
Aluminum Alloy

Hardware
Blue anodized bolt.

Notes
1. To order Parallel Groove Clamps prefilled with Alnox Compound, add P or W suffix to part number. See ordering information below.
2. The use of Alnox Compound liberally in grooves and on wire is recommended. Be sure conductors are clean. All conductors (new and old) should be thoroughly cleaned with a scratch brush or emery cloth.
3. Extensive field experience and exposure tests show that if a suitable type joint compound is liberally applied over and around the contact area, copper-to-aluminum electric connections can be made satisfactorily with aluminum clamps without copper bushings. Alnox Compound is recommended.

Ordering Information

DOSSERT®
Center Bolt Clamps Series 480

Catalog 480 Series Center Bolt Clamps are a multiple bolt heavy duty universal groove design which can handle the full electrical load of the conductor. They offer the convenience of installation without any loose parts. Catalog 480 Clamps are made from extruded high strength aluminum alloy and can be taped easily. Additionally, they have a minimum bulk, which results in a neat appearance.

Material
Aluminum Alloy

Hardware
Blue anodized bolt.

Notes
1. To order Parallel Groove Clamps prefilled with Alnox Compound, add P or W suffix to part number. See ordering information below.
2. The use of Alnox Compound liberally in grooves and on wire is recommended. Be sure conductors are clean. All conductors (new and old) should be thoroughly cleaned with a scratch brush or emery cloth.
3. Extensive field experience and exposure tests show that if a suitable type joint compound is liberally applied over and around the contact area, copper-to-aluminum electric connections can be made satisfactorily with aluminum clamps without copper bushings. Alnox Compound is recommended.

DOSSERT®
U-Bolt Clamps Series 580

Catalog 580 Series U-Bolt Clamps are heavy duty, high efficiency connectors with AFL full-capacity grooves. The U-Bolts are high strength aluminum alloy for excellent thermal expansion and corrosion resistance characteristics.

Material
Aluminum Alloy

Hardware
Yellow anodized aluminum U-bolts, nuts and lockwashers.

Notes
1. To order Parallel Groove Clamps prefilled with Alnox Compound, add P or W suffix to part number. See ordering information below.
2. The use of Alnox Compound liberally in grooves and on wire is recommended. Be sure conductors are clean. All conductors (new and old) should be thoroughly cleaned with a scratch brush or emery cloth.
3. Extensive field experience and exposure tests show that if a suitable type joint compound is liberally applied over and around the contact area, copper-to-aluminum electric connections can be made satisfactorily with aluminum clamps without copper bushings. Alnox Compound is recommended.

Specifications are subject to change without notice.

DOSSERT®

TYPE UD-AA

Universal Parallel Clamp

A universal clamp to provide a connection for two cables or wires over a wide range of sizes.

Material

Aluminum Alloy

Hardware

Yellow anodized aluminum bolts, nuts and lockwashers.

Notes

Voltage rating is 230 kV

For tin plating add "-SN" to end of catalog number. EX: UD50-21-AA-SN

Add suffix "GS" for galvanized steel hardware. EX: UD50-21-AA-GS

230 kV Aluminum
Bolted Stud Connectors

DOSSERT®

TYPE SCB-F-AA

Stud Connector to Flat Bar

Aluminum Connector for Stud to Flat

Material

Aluminum Alloy

Hardware

Yellow anodized aluminum bolts, nuts, and lockwashers.

Notes

1. Add suffix "-SN" catalog number for tinned plated order: SCB200-1/2F-4N4-T12-AA-SN

2. For special thread sizes change the "-T" in the catalog number. EX: for a 1" stud with no threads order: SCB100-1/4F-2N-T0-AA.

230 kV Aluminum Bolted Stud Connectors

DOSSERT®

TYPE SCV-AA

Stud Connector to Cable

Stud connector is designed for use on aluminum studs. The cable connector is designed with a universal groove which allows a range of aluminum or ACSR conductor for each size.

Material

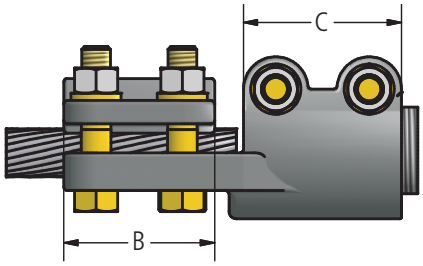

Aluminum Alloy

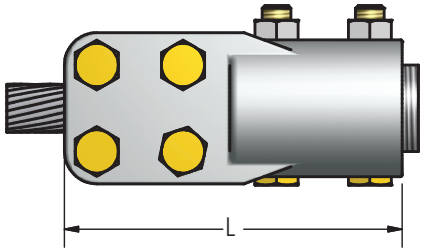

Hardware

Yellow anodized aluminum bolts, nuts and lockwashers.

Notes

1. Special thread is available upon request.
2. For no thread replace number after 'T' with a '0'. Ex: SCV50-25-T0-AA

230 kV Aluminum Bolted Stud Connectors

DOSSERT®

TYPE SCX-AA, S2CX-AA

Aluminum Stud Connector for Cable

SCX-AA connects one cable to one stud and S2CX-AA connects two cables on one stud.

A variable conductor stud connector which takes a wide range of cable sizes in line or in a 90° position. The reversible cap permits optimum clamping for all cable sizes within the assigned ranges. In addition, one flat surface is machined to accommodate flat bar conductors. Can be furnished upon request in type SCX-N-AA with bolt holes to accommodate NEMA standard bar drilling.

Material

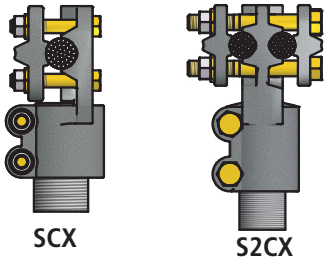

Aluminum Alloy

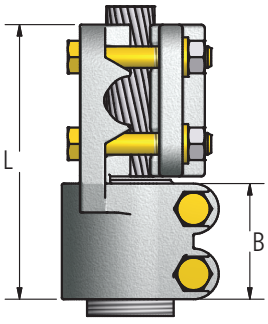

Hardware

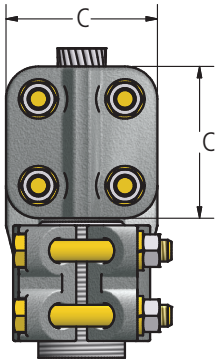

Yellow anodized aluminum bolts, nuts and lockwashers.

Notes

1. For a 1" T14 stud, and two 1000 MCM cables order S2CX100-100-AA-T14

230 kV Aluminum Bolted Stud Connectors

DOSSERT®

TYPE SP-AA

Stud Connector to Pipe

A connector for joining a tubular bus conductor to a threaded stud.

Material

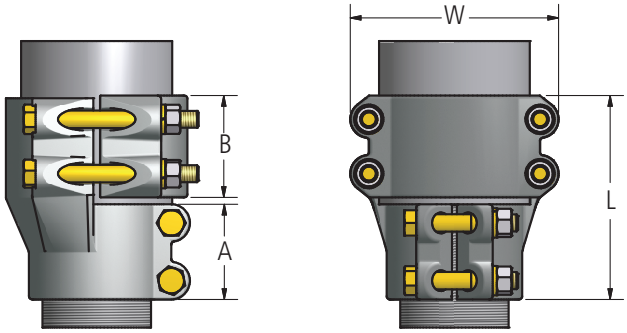

Aluminum Alloy

Hardware

Yellow anodized aluminum nuts, bolts and lockwashers.

Notes

1. For tin plating add suffix "-SN" to end of catalog number.
2. For no threads use suffix "T0" in catalog number. Ex: SP100-75-T0-AA-SN.

TYPE SX-AA, SX-90-AA

Stud Expansion Connector for Pipe

An expansion stud connector for joining a tubular bus to a threaded or unthreaded transformer stud. The movements of the conductors caused by thermal expansion and contraction or settling foundations are efficiently absorbed by the aluminum laminated straps. Type SX is furnished with an alignment guide for connections where axial alignment is required.

SX-AA

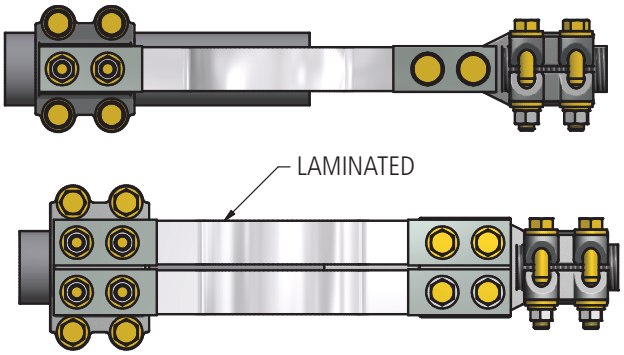

SX-90-AA

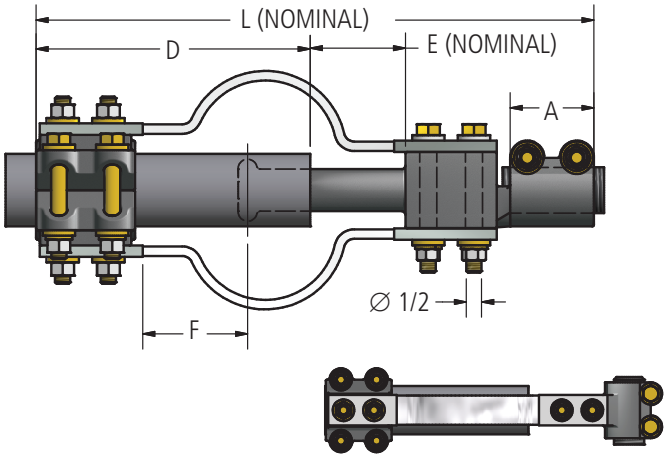

Material
Aluminum Alloy

Hardware
Aluminum bolts, nuts, and lockwashers.

Laminates
Pure aluminum

Notes
1. For a 90 degree stud connector, add -90 to the Catalog Number.

230 kV Aluminum Bolted Stud Connectors

DOSSERT®

TYPE SXLW-SI-AA

Aluminum To Bronze Angular Expansion Connector

Expansion connector is designed for expansion and contraction in long bus runs. Stud connector can be adjusted to suit customers requirements. Laminated straps provide for 1.4" of expansion or contraction for pipe sizes 3/4" through 1 1/2" NPS. For pipe sizes 2" through 4", the straps allow for expansion or contraction of 2.6."

Material

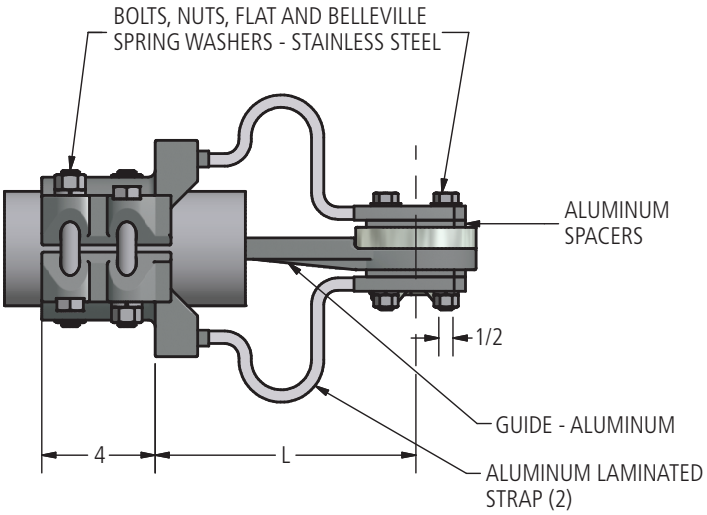

Aluminum Alloy, Copper Alloy

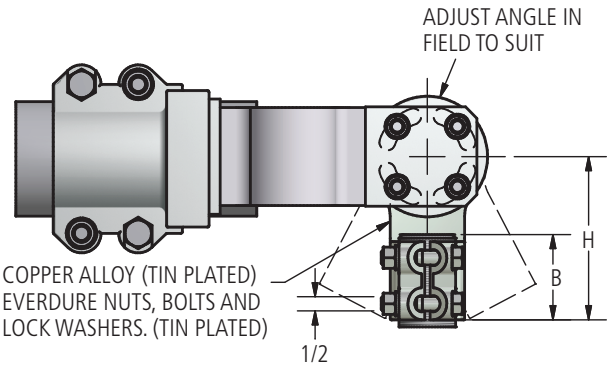

Hardware

Stainless steel nuts, bolts and lockwashers.

Notes

1. For a custom thread count change the number after the "T" in the catalog number.
   Ex:WSXL200C-350-SI-T0-AA
   Additional sizes are available.

DOSSERT®

TYPE BAP-AA

Tee Connector

Tee connector is designed to make a tee connection in bus construction. Connector can be used on Schedule 40 and Schedule 80 pipe. Four clamp bolts on each conductor ensures positive electrical contact.

Material

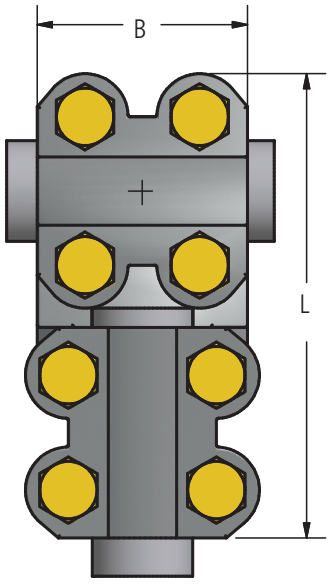

Aluminum Alloy

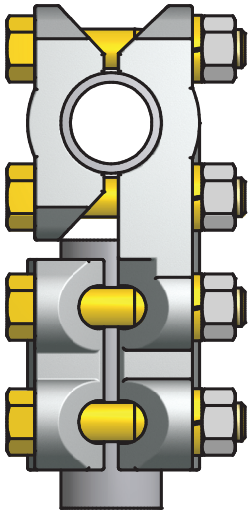

Hardware

Yellow anodized aluminum bolts, nuts, and lockwashers.

Notes

Contact surfaces can be precoated by adding suffix -LP.

DOSSERT®

TYPE BCV-AA

Cable to Cable Tee

Tee connectors are designed for use with stranded aluminum or ACSR conductors. Tees are designed with universal grooves to accept a wide range of conductor sizes. Four clamp bolts on each conductor insures a positive electrical contact.

Material

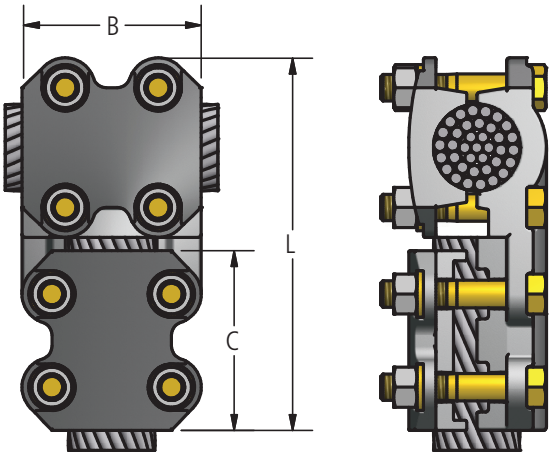

Aluminum Alloy

Hardware

Yellow anodized aluminum nuts, bolts and lockwashers.

Notes

- For Stainless Steel bolts, lockwashers and Everdur nuts, add "-SSHBN" to catalog number. EX: BCV25-25-AA-SSHBN
- For Grade Five Galvanized Steel Hardware, add "-GS5" to catalog number. EX: BCV25-25-AA-GS5
- For Electro Tin Plate, add "-SN" to catalog number. EX: BCV25-25-AA-SN

TYPE BPCV-AA, BP2CV-AA

Aluminum Tee Connector For Tubular Bus To A Cable Tap

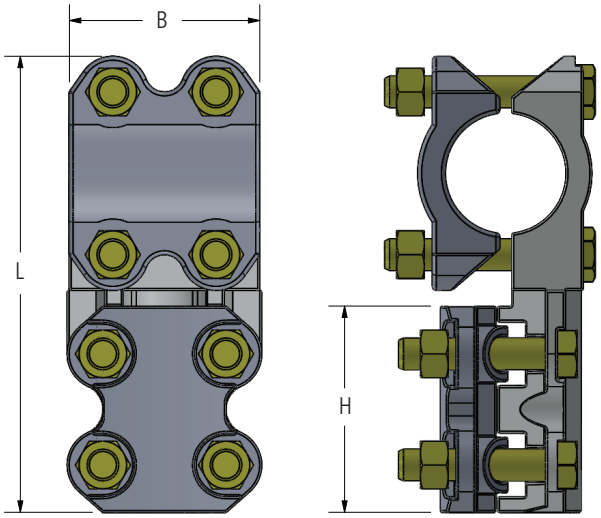

A variable tap pipe to cable tee connector. Cable clamping section is provided with two independently acting aluminum alloy saddles.

Material
Aluminum Alloy

Hardware
Yellow anodized aluminum bolts, nuts, and lockwashers.

Notes
1. For tin plating, add "-SN" to end of catalog number. EX: BP2CV300-125-AA-SN
2. For galvanized steel hardware, add "-GS" to end of catalog number. EX: BP2CV300-125-AA-GS
3. For grade five galvanized steel hardware, add "-GS5" to end of catalog number. EX: BPCV75-125-AA-GS5
4. For two cables in-line, add "-90V" to catalog number. EX: BP2CV400-200-90V-AA

BPCV-AA

FIG. 1

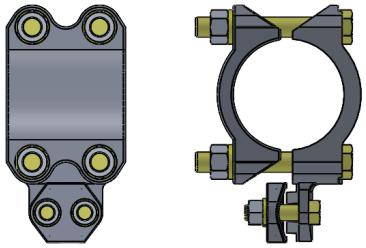

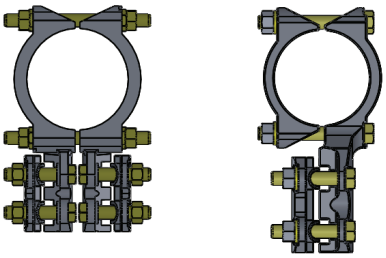

FIG. 2

BP2CV-AA

BP2CV-90V-AA

AFL's Dossert® product line offers a wide range of substation accessories in low voltage up to 765 kV applications in bronze or aluminum materials.

DOSSERT®

TYPE PFTS-N-AA

Pipe to NEMA Pad

Tee tap is designed to provide terminal connections on side of tubular bus. Four clamp bolts ensure positive electrical contact. Pad conforms to NEMA standards.

Material

Aluminum Alloy

Hardware

Yellow anodized aluminum bolts, nuts and lockwashers.

Notes

- For Stainless Steel bolts, lockwashers and Everdur nuts, add "-SSHBN" to catalog number. EX: PFTS6-00-1-6N4-AA-SSHBN
- For Galvanized Steel Hardware, add "-GS" to catalog number. EX: PFTS300-1-2N-AA-GS
- *Design has 6 Bolts

TYPE UPT-AA

U-bolt Pipe to Cable Tee Connector

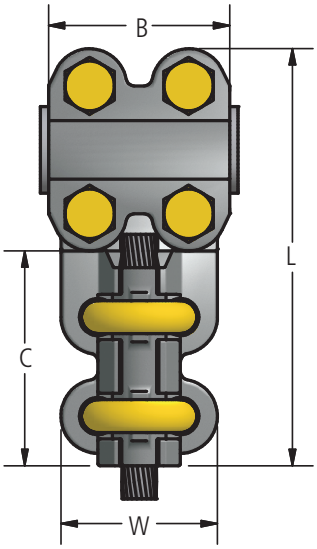

Tee connector is designed for connecting stranded aluminum or ACSR conductor to tubular bus. Four clamp bolts on each conductor insures positive electrical contact.

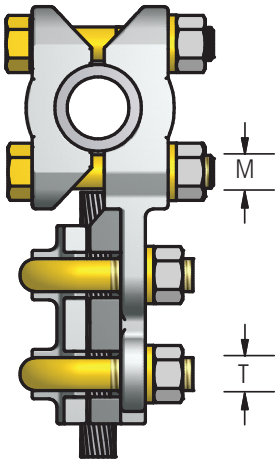

Material

Aluminum Alloy

Hardware

Yellow anodized aluminum bolts, U-bolt, nuts, and lockwashers.

DOSSERT®

TYPE UT-AA, UUT-AA

U-bolt Tee Connector

A rugged U-bolt high compression clamp type tee connector which takes a wide range of cable sizes in both the run and tap sections. Designed to withstand high compressive clamping action on all cables within specified cable ranges.

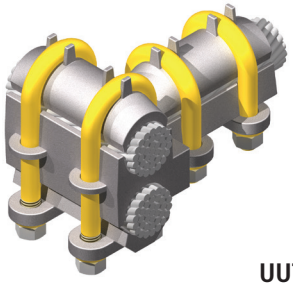

UT-AA

Material

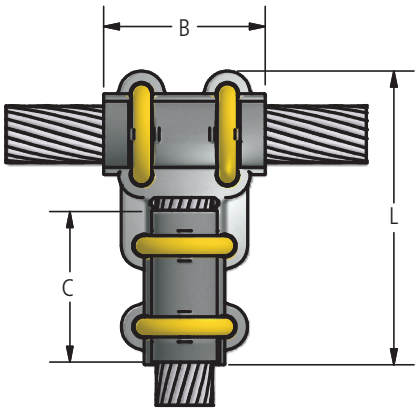

Aluminum Alloy

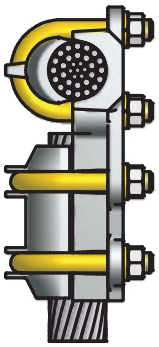

Hardware

Yellow anodized aluminum U-bolts, nuts, and lockwashers.

DOSSERT®

TYPE VBP-20-AA, VBP-30-AA

20 Degree and 30 Degree Vee Connection

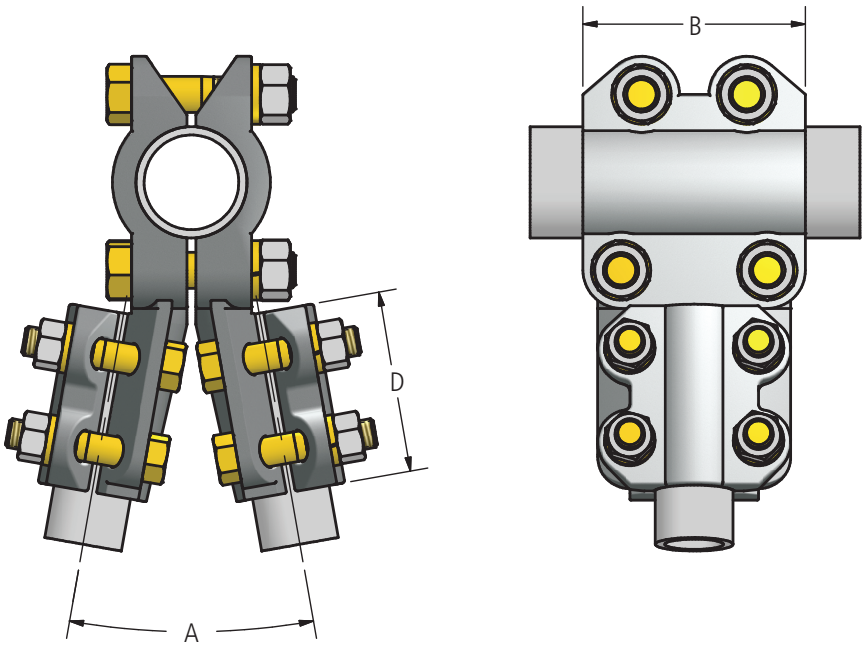

A-frame connectors are designed to make fast, reliable A-frame assemblies. Connectors can be used on Schedule 40 and Schedule 80 pipe.

Material

Aluminum Alloy

Hardware

Yellow anodized aluminum bolts, nuts, and lockwashers.

230 kV Aluminum Bolted Tee & Vee Connectors

DOSSERT®

TYPE CFTL-AA

Cable to Flat Bar Tee Connector

Tee tap is designed to provide terminal connections on side of a cable. Eight clamp bolts insure positive electrical contact. Pad conforms to NEMA standards.

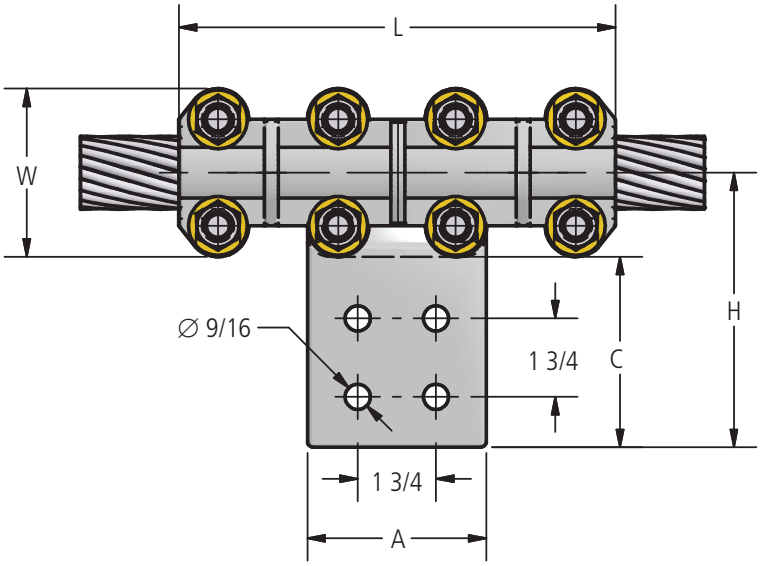

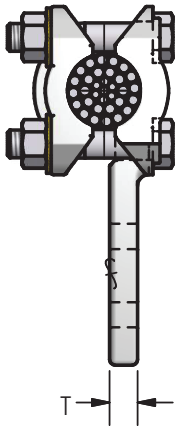

Material

Aluminum Alloy

Hardware

Yellow anodized aluminum bolts, nuts, and lockwashers.

DOSSERT®
TYPE CASV-AA
Cable Spacer Clamp

A high strength, high conductivity aluminum cable spacer, the CASV-AA includes clamping hardware made of high-tensile aluminum for dependability and durability in the field.

Material

Aluminum Alloy

Hardware

Yellow anodized aluminum nuts, bolts and lockwashers.

Notes

1. Different sizes not listed can be ordered by contacting customer service.

DOSSERT®

TYPE CFTV-N-AA

Terminal Lug

Tee connector designed to connect aluminum cables to aluminum pad for flat bolt on connection. Pads conform to NEMA standards.

Material

Aluminum Alloy

Hardware

Yellow anodized aluminum nuts, bolts and lockwashers.

Notes

1. For Stainless Steel bolts, lockwashers and Everdur nuts, add "-SSHBN" to catalog number. EX: CTFV160-4N-NN-SSHBN
2. For Grade Five Galvanized Steel Hardware, add "-GS5" to catalog number. EX: CFTV160-4N-AA-GS5

230 kV Aluminum Bolted Terminal Connectors

DOSSERT®

TYPE T3CV-AA

Aluminum Terminal

Material

Aluminum Alloy

Material

Aluminum nuts, bolts and lockwashers.

Notes

- For Stainless Steel Hardware, add "-SS" to catalog number. EX: T3CV125-4N4-AA-SS
- For Stainless Steel bolts, lockwashers and Everdur nuts, add "-SSHBN" to catalog number. EX: T3CV125-4N4-AA-SSHBN
- For Galvanized Steel Hardware, add "-GS" to catalog number. EX: T3CV125-4N4-AA-GS
- For Angled Pad, add "A" to prefix and angle to catalog number. EX: T3CVA125-4N4-45-AA

DOSSERT®

TYPE T2CV-N-AA, T2CVA-N-30-AA, T2CVA-N-45-AA, T2CVA-N-90-AA

Aluminum Terminal for 2 Cables

Terminal is designed to connect stranded aluminum or ACSR conductors to aluminum pads. Pad conforms to NEMA standards. Terminals are designed with a universal groove to accept a wide range of conductor sizes. Captive bolts permit one wrench tightening of nuts.

Material

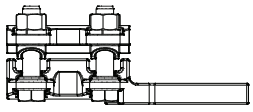

Aluminum Alloy

Material

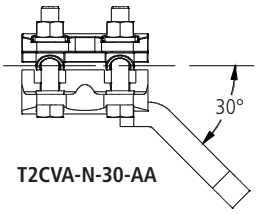

Yellow anodized aluminum nuts, bolts and lockwashers.

Notes

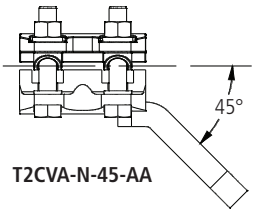

- For a 30°, add suffix '-30'; 45°, add suffix '-45'; and 90°, add suffix '-90' to catalog number. Also add 'A' after T2CV. EX: T2CVA25-4N4-90-AA
- For Stainless Steel bolts, lockwashers and Everdur nuts, add "-SSHBN" to catalog number. EX: T2CV200-4N4-AA-SSHBN
- For Galvanized Steel Hardware, add "-GS" to catalog number. EX: T2CV200-4N4-AA-GS
- For Angled Pad, add "A" to prefix and angle to catalog number. EX: T2CVA200-4N4-45-AA

230 kV Aluminum Bolted Terminal Connectors

DOSSERT®

TYPE TCV-N-AA, TCVA-N-15-AA, TCVA-N-30-AA, TCVA-N-45-AA, TCVA-N-90-AA

NEMA Terminal for Cable Terminal Lug Cable

A variable clamp type terminal for connecting a cable to a flat bar bus. Each size terminal accommodates a wide range of cable sizes. Designed to carry the full rated load of the maximum conductor without overheating. Contact pads other than those listed below can be promptly furnished to any specified size or drilling. The variable type terminal exhibits its advantage in that one connector will accommodate a number of cable sizes. This minimizes greatly the problem of stocking various sizes of connectors and the errors which occur in specifying connectors for specific cable sizes.

Material

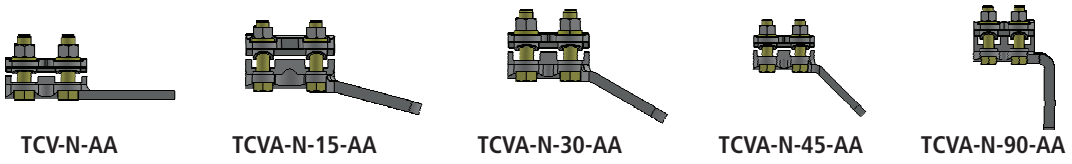

Aluminum Alloy

Hardware

Yellow anodized aluminum nuts, bolts and lockwashers

Notes

- For Finished Surface on both sides of pad, add "-F" to catalog number. EX: TCV25-4NF-AA.
- For Contact Surfaces prefilled with Dostex and packaged in Polyethylene Bag, add "-LP" to catalog number. EX: TCV60-2N-AA-LP.
- For Stainless Steel bolts, lockwashers and Everdur nuts, add "-SSHBN" to catalog number. EX: TCV300-6N4-AA-SSHBN.

230 kV Aluminum Bolted Terminal Connectors

DOSSERT®

TYPE TCX-AA
Wide Range Terminal

TCX can be used as a cable tap terminal or a straight terminal. A variable clamp type terminal or tap for connecting a cable or pipe to a flat bar bus. Each size accommodates a wide range of cable sizes. New terminal series reduces stock with extended range taking capabilities. Excellent for use due to storm damage. Three terminals provide cable range from #2 solid to 3500 MCM. Available in pad sizes from two-hole to six-hole pads.

Material

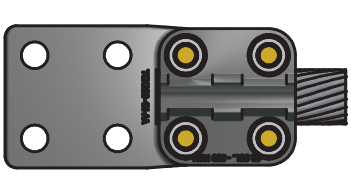

Aluminum Alloy

Hardware

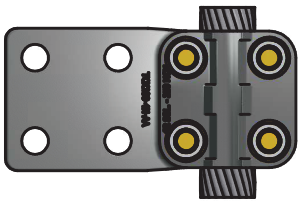

Yellow anodized aluminum nuts, bolts and lockwashers.

Notes

- For angled pad, add "A" to prefix and angle to catalog number. EX: TCXA350-4N4-45-AA
- For Grade Five Galvanized Steel Hardware, add "-GS5" to catalog number. EX: TCX350-4N4-AA-GS5

DOSSERT®

TYPE TP-N-AA, TPA-N-30-AA, TPA-N-45-AA, TPA-N-60-AA, TPA-N-90-AA

Terminal Pipe Lug

A bolted clamp type terminal for connecting standard pipe size tubular buses to flat surfaces.

Material

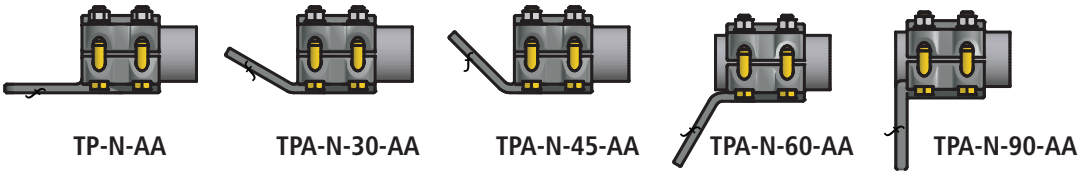

Aluminum Alloy

Hardware

Yellow anodized aluminum nuts, bolts and lockwashers.

Notes

- Add an 'A' after TP. For a 30°, add '-30'; for a 45°, add '-45'; for a 60°, add '-60'; for a 90°, add '-90'. For a 1" pipe, with a 2 hole pad, at 45°, order TPA100-2N-45-AA.
- For a finished pad on both sides, add "F" to the end of pad number in catalog number EX: TPA100-2NF-45-AA.
- For contact surfaces coated with NO-OX-ID and packaged in polyethelene bag, add suffix "LP" to end of catalog number. EX: TP200-4N4-AA-LP

230 kV Aluminum Bolted Terminal Connectors

DOSSERT®

TYPE TPC-N-AA
Terminal Connector

Terminal is designed to connect to aluminum or copper pads. Pad conforms to NEMA standards.

Material

Aluminum Alloy

Hardware

Yellow anodized aluminum nuts, bolts and lockwashers.

Notes

- For Contact surfaces prefilled with AFC and packaged in plyethelene bag, add "-LP" to catalog number. EX: TPC200-4N4-AA-LP
- For Finish on both sides of pad, add "F" to catalog number. EX: TPC200-4N4F-AA
- For Stainless Steel bolts, lockwashers and Everdur nuts, add "-SSHBN" to catalog number. EX: TPC250-4N4-AA-SSHBN
- For Galvanized Steel Hardware, add "-GS" to catalog number. EX: TPC600-4N4-AA-GS

230 kV Aluminum Bolted Terminal Connectors

DOSSERT®

TYPE U2L-N-AA, U2LA-N-45-AA, U2LA-N-90-AA

Aluminum Two Cable U Bolt Terminal

Terminals are designed to connect AAC or ACSR conductors to aluminum pads. Pads conform to NEMA standards. Terminals are designed with universal grooves to accept a wide range of conductor sizes. Captured U-bolts permit one wrench tightening of nuts.

Material

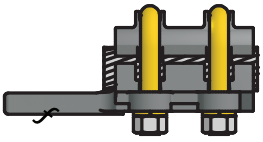

Aluminum Alloy

Hardware

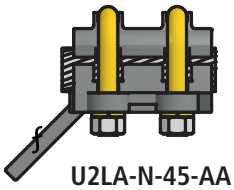

Aluminum U-bolts, lockwashers and nuts.

Notes

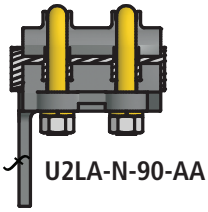

1. Contact pads can be furnished to any specification size and hole pattern.

DOSSERT®

TYPE UL-N-AA, ULA-N-45-AA, ULA-N-90-AA

Aluminum U-Bolt Terminal

A U-bolt type variable terminal lug for connecting cables to flat bar busses. Designed to operate at cooler than conductor temperatures under maximum load conditions with the largest size cable of the range of cable sizes. Contact pads other than those listed can be promptly furnished to any specified size or drilling.

Material

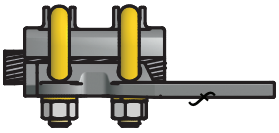

Aluminum Alloy

Hardware

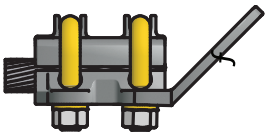

Aluminum bolts, lockwashers and nuts.

Notes

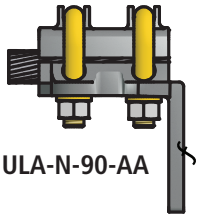

- For a 900 MCM cable, with a two-hole pad, at a 45° angle, order ULA90-2N-45-AA.
- For a 900 MCM cable, with a two-hole pad, at a 90° angle, order ULA90-2N-90-AA.
- For finished pad on both sides, add "F" to catalog number. EX: ULA90-2NF-90-AA.

DOSSERT®

TYPE XLW-AA, XLW-90-AA

Expansion Terminal Connector

Expansion terminal is designed to compensate for expansion and contraction in bus runs. Pad conforms to NEMA standards.

Material

Aluminum Alloy

Hardware

Aluminum bolts, lockwashers and nuts

Notes

- For an expansion terminal at 90°, add suffix "-90" to catalog number. EX: XLWP125-4N-AA
- To order without alignment guide, add "P" to catalog number. EX: XLWP125-4N-AA
- For schedule 80 pipe, add "E" to catalog number. EX: XLW125E-4N-AA
- For Stainless Steel bolts, lockwashers and Everdur nuts, add "-SSHBN" to catalog number. EX: XLW350-4N4-AA-SSHBN
- For Galvanized Steel Hardware, add "-GS" to catalog number. EX: XLW350-4N4-AA-GS

DOSSERT®

TYPE XLW-90V-AA, XLWO-AA

Expansion Terminal Connector

Expansion terminal is designed to compensate for expansion and contraction in bus runs. Pad conforms to NEMA standards. Dimension "D" shown is for an installation temperature of 68°F(20°C). XLW-90V is the product number for a center-formed pad, XLWO is for an offset pad. Products from factory are for use with Sch. 40 pipe, to order for use with Sch. 80 pipe see notes below.

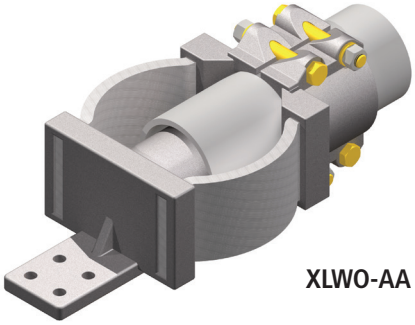

XLW-90V-AA

Material

Aluminum Alloy

Hardware

Yellow anodized aluminum nuts, bolts and lockwashers.

XLWO-AA

Notes

1. Add "P" to catalog number to remove alignment guide.
   EX: XLWP200-4N4-90V-AA or XLWOP200-4N4-AA.

2. Add "E" to the catalog number for extra heavy pipe.
   EX: XLW200E-4N4-90V-AA or XLWO200E-4N4-AA.

DOSSERT®

TYPE 1706 SERIES

Bus Vibration Dampers

Tubular bus dampers are designed to control Aeolian or wind-induced vibration in long bus spans; the dampers have been proven both in the laboratory and in field service to be the most effective method of controlling tubular bus vibration. The dampers are faster and easier to install than the old method of inserting "scrap" cable into the tubular bus runs. Also, the dampers find applications for correcting a vibration problems in existing substations.

Determine catalog number based on the bus conductor size being used. To order a bus vibration damper for 2 1/2" bus conductor, the complete catalog number is 1706-288.

DOSSERT®

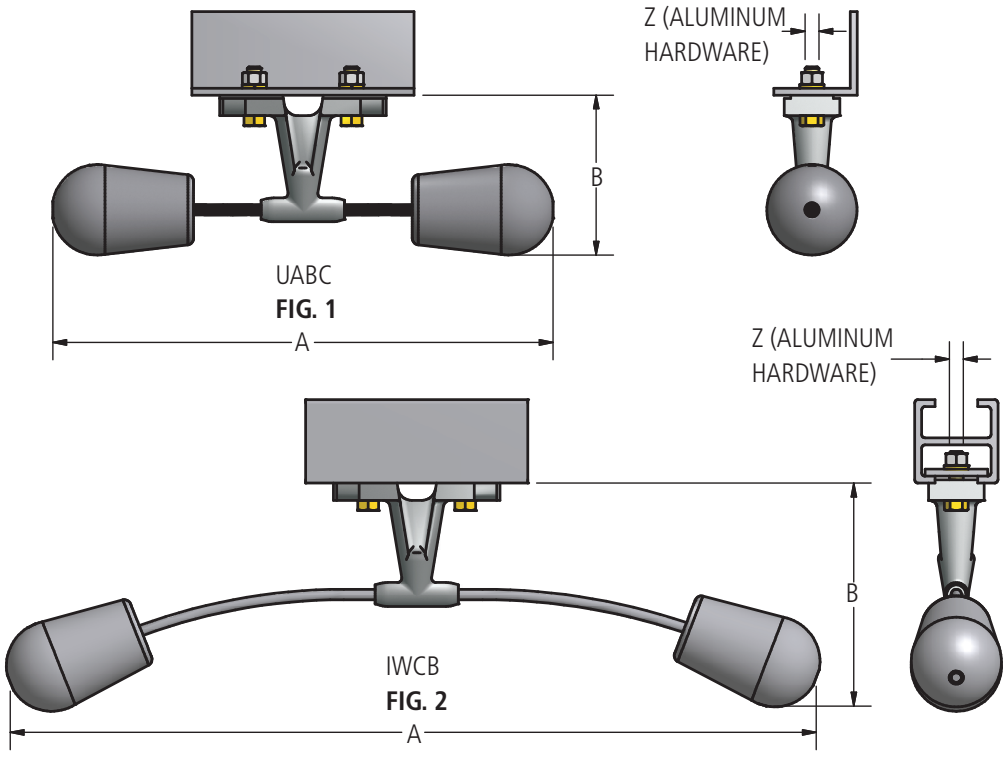

TYPE 1706

Bus Vibration Dampers

Vibration dampers for universal angle bus conductor (UABC) and integral web channel bus conductor (IWCB) are specifically designed to control Aeolian or wind-induced vibration in long bus spans. The dampers provide a fast, economical method of damping vibration. Installation is easy; the IWCB damper clamps to the bus by means of a bolt and clamp nut while the UABC damper bolts directly to the bus.

Determine catalog number based on the bus conductor size being used. Ex: A bus vibration damper for 4"x4" IWCB, the complete catalog number is: 1706-129.

DOSSERT®

TYPE HPS-AA, HPS-CH-AA

HPS is a horizontal support for a rigid fit and the HPS-CH is a for a horizontal support for a slip fit.

Material

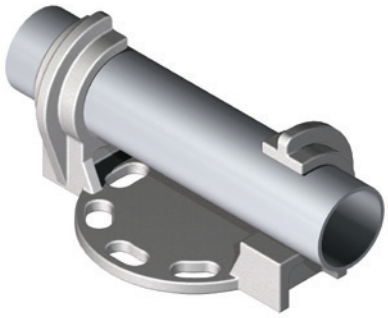

Aluminum Alloy

Hardware

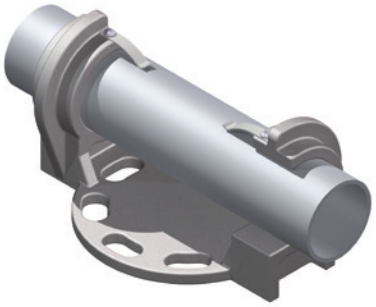

Galvanized steel hardware supplied for base mounting.

Notes

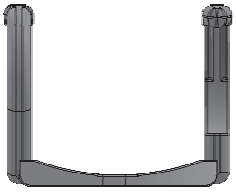

- For Slip Bus Support, add suffix "-CH" to catalog number. Ex: HPS100-3B-CH-AA.
- For base mounting dimensions and hardware, see page 3 in the general catalog index of AFL's Substation catalog.

TYPE PLHS-AA, PLHS-CH-AA

Slip or Fixed Bus Support

Can be used as a slip or fixed bus support or fixed support by being welded into position.

PLHS-AA

Material

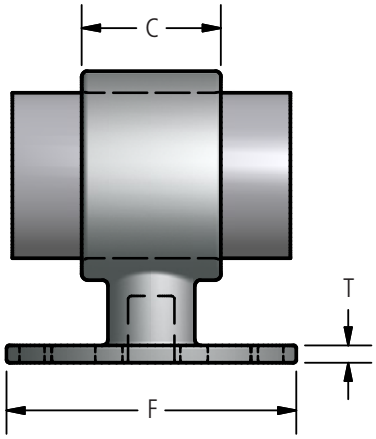

Aluminum Alloy

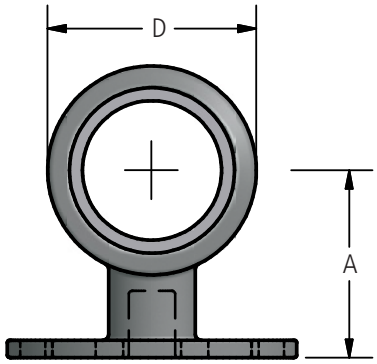

Hardware

Galvanized steel hardware supplied for base mounting.

Notes

1. For base mounting dimensions and hardware see page 3 in the general catalog index.

DOSSERT®

TYPE WPSO-AA

Aluminum Welded Bus Support

Open saddle horizontal type support for pipe to insulator. Rigid applications only. Pipe lays into support and is welded in the field.

Material

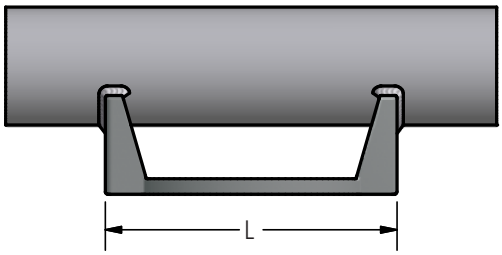

Aluminum Alloy

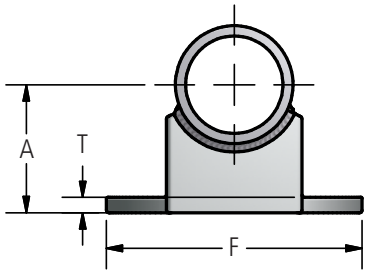

Hardware

Galvanized steel base mounting hardware.

Note

1. For base mounting dimensions and hardware, see page 3 in the general catalog index.

230 kV Aluminum Welded Bus Supports

DOSSERT®

TYPE WPSSL-AA

Welded Slide Bus Support

Pipe or bus tube is welded to support. The support is then bolted directly into the insulator. Bolt sleeves allow the whole support to slide on the insulator. Bolt sleeves for rigid fix support can be ordered.

Material

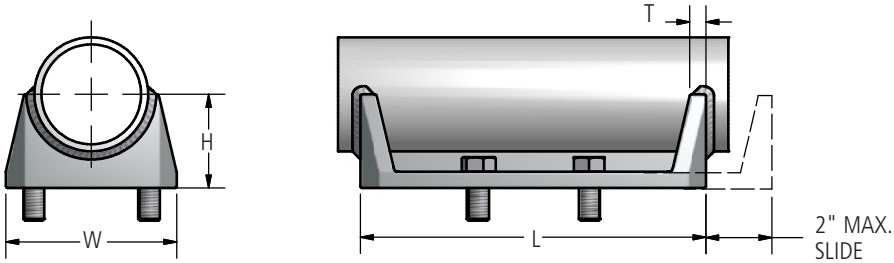

Aluminum Alloy

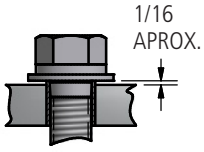

Hardware

Galvanized steel hardware for base mounting.

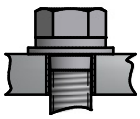

Notes

Add "R" to catalog number for rigid fit; EX: WPSSL300-5-R-AA
Add "SR"for slip and rigid fit; EX: WPSSL30-5-R-AA

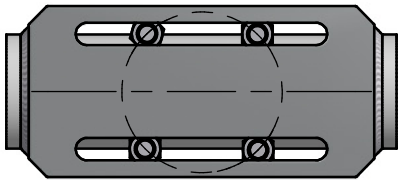

SLIDE BUS SUPPORT ASSEMBLY 1

FIXED BUS SUPPORT ASSEMBLY 2

TYPE 14700 Straight Adapter Tube to Cable

Adapter is designed to make inline connection between pipe and stranded cable. Cable is “puddle” welded to connector; connector is then welded to tube. Not recommended for use on ACSR conductors due to difficulty welding steel core.

Material

Aluminum Alloy

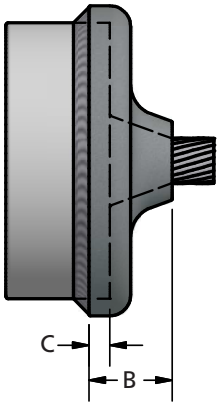

Notes

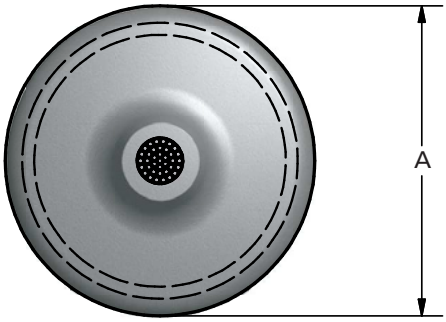

1. Table 1 shows physical characteristics of each catalog series.
2. Table 2 shows specific catalog numbers.

Ordering Instructions

1. Determine Catalog Number

- Determine the catalog number from Table 2 based on the bus conductor and the diameter of the stranded conductor being used.
- Ex: A straight adapter for a run conductor of 3" Sch 40 and a stranded conductor diameter of 0.926" the complete catalog number is : 14708.100

AFL’s Dossert® product line offers a wide range of substation accessories in low voltage up to 765 kV applications in bronze or aluminum materials.

TYPE 15100 Reducer Connector for Pipe

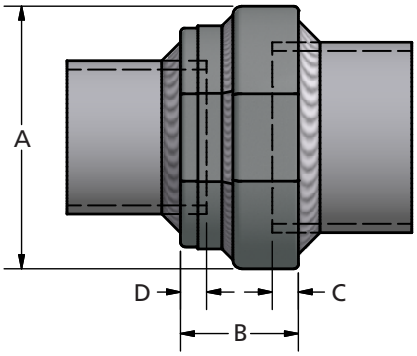

Reducer connector is designed to connect unequal pipe sizes with minimum amount of trouble. Connector is welded on outside of pipe allowing use on both schedule 40 and schedule 80 pipe.

Material

Aluminum Alloy

TYPE WS-AA, WS-E-AA Aluminum Welded Coupler

A shorter version of the Type WWC coupler, also made to special lengths.

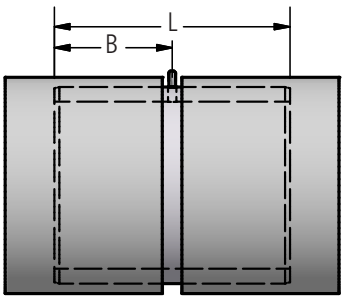

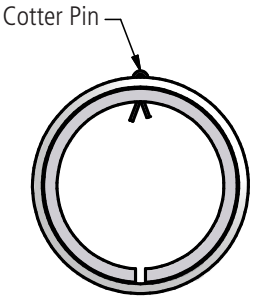

Material

Aluminum Tubing

Notes

1. To order special lengths, add desired (L) dimension to the catalog number. Example: WS500-15-AA for 15 inch coupler.

TYPE WSXL-SI-AA Aluminum to Bronze Angular Expansion Connector

Expansion connector is designed for expansion and contraction in long bus runs. Stud connector can be adjusted to suit customers application.

Material

Aluminum Alloy

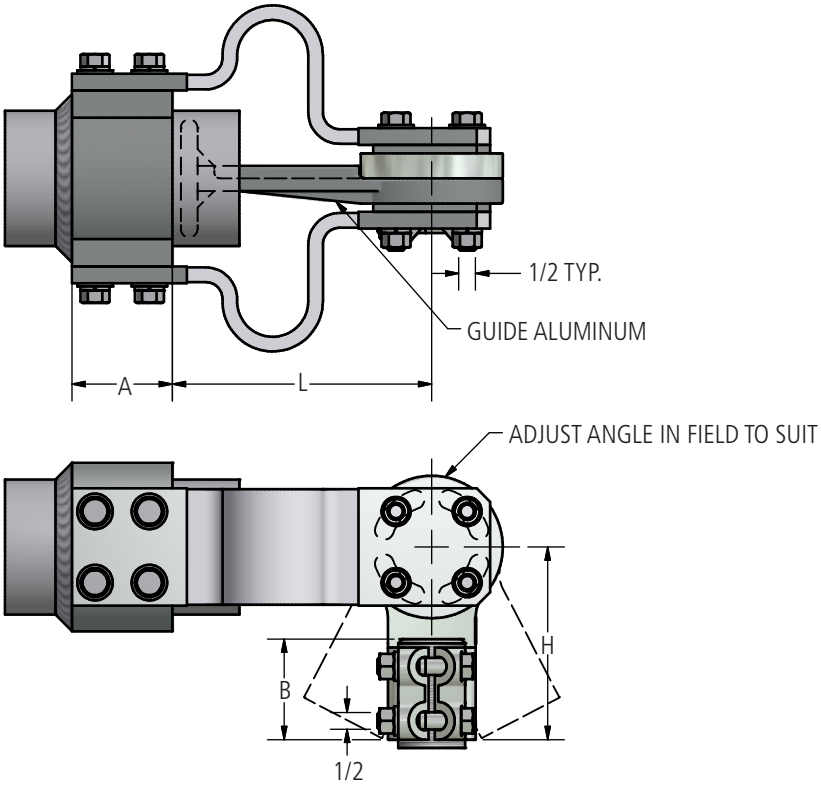

Hardware

Stainless steel nuts, bolts and belleville washers on aluminum bus.

Notes

For a custom thread count change the number after the "T" in the catalog number. Ex:WSXL200C-350-SI-T0-AA

Additional sizes are available.

TYPE WWCR-AA, WWCR-E-AA Reducing Coupler

A reducing coupler for joining aluminum pipe of different diameters. Provides maximum structural reinforcement at the joint as well as a neat and corona free installation. Pipe is easily aligned and held during welding.

Material

Aluminum-Silicon Alloy

TYPE XWWC-AA, XWWC-E-AA
Bus Expansion Coupler

Expansion coupler for aluminum pipe connections. Provided with alignment guide for field welds.

Material

Aluminum Alloy

Notes

1. If alignment guide is not required, add "P" to the catalog number prefix. EX: XWWCP100-AA.
2. For Dimension "E", refer to pages 11-12 in the General Information section.

Specifications are subject to change without notice.

TYPE XWWCT-AA
Expansion Coupler

Expansion coupler is designed to compensate for expansion and contraction in long bus runs. An extruded pipe is provided to be field welded in place and provides alignment of bus.

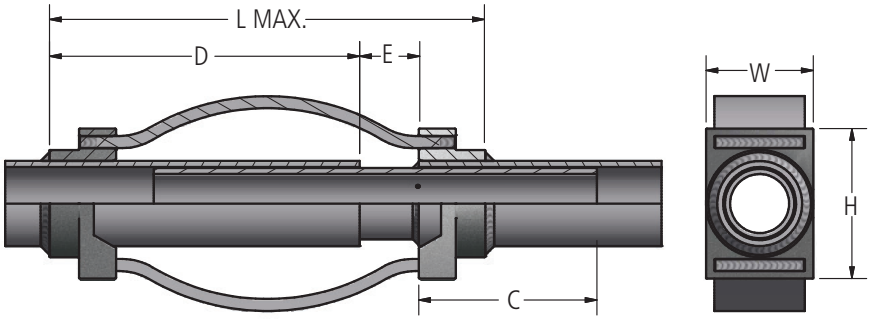

Material

Aluminum Alloy

Notes

1. For dimension "E", refer to pages 11-12 in the General Information section.

DOSSERT®

TYPE WEPI-AA, WEPI-30-AA, WEPI-45-AA, WEPI-60-AA

Aluminum Welded Pipe Elbow

Welded elbows offer an economical method for field fabrication where angular turns are required. Designed for 230 kV service. Elbows are designed with chamfer to provide ease of welding.

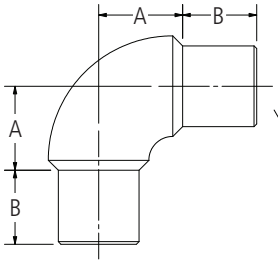

WEPI-AA

Material

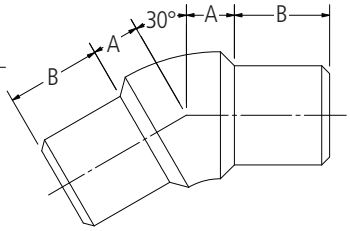

Aluminum Alloy

Notes

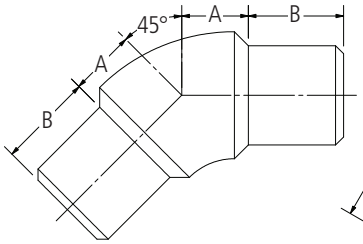

- For a 30°, add '-30'; for a 45°, add '-45'; and for a 60°, add '-60' to catalog number. Ex: WEPI75-45-AA
- For Schedule 80, add 'E' to pipe size. Ex: WEPI75E-AA

DOSSERT®

TYPE WTC-N-AA

Welded Tee to Flat

For welding a two, four, or six hole NEMA pad to a pipe.

Material

Aluminum Alloy

Notes

- For Undrilled holes on pad, add "-U" to catalog number. EX: WTC250-2NU-AA
- For Finish surface on both sides of pad, add "-F" to catalog number. EX: WTC250-2NF-AA.

DOSSERT®

TYPE 1000 SERIES

Tube to Cable Tee Adapter

Tee adapter is designed with saddle to allow connector to be clamped to bus tube during field welding. Stranded conductor is puddle welded to connector, then connector is welded to bus tube. Not recommended for use on ACSR conductors due to difficulty welding steel core.

Material

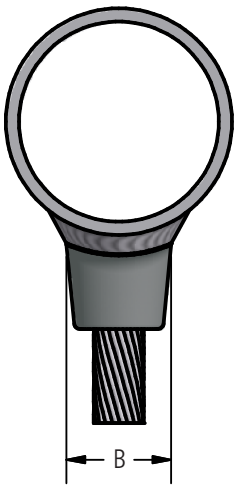

Aluminum Alloy

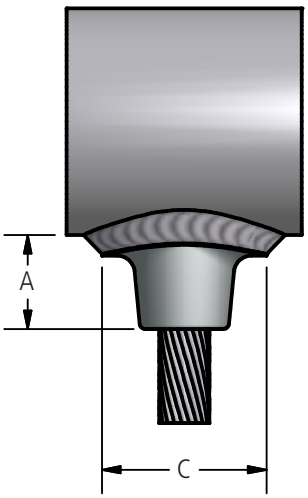

Ordering Instructions

Step 1: Determine Catalog Number

Determine the catalog number from Table 2 based on the bus conductor and the diameter of the stranded conductor being used.

Example: A tee adapter for a run conductor of 3" schedule 40 and a stranded conductor diameter of 0.926", the complete catalog number is: 1006.100

DOSSERT®

A-Frame Connectors
14500 and 14600 Series

Branch Connector (14500 Series) -
Vee Connector (14600 Series) - 30°

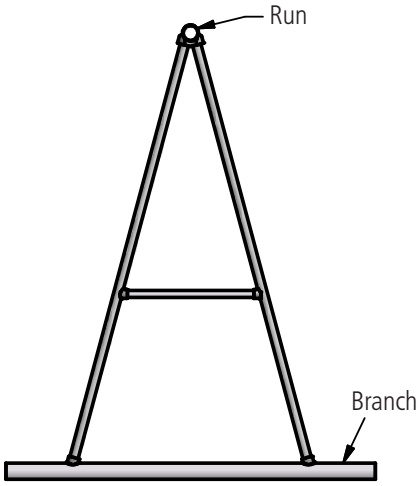

AFL can supply prefabricated A-frame assemblies ready for field mounting and welding. Assemblies are factory fabricated from standard A-frame fittings and pipe carefully welded and inspected to insure accuracy and best performance.

A-frame fittings are designed to make fast, reliable A-frame assemblies. Fittings are designed to be welded on the outside of the pipe allowing use of both Schedule 40 and Schedule 80 pipe. Socket design allows for slight inaccuracies in field cut length of pipe.

To order include angle, top and bottom run sizes, leg size, centerline height and crossbrace size and spacing if required.

A-Frame

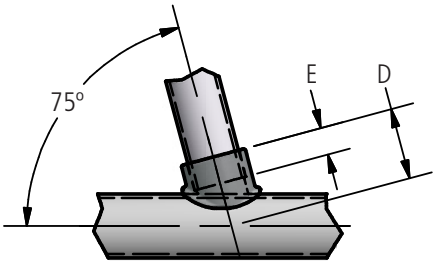

Ordering Instructions

Step 1: Determine Catalog Number

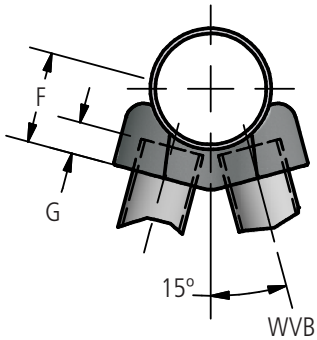

Determine the catalog number based on the bus conductor being used for the run and the branch.

Example: A 15° branch connector for a run conductor of 3" schedule 40 and a branch conductor of 2 1/2" schedule 40, the catalog number is: 14508-7

A 30° vee connector for a run conductor of 4" schedule 40 and a branch conductor of 2 1/2" schedule 40, the catalog number is: 14610-7

WTA-75-AA
WTA-80-AA

WVBP-20-AA
WVBP-30-AA

Notes

1. For bus conductor information, see AFL Bus Conductor section.

TYPE 15950, 15960

Flexible Rope Lay Assemblies

Aluminum flexible rope lay assemblies are designed to connect to aluminum or copper pads. Pads conform to NEMA standards. Lengths other than those shown can be supplied if required. Current ratings are based on 30°C rise over 40°C ambient.

Material

Aluminum Alloy

Ordering Instructions

1. Determine the catalog number by terminal arrangement and current rating required. Ex: For 90° terminals at 1660 amperes, the catalog number is: 15960.
2. For pad sizes and location of holes, note letter in catalog number and refer to page 3 of the Substation Accessories catalog.

Material

Aluminum Alloy

Notes

1. Add "U" for undrilled. Ex: WP2C35-2NU-AA
2. Add "F" for finished on both sides
3. For a 30° add suffix'-30', for a 45° add suffix'-45', and for a 90° add suffix '-90'. You must also add an 'A' after WP2C.
4. For a 350 MCM cable, with a 4 hole pad finished on both sides, with a 45° angle use WP2CA35-4NF-45-AA.

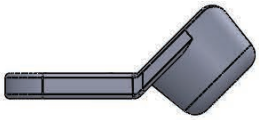

WP2CA-N-45-AA

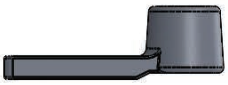

WP2C-N-AA

WP2CA-N-30-AA

WP2CA-N-45-AA

WP2CA-N-90-AA

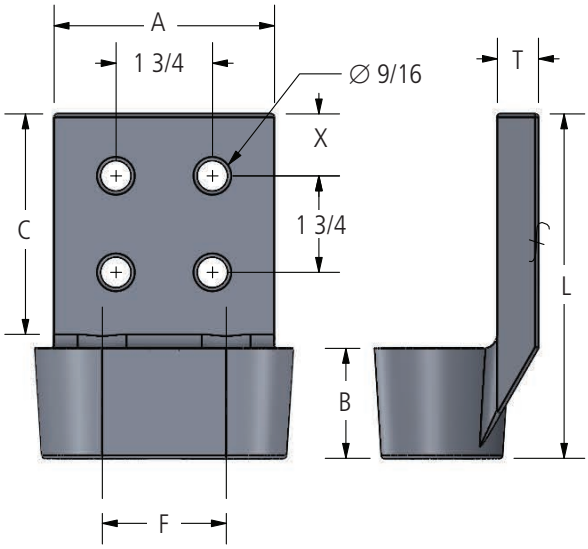

FIG. 2

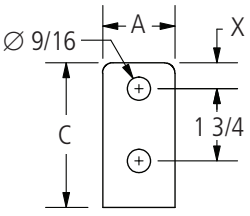

FIG. 1

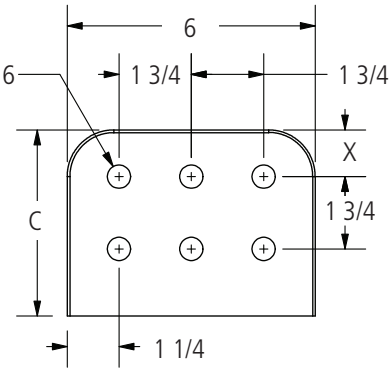

FIG. 3

AFL's Dossert® product line offers a wide range of substation accessories in low voltage up to 765 kV applications in bronze or aluminum materials.

AFL's Dossert® product line offers a wide range of substation accessories in low voltage up to 765 kV applications in bronze or aluminum materials.

© 2011, AFL, all rights reserved. PP-3-00569, Revision 3, 1.9.2025
Specifications are subject to change without notice.

TYPE WTPO-N-AA, WTPOA-N-45-AA, WTPOA-N-90-AA

WTPO-N-AA flush half sleeve welded terminal, WTPOA-N-45-AA flush 45° half sleeve welded terminal, and WTPOA-N-90-AA flush 90° half sleeve welded terminal.

WTPO-N-AA

WTPOA-N-90-AA

Material

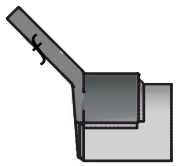

Aluminum Alloy

Notes

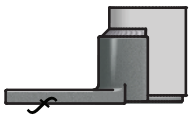

1. To specify contact finish on top surface of pad in addition to bottom surface add letter "F" to the catalog number. Ex: 2NF - 4NF - 4N4F.
2. For a 45° flush half sleeve terminal, 2" SPS, and 4", 4 hole NEMA pad order: WTPOA200-4N4-45-AA.
3. For a 90° flush half sleeve terminal, 2" SPS, and 4", 4 hole NEMA pad finished on both sides order: WTPOA200-4N4F-90-AA.

Substation straight terminals are designed for limited space applications as found in substations. Terminals are shorter than conventional terminals which saves space and allows for faster installation. Terminals are installed with standard AFL hex dies. Terminals can be supplied pre filled if required.

Type 5000 Series

The 5000 Series Jumper Connector is designed for AAC conductors. The jumper connector is fabricated from AFL seamless drawn aluminum. All jumper connectors are designed for limited tension use, maintaining a minimum of 40% of the ASTM rated strength of the conductor on which it is being used.

S5600-45 Series, S5800 Series Terminal Connectors

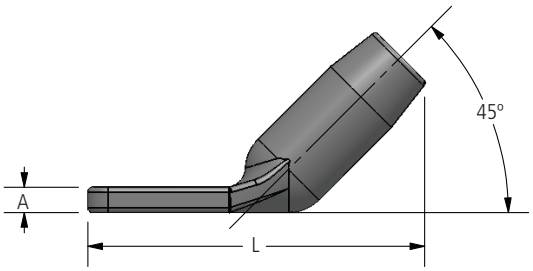

The S5600-45, S5800 Series Terminal Connector is designed for ACSR and AAC conductors. The terminal is fabricated from ACA seamless drawn aluminum.

Notes

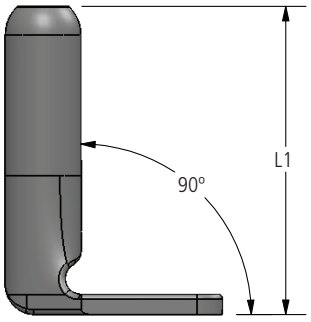

Other pads sizes can be custom ordered.

TYPE PSD-V-AA, PSD-V-CH-AA
Bolted Bus Support, Pipe, Slide or Tight Fit

Double ring support is designed to be corona free for 345 kV and 500 kV service. Support is designed to be slip or tight fit depending on top caps.

Material
Aluminum Alloy

Hardware
Galvanized steel bolts and lockwashers for mounting.

Yellow anodized aluminum bolts, nuts, and lockwashers.

Notes

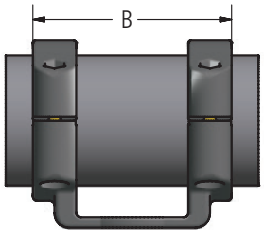

- For Grade Five galvanized steel hardware, add "-GS5" to catalog number. EX: PSD400-7-V-AA-GS5

AFL's Dossert® product line offers a wide range of substation accessories in low voltage up to 765 kV applications in bronze or aluminum materials.

© 2011, AFL, all rights reserved. PP-3-00408, Revision 7, 2.24.2026
Specifications are subject to change without notice.

TYPE HPS-HV-AA

Hook support is designed to be corona free for 345 kV and 500 kV service. Support is designed for slip or tight fit applications; for tight fit application bus is field welded to support.

Material

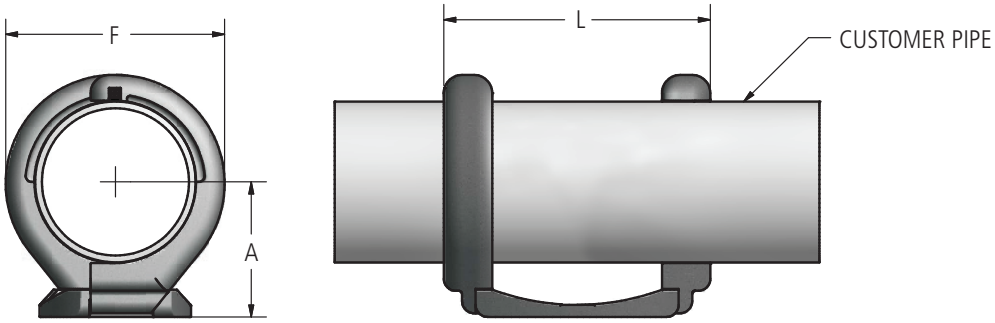

Aluminum Alloy

Mounting Hardware

Galvanized steel bolts and lockwashers.

Notes

Weld in field for rigid support.

Specifications are subject to change without notice.

DOSSERT®
TYPE WPSSL-V-AA
Aluminum Welded Bus Support, Slide or Fixed Type

Pipe or bus tube is welded to support. Designed for 500 kV service. The support is then bolted directly into the insulator. Bolt sleeves allow the whole support to slide on the insulator. Bolt sleeves for rigid fix support can be ordered.

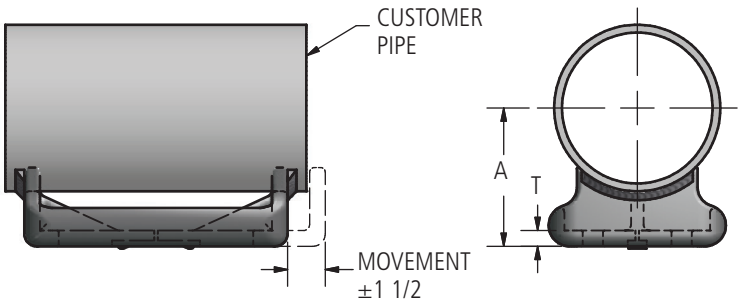

Material
Aluminum Alloy

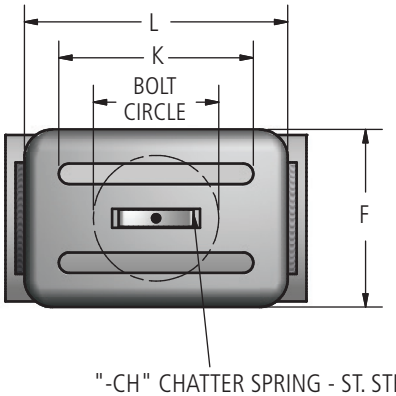

Mounting Hardware
Galvanized steel bolts and lockwashers.

Notes
Add "-R" to catalog number for rigid fit order: WPSSL300-5-R-V-AA

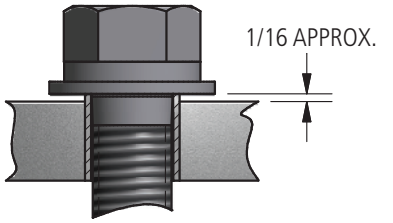

Add "-SR" for slip and rigid fix order: WPSSL300-5-SR-V-AA

For chatter spring add "-CH" to catalog number order: WPSSL300-5-CH-V-AA

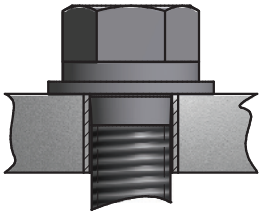

"-CH" CHATTER SPRING - ST. STEEL
(FOR ASSEMBLY TYPE 1 ONLY)

SLIDE BUS SUPPORT
ASSEMBLY 1

RIGID FIXED BUS SUPPORT
ASSEMBLY 2

AFL's Dossert® product line offers a wide range of substation accessories in low voltage up to 765 kV applications in bronze or aluminum materials.

DOSSERT®
TYPE 34700 EHV

Welded Vertical Bus Support

Vertical end support is designed to be corona free for 345 kV and 500 kV service. Slotted bolt holes in base provide for misalignment of insulator.

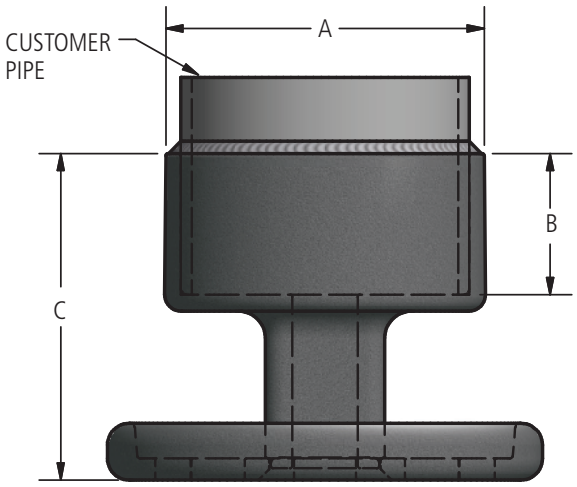

Material

Aluminum Alloy

Mounting Hardware

Galvanized steel bolts and lockwashers.

345/500 kV Bus Supports

DOSSERT®

TYPE WXBC-V-AA

Welded Expansion Bus Support Rated for 345 kV

Material

Aluminum Alloy

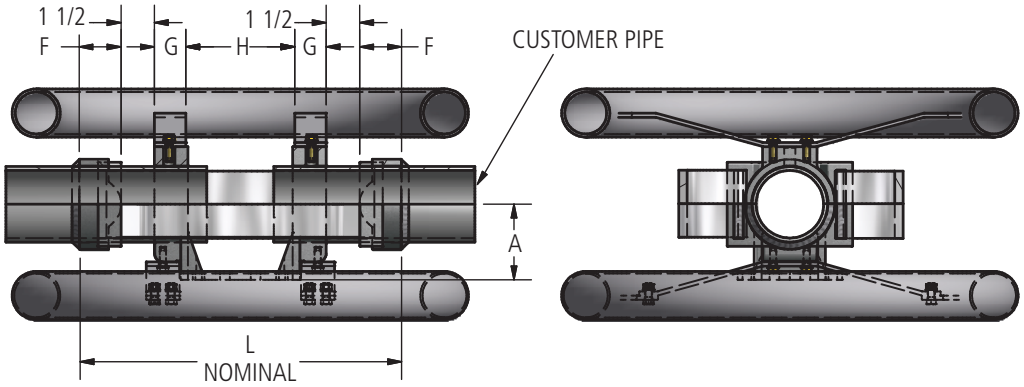

Hardware

Galvanized steel mounting hardware included. Stainless steel bolts, lockwashers, and flatwashers.

Notes

For chatter spring add "-CH" to catalog number, order: WXBC500-5-V-CH-AA.

For end plugs add "-WP" to catalog number, order: WXBC500-5-V-AA-WP.

TYPE C2SWB-V-AA Cable Support Clamp

Two-conductor strain bus support is designed to be corona free for 500 kV service.

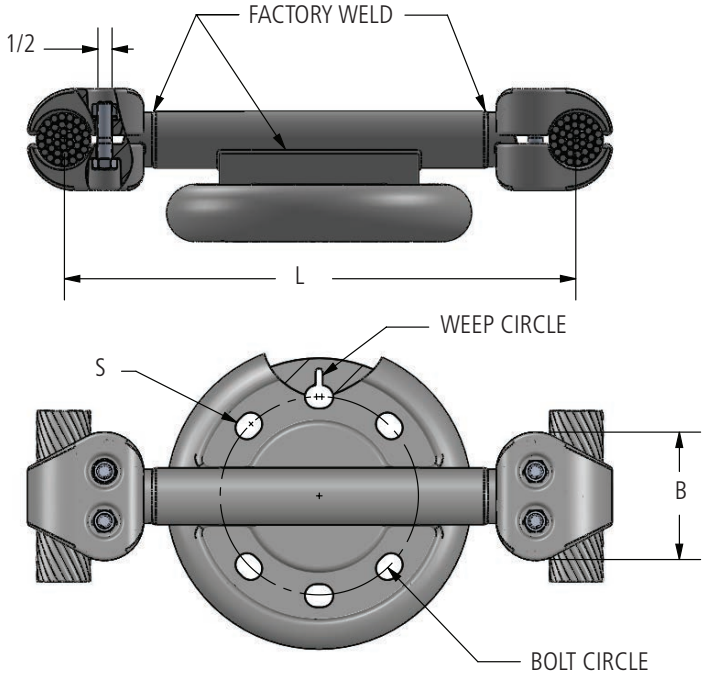

Material
Aluminum Alloy

Hardware
Aluminum bolts, lockwashers and nuts.

Mounting Hardware
Galvanized steel bolts and lockwashers.

Notes

1. For Stainless Steel Hardware, add "-SS" to catalog number. Example: C2SWB360-8-2-V-AA-SS
2. For Stainless Steel Bolts, Lockwashers and Everdur nuts, add "-SSHBN" to catalog number. Example: C2SWB250-8-5-V-AA-SSHBN

AFL's Dossert® product line offers a wide range of substation accessories in low voltage up to 765 kV applications in bronze or aluminum materials.

TYPE 15700 EHV Support, Bolted, Slip & Fixed

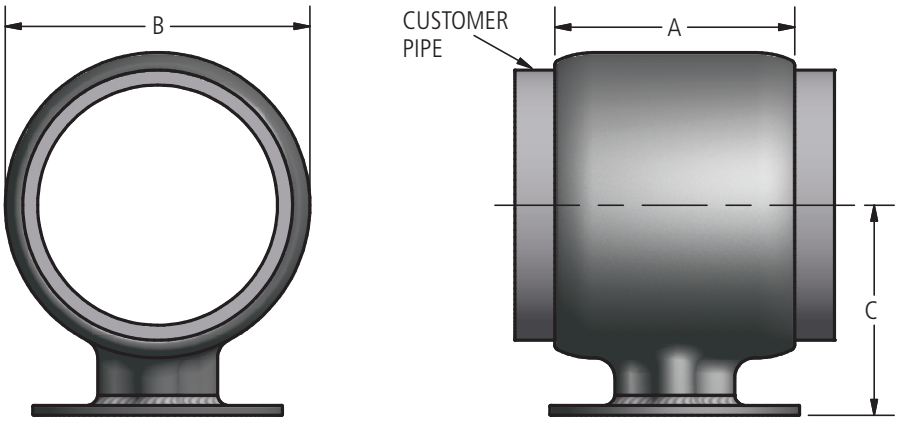

Single ring support is designed to be corona free for 345 kV and 500 kV service. Support is designed to be slip or tight fit; for tight fit bus is field welded to support. Stainless steel chatter springs are supplied as standard item for slip fit applications.

Material

Aluminum Alloy

Mounting Hardware

Galvanized steel bolts and lockwashers.

TYPE 32800 EHV Support, Bolted, Wave Trap-Type

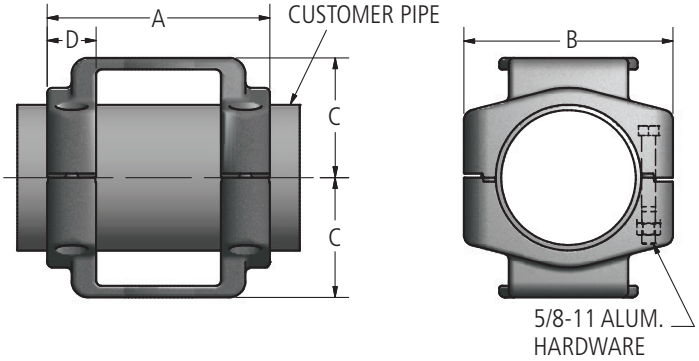

Wave trap support is designed to be corona free for 345 kV and 500 kV service. Support is combination wave trap support and tight fit bus support designed with standard bolt circle pattern on top and bottom mounting surfaces. Support is supplied with bus clamp hardware and two sets of insulator mounting hardware. Distance from the centerline of the bus to top and bottom mounting surfaces is standard NEMA center line distance.

Material
Aluminum Alloy

Mounting Hardware
Galvanized steel bolts and lockwashers.

Hardware
Yellow anodized aluminum bolts, nuts, and lockwashers.

TYPE 35700 EHV

Expansion support is designed to be corona free for 500 kV service. Rope lay expansion provides for 2.6" (66 mm) of expansion or contraction. Dimension "D" shown is for an installation temperature of 68° F (20° C). For other installation temperatures, see the General Information Section on page 11 in the Substation Accessories catalog. Stainless steel chatter springs are supplied; weld end plugs can be supplied if required.

Material

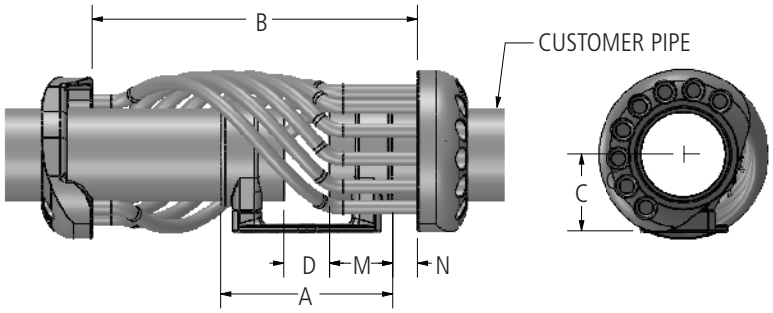

Aluminum Alloy

Mounting Hardware

Galvanized steel bolts and lockwashers.

Notes

- For end plugs, add "-WP" to catalog number for Schedule 40 pipe, "-WPE" for Schedule 80. EX: 35712-7EHV-WPE.

345/500 kV Aluminum Welded Couplers

DOSSERT®

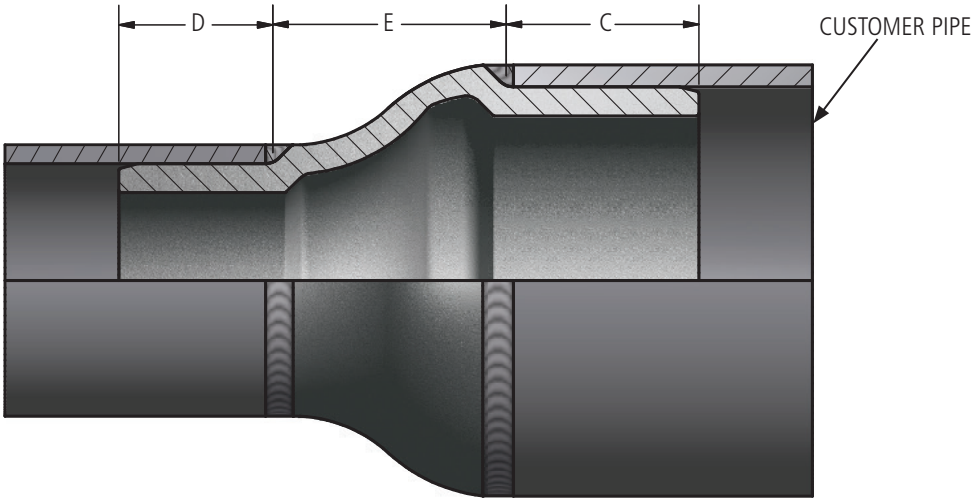

TYPE WWCR-V-AA

Welded Reducing Coupler

Reducing coupler for joining aluminum pipe of different diameters. Designed to be corona free for 500 kV service. Provides maximum structural reinforcement at the joint as well as neat and corona free installation. Pipe is easily aligned and held during welding.

Material

Aluminum Alloy

DOSSERT®

TYPE 1705-EHV, 1706-EHV

Internal and External Vibration Damper

Internal and external damper is designed to be corona free (see chart below for voltage ratings). Internal damper is designed to be welded inside bus, to be corona free, and to present a "clean" appearance to the substation. External damper is to be bolted to outside of tube. External damper can be installed during construction or at a later time to correct vibration problems not originally anticipated.

1705-EHV

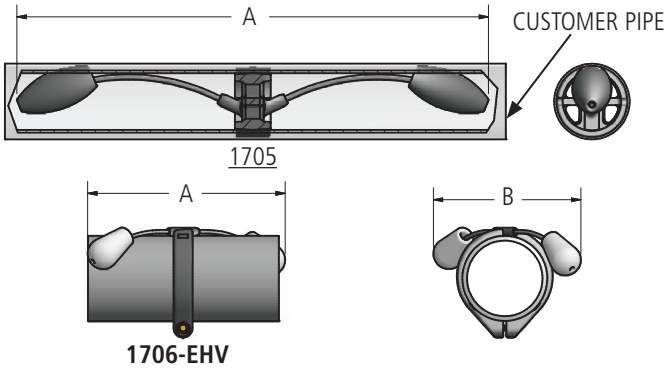

1706-EHV

Material

Aluminum Alloy

Hardware

Aluminum nuts, bolts, and lockwashers.

DOSSERT®
TYPE PFTS-N-V-AA

Bolted Pipe Tee to Four-Hole Pad

A clamp type tee connector for joining a bus to a tubular bus main. Special bearing surfaces insure maximum contact efficiency. Designed for 345 kV and 500 kV service.

Material

Aluminum Alloy

Hardware

Yellow anodized aluminum nuts, bolts, and lockwashers.

Notes

- For Terminal Pad Hardware Shield, add "-CSBV" to catalog number.
  EX: PFTS250-4N4-V-AA-CSBV
- For Grade Five Galvanized Steel Hardware, add "-GS5" to catalog number.
  EX: PFTS600-4N4-V-AA-GS5
- For Stainless Steel bolts, lockwashers and Everdur nuts, add "-SSHB" to catalog number.
  EX: PFTS600-4N4-V-AA-SSHBN

DOSSERT®

TYPE WVBP-20-V-AA, WVBP-30-V-AA

Angle Welded Vee and Welded Tee Connector

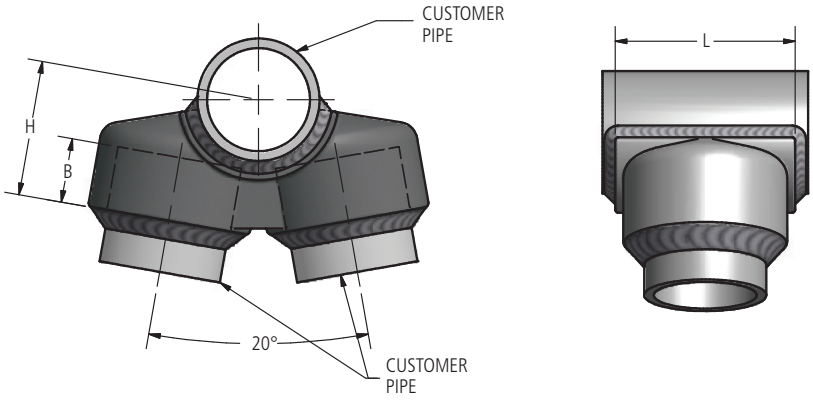

Welded A-frame connectors are designed to be corona free for 345 kV and 500 kV service. Connectors are designed to be welded on outside of pipe allowing use on both schedule 40 and schedule 80 pipe. Socket design allows for slight inaccuracies in field cut length of pipe.

DOSSERT®

TYPE BPC-V-AA

Bolted Tee, Pipe to Cable

A clamp type tee connector for joining a cable to a tubular bus main. Designed to be corona free for 345 kV and 500 kV service. Special bearing surfaces insure maximum contact efficiency.

Material

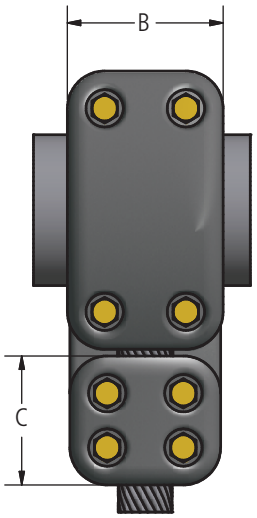

Aluminum Alloy

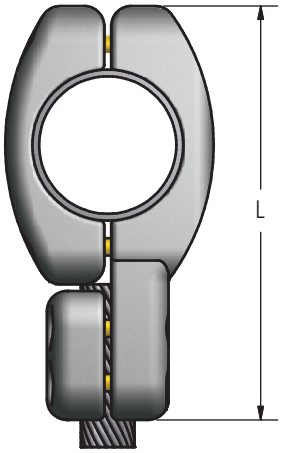

Hardware

Yellow anodized aluminum nuts, bolts and lockwashers.

Notes

- For stainless steel bols, lockwashers and Everdur nuts, add "-SSHBN" to catalog number.
  EX: BPC600-127-V-AA-SSHBN
- For grade five galvanized steel hardware, add "-GS5" to catalog number. EX: BPC600-127-V-AA-GS5

DOSSERT®

TYPE CFT-N-V-AA

Cable to Flat Tee Connector

Bolted tap is designed to be corona free for 345 kV and 500 kV operation when pad covers are used to shield terminal hardware.

Material

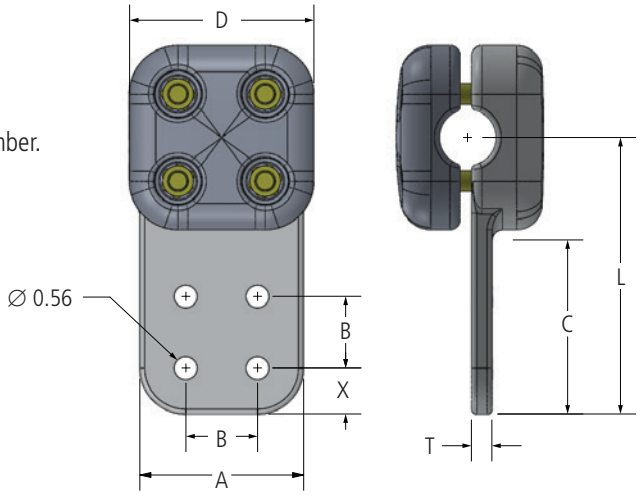

Aluminum Alloy

Hardware

Aluminum nuts, bolts and lockwashers.

Notes

- For Finished Surface on both sides of Pad, add "F" to catalog number.
  EX: CFT79-4N4F-V-AA
- For Grade Five Galvanized Steel Hardware, add "-GS5" to catalog number.
  EX: CFT79-4N4-V-AA-GS5
- For Hardware Shield, add "-CSBV" to catalog number.
  EX: CFT79-4N4-V-AA-CSBV

TYPE WT3C-8-V-AA

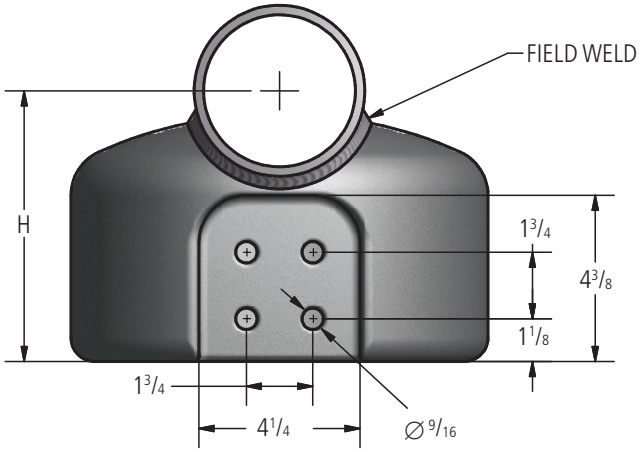

Welded Tee Pipe to Three NEMA Pad

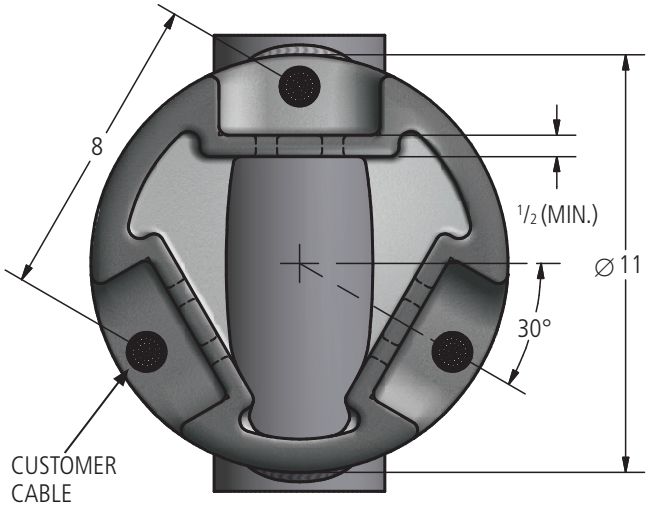

Welded tee pipe with three NEMA pads is designed to be corona free for 345 kV and 500 kV service.

Material

Aluminum Alloy

DOSSERT®
TYPE 3500-EHV

Tee Adapter

Bolted-compression tee adapters are designed to have better corona characteristics than the conductors on which it is installed. Designed to be corona free for 345 kV and 500 kV service. Contact surfaces are protected with oxide inhibitor.

Material

Aluminum Alloy

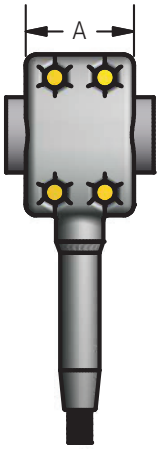

Mounting Hardware

Galvanized steel bolts and lockwashers.

Hardware

Yellow anodized aluminum bolts, nuts, and lockwashers.

Notes

Connector is ordered by combining partial catalog number for pipe run (Table 1) with partial catalog number for stranded branch (Table 2).

Example: 6" SPS run to 1590 KCM (1.454") tap. Order by Cat. No. "3513.3-38.156EHV"

DOSSERT®

TYPE BC-V-AA

Tee Connector

Tee connector is designed to be corona free for 500 kV service.

Material

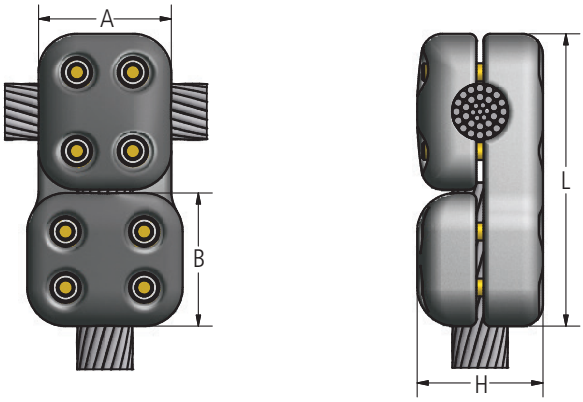

Aluminum Alloy

Hardware

Yellow anodized aluminum nuts, bolts, and lockwashers.

Notes

- For Stainless Steel bolts, lockwashers and Everdur nuts, add "-SSHBN" to catalog number.
  EX: BC103-127-AA-SSHBN
- For Grade Five Galvanized Steel hardware, add "-GS5" to catalog number.
  EX: BC140-140-V-AA-GS5

DOSSERT®

TYPE 34900-EHV

Welded Straight Adapter

Bi-conductor and tri-conductor adapter is designed to be corona free for 345 kV and 500 kV service. Conductor adapters are furnished as complete assembly consisting of the conductor adapter, 90° EHV compression terminals and necessary aluminum hardware. Weights shown do not include compression terminals.

34928-EHV

34908-EHV

Material

Aluminum Alloy

Mounting Hardware

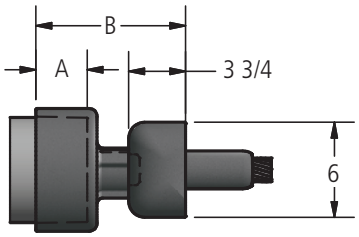

Galvanized steel bolts and lockwashers.

Hardware

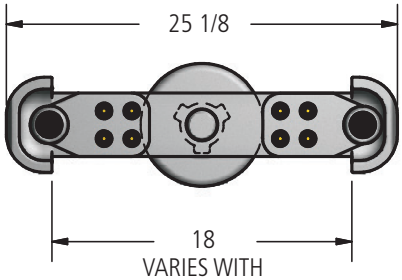

Yellow anodized aluminum bolts, nuts, and lockwashers.

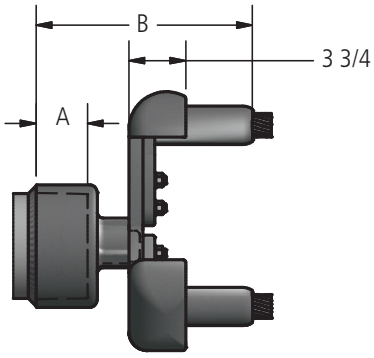

Notes

For conductor adapters without terminals, do not include Die Size or Bore Code in part number. Example: for a tri-conductor adapter to 6" SPS, order 34913EHV.

DOSSERT®

TYPE 34992-EHV, 34993-EHV

Welded Tee Adapter

Bi-conductor tee adapter is designed to be corona free for 345 kV and 500 kV service. Bi-conductor tee adapter is furnished as complete assembly consisting of bi-conductor adapter, two 90° EHV compression terminals and necessary aluminum hardware. Complete assembly is ordered by specifying catalog number and size of stranded conductor.

Material

Aluminum Alloy

Mounting Hardware

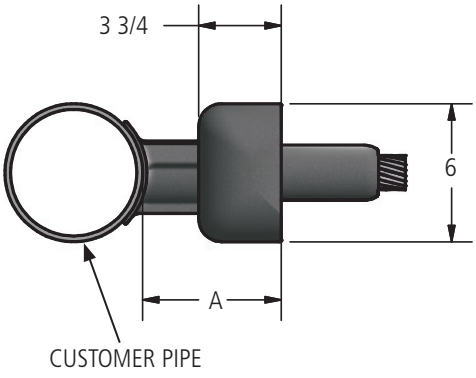

Galvanized steel bolts and lockwashers.

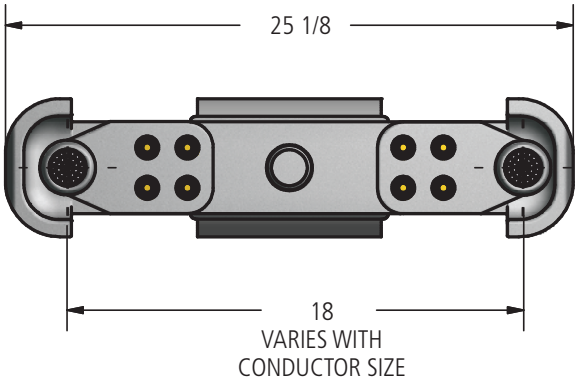

Hardware

Yellow anodized aluminum bolts, nuts, and lockwashers.

Notes

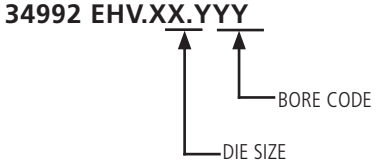

For conductor adapters without terminals, do not include Die Size or Bore Code in part number. Example: for a Bi-conductor adapter to 6" SPS, order 34993EHV.

DOSSERT®

TYPE 34996-EHV, 34997-EHV

Welded Tee Adapter

Tri-conductor tee adapter is designed to be corona free for 345 kV and 500 kV service. Tri-conductor tee adapter is furnished as complete assembly consisting of tri-conductor adapter, three 90° EHV compression terminals and necessary aluminum hardware. Weights shown do not include compression terminals.

34996-EHV

34997-EHV

Material

Aluminum Alloy

Mounting Hardware

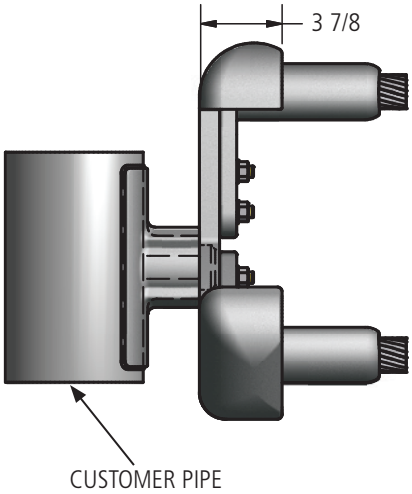

Galvanized steel bolts and lockwashers.

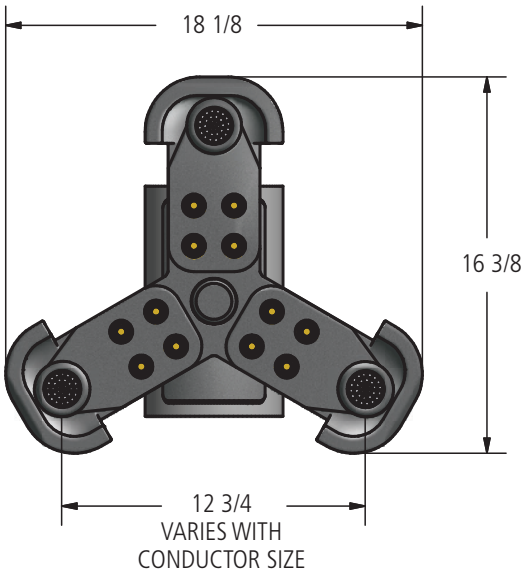

Hardware

Yellow anodized aluminum bolts, nuts, and lockwashers.

Notes

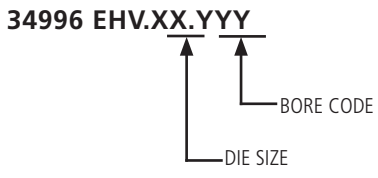

For conductor adapters without terminals, do not include Die Size or Bore Code in part number. Example: for a Tri-conductor adapter to 6" SPS, order 34997EHV.

DOSSERT®
TYPE A-Frame Assemblies

Welded (Tube)

AFL can supply prefabricated A-frame assemblies ready for field mounting and welding. Assemblies are factory fabricated from standard A-frame fittings and pipe carefully welded and inspected to insure accuracy and best performance.

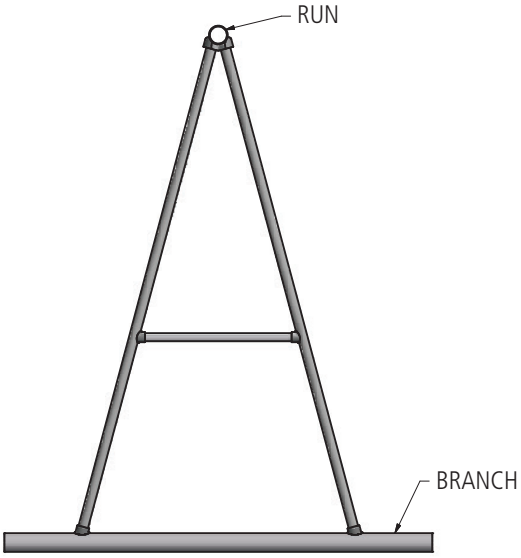

A-frame fittings are designed to make fast, reliable A-frame assemblies. Fittings are designed to be welded on the outside of the pipe allowing use of both Schedule 40 and Schedule 80 pipe. Socket design allows for slight inaccuracies in field cut length of pipe.

A-Frame Assemblies

Notes

For bus conductor information, see AFL Bus Conductor catalog.

Ordering Information

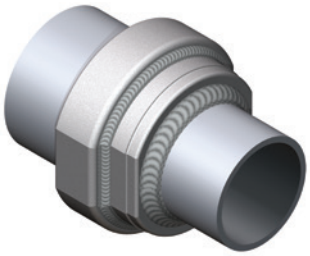

To order, contact customer service with angle, top and bottom run sizes, leg size, centerline height and crossbrace size and spacing if required.

Specifications are subject to change without notice.

DOSSERT®
TYPE 15100-EHV

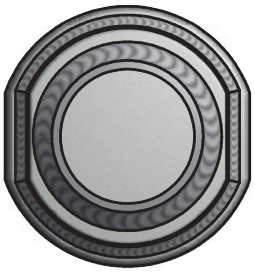

Reducer Connector for Pipe

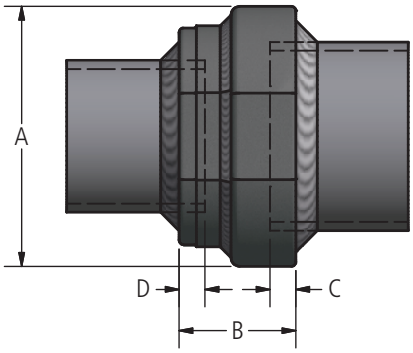

Reducer connector is designed to connect unequal pipe sizes with minimum amount of trouble. Designed for 345 kV and 500 kV service. Connector is welded on outside of pipe allowing use on both schedule 40 and schedule 80 pipe.

Material

Aluminum Alloy

DOSSERT®
TYPE 14700-EHV

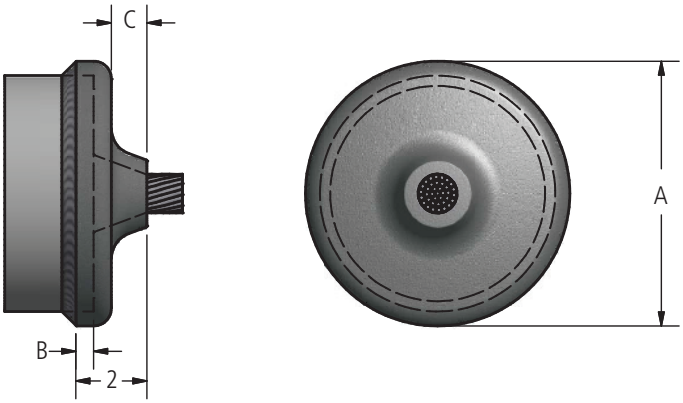

Straight Adapter Tube to Cable

Adapter is designed to make inline connection between pipe and stranded cable. Designed for 345 kV service. Cable is "puddle" welded to connector; connector is then welded to tube. Not recommended for use on ACSR conductors due to difficulty welding steel core.

Material

Aluminum Alloy

DOSSERT®

TYPE WXL-V-AA, WXL-HV-AA

Expansion Terminal Connector

Expansion terminals are to be corona free for 345 kV and 500 kV service. Aluminum terminals can be connected to aluminum or copper terminals. Laminated straps provide for 1.75" (44.5 mm) expansion or contraction. Static steel static eliminator springs are are supplied for slip fit end of corona ring assembly.

Material

Aluminum Alloy

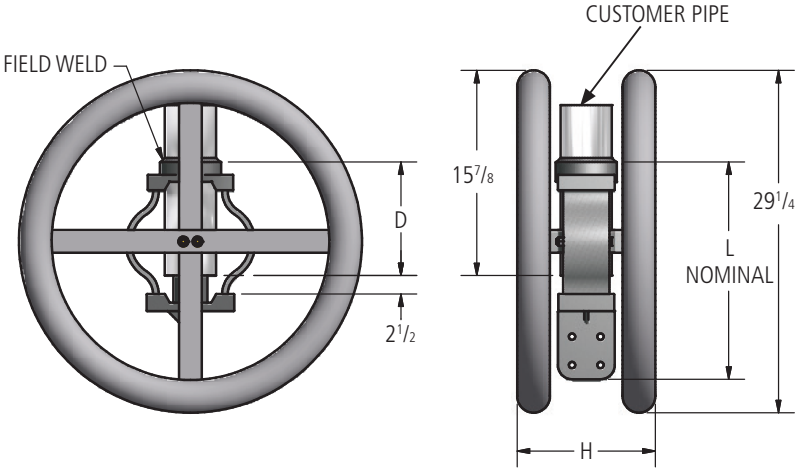

Hardware

Yellow anodized aluminum bolts, nuts, and lockwashers.
Stainless steel bolts, nuts, and lockwashers.

Notes

If hardware sheild is required add -CSBV-to catalog
Example: WXL500E-4N4-V-AA-CSBV

For SCH 80 bus pipe, add "E" to catalog number.
Example: For 4 in SCH 80 bus pipe to 4 hole 4 in NEMA pad order: WXL400E-4N4-V-AA.

DOSSERT®

TYPE TC-N-V-AA, T2C-N-V-AA, TCA-N-V-AA,T2CA-N-V-A

Bolted Cable Terminal

Bolted terminal for connection to cable with NEMA Pad.

TC-N-V-AA

Material

Aluminum Alloy

Hardware

Yellow anodized aluminum nuts, bolts, and lockwashers.

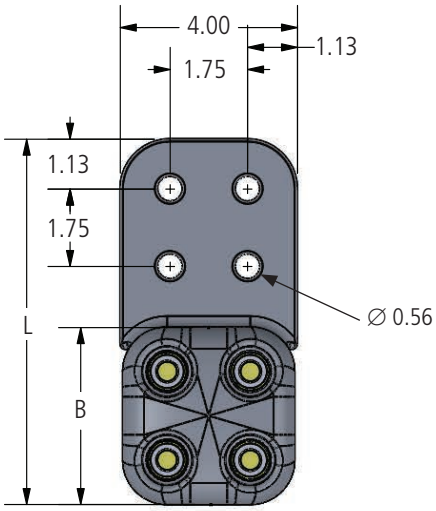

T2C-N-V-AA

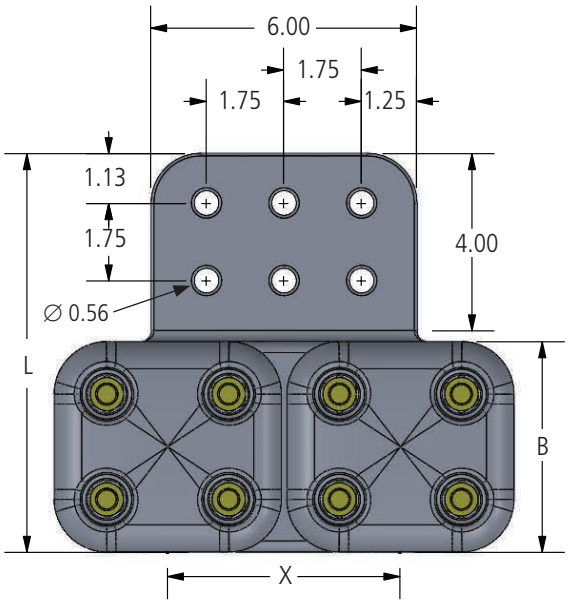

Notes

- For Stainless Steel Hardware add "-SS" to catalog number. Example: T2C300-4N4-V-AA-SS
- For Stainless Steel bolts, lockwashers and Everdur nuts add "-SSHBN" to catalog number. Example: T2C300-4N4-V-AA-SSHBN
- For Grade Five Galvanized Steel Hardware add "-GS5" to catalog number. Example: TCA127-4N4-90-V-AA-GS5
- For Hardware Shield add "-CSBV" to catalog number. Example: T2C127-4N4-V-AA-CSBV
- For Angled Pad add "A" to prefix and angle to catalog number. Example: TCA127-4N4-90-V-AA
- For "X" dimensions larger than listed, add spacing to the catalog number. Example: T2C300-4N4-6-V-AA
- Custom pad thicknesses are available.

DOSSERT®
TYPE 34200E-EHV

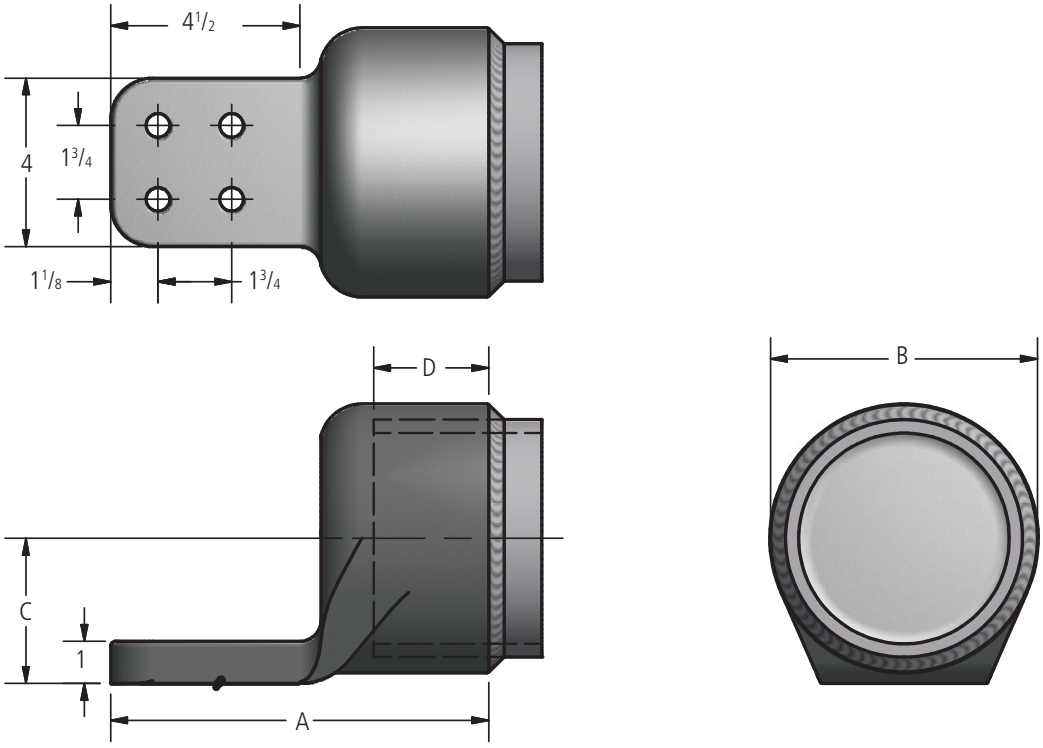

Terminal Connector, Welded, Offset

Terminal is designed to be corona free for 345 kV and 500 kV service when pad covers are used to shield terminal hardware. Pad covers are not supplied with terminal; see catalog 4040 EHV pad covers on page 514. Aluminum terminal can be connected to aluminum or copper terminals.

Material

Aluminum Alloy

DOSSERT®

TYPE 34994E-EHV, 34995E-EHV

Bi-conductor and tri-conductor terminal is designed to be corona free for 345 kV and 500 kV service. Aluminum terminal can be connected to aluminum or copper terminals; pad conforms to NEMA standards. Bi-conductor and tri-conductor terminal is furnished as a complete assembly consisting of Bi-conductor and Tri-conductor terminals, two 90° EHV compression terminals and necessary aluminum hardware. Weights shown do not include compression terminals.

DOSSERT®

TYPE 34999E-EHV

Compression Terminal Connector (Three Cables to Flat)

Tri-conductor terminal is designed to be corona free for 345 kV and 500 kV service. Aluminum terminal can be connected to aluminum or copper terminals, pad conforms to NEMA standards. Tri-conductor terminal is furnished as complete assembly consisting of tri-conductor terminal, three 90° EHV compression terminals and necessary aluminum hardware. Complete assembly is ordered by specifying catalog number and size of stranded conductor.

Material

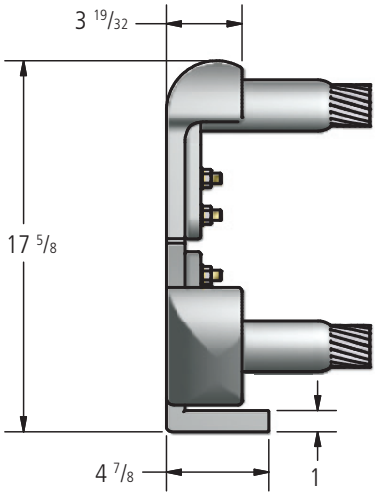

Aluminum Alloy

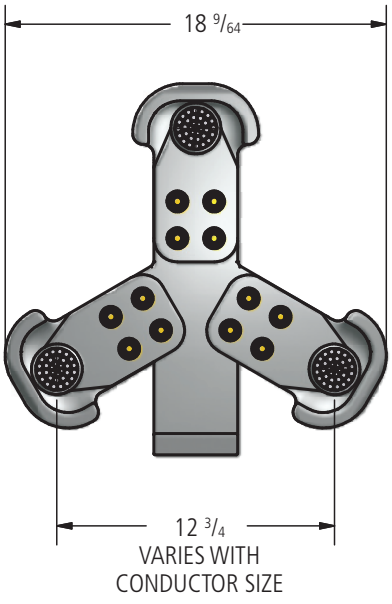

Hardware

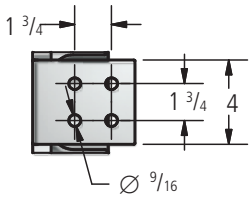

Yellow anodized aluminum nuts, bolts, and lockwashers.

Notes

For conductor adapters without terminals, do not include Die Size or Bore Code in part number. Example: for a Tri-conductor adapter to E pad, ORDER: 34995EEHV.

DOSSERT®
TYPE 38900-EHV

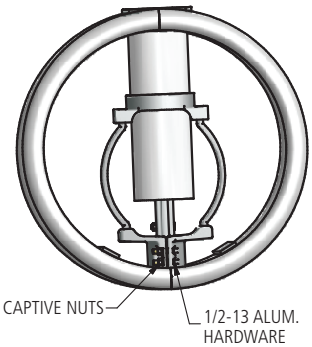

Expansion stud connector is designed to be corona free for 345 kV and 500 kV service. Laminated straps provide for 1.75" (44.5mm) expansion or contraction. Stainless steel static elimiator springs are supplied for slip fit end of corona ring assembly. Dimension "D" shown in illustration is for installation temperature of 68°F (20°C); for other installation temperatures, see Index/General Info section.

Material
Aluminum Alloy

Hardware
Yellow anodized aluminum nuts, bolts, and lockwashers.

DOSSERT®

TYPE 35400, 35500

WeldElbows are designed to be corona free for 345 kV and 500 kV service. Elbow is designed to be welded on outside of pipe allowing use on both schedule 40 and schedule 80 pipe. Socket design allows for slight inaccuracies in field cut length of pipe.

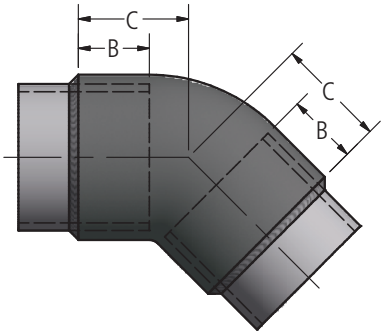

35400

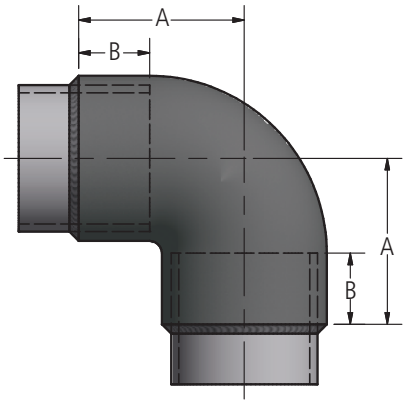

35500

Material

Aluminum Alloy

DOSSERT®
TYPE 34600-EHV

Bolted ground stud is designed to be corona free for 345 kV and 500 kV service as noted in table. Bolted design provides ease of removal for future expansion or relocation.

Material

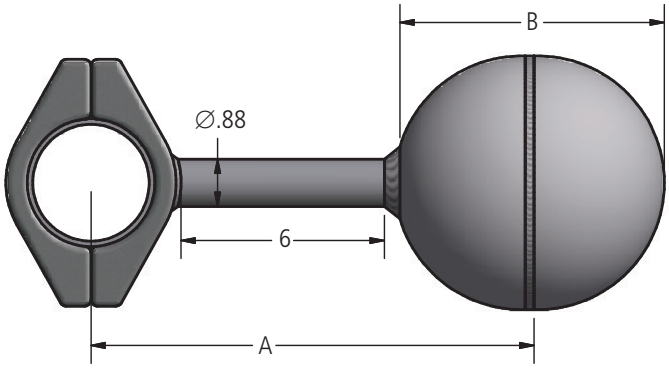

Aluminum Alloy

Hardware

Yellow anodized aluminum bolts, nuts, and lockwashers.

Notes

- For Stainless Steel bolts, lockwashers and Everdur nuts, add "-SSHBN" to catalog number. EX: 34668EHV-SSHBN

Cable Spacer for Two Cables with Four-Hole NEMA Tap

Spacer is designed to be corona free for 500 kV service. Spacer is supplied with break-away head bolts to ensure correct installation. Not for full load tap. For lightning arresters and other Metering taps.

CAS-N-V-AA

CAS-N-90-V-AA

Material

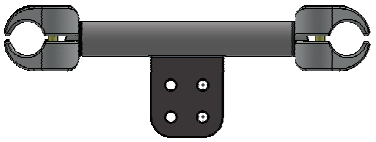

Aluminum Alloy

Hardware

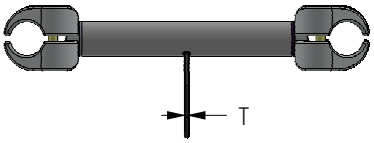

Aluminum bolts, lockwashers and nuts

Notes

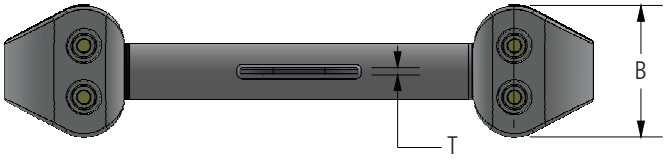

- For Stainless Steel bolts, lockwashers and nuts, add "-SSHBN" to catalog number. EX: CAS78-18-4N4-90-V-AA-SSHBN
- For a 90° terminal, add suffix "-90" to catalog number. EX: CAS79-18-4N4-90-V-AA

DOSSERT®
TYPE 38100-EHV

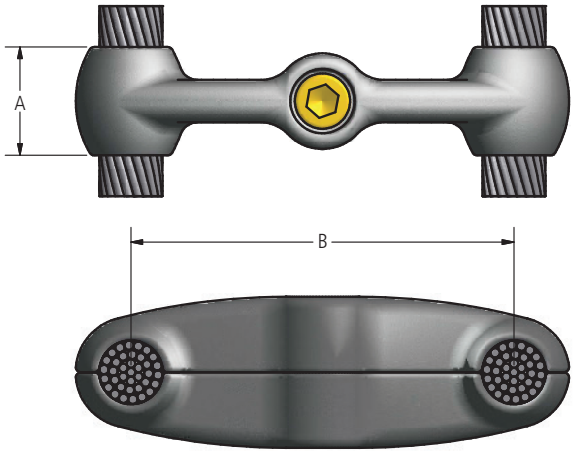

Spacer is designed to be corona free for 345 kV service. Single bolt spacer is supplied for 6.5" and 8" centerline spacing.

Material

Aluminum Alloy

Hardware

Yellow anodized aluminum bolts, nuts, and lockwashers.

DOSSERT®

TYPE 38400-EHV, 38500-EHV

Spacers (Cable) Recommended for Voltages up to 500 kV

Bi-spacer is desigend to be corona free for 345 kV service for conductors through 1.5" diameter and 500 kV for larger diameter conductors. Tri-spacer is desgined to be corona free for 500 kV service. Bi-spacer is companion to 38200 series support. Tri-spacer is companion to 38300 series. Rigid spacers are not recommended for use on transmission lines.

38400-EHV

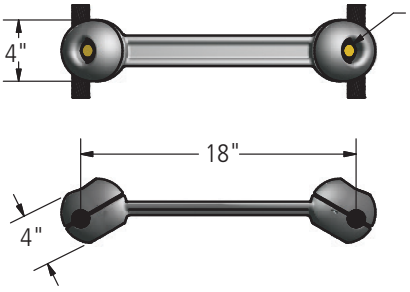

38500-EHV

Material

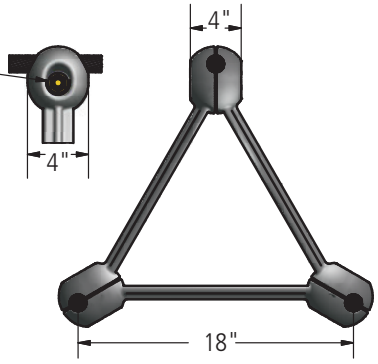

Aluminum Alloy

Hardware

Yellow anodized aluminum bolts, nuts, and lockwashers.

DOSSERT®
TYPE 38300-EHV

Spacers (Cable) Recommended for Voltages up to 500 kV

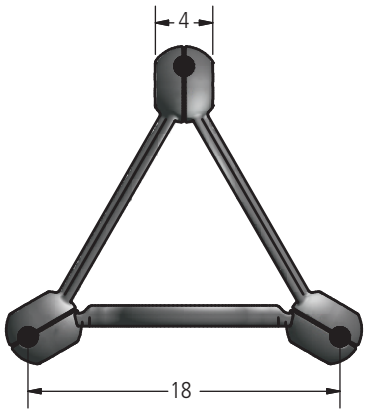

Three-Conductor strain bus support is designed to be corona free for 500 kV service. Support is companion to 38500 series tri-spacer.

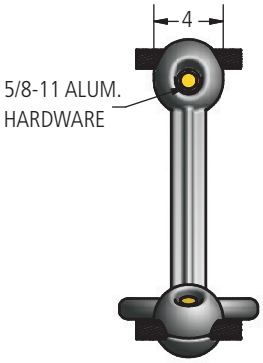

Material

Aluminum Alloy

Mounting Hardware

Yellow anodized aluminum bolts, nuts, and lockwashers.

TYPE 5000-EHV

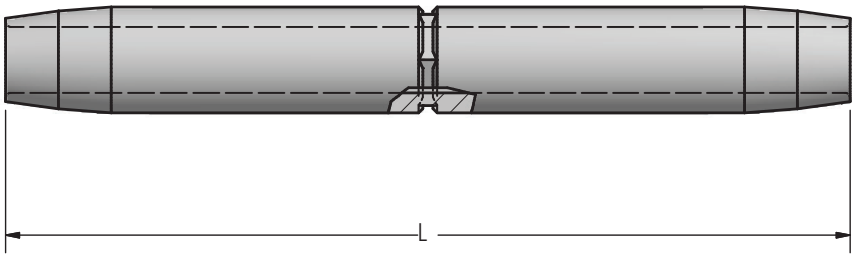

Jumper Connector-Compression

The 5000 Series Jumper Connector is designed for AAC conductors. The jumper connector is fabricated from AFL seamless drawn aluminum. All jumper connectors are designed for limited tension use, maintaining a minimum of 40% of the ASTM rated strength of the conductor on which it is being used.

Material

Aluminum Alloy

Substation Compression Dead Ends for Stranded EC and ACSR Conductors

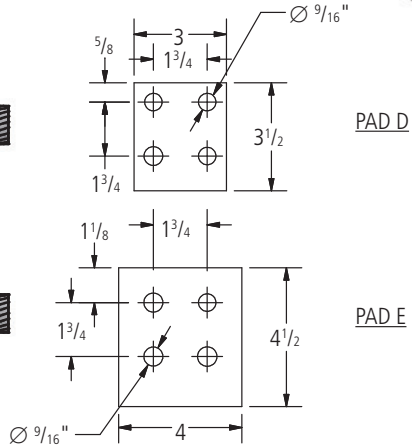

Substation dead end is designed for limited tension applications as found in substations. Designed for 500 kV service. Unique one piece design combines dead end barrel and terminal pad into single compact assembly. Dead end is installed with standard AFL hex dies. Terminal pad is standard NEMA pad size.

Material

Aluminum Alloy

DOSSERT®

TYPE S5600-45EHV, S5800EHV

Terminal Connectors

The S5600-45EHV, S5800EHV Series Terminal Connector is designed for ACSR and AAC conductors. Designed for 500 kV service. The terminal is fabricated from AFL seamless drawn aluminum.

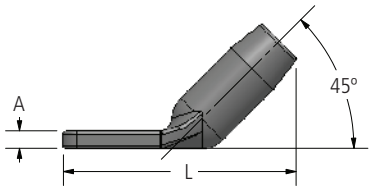

S5600-45EHV

Material

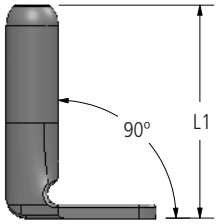

Aluminum Alloy

Notes

Other pad sizes can be custom ordered.

TYPE C2SWB-V-AA-HT

Cable Support Clamp – High Temperature

Two-conductor strain bus support is designed to be corona free for 500 kV service.

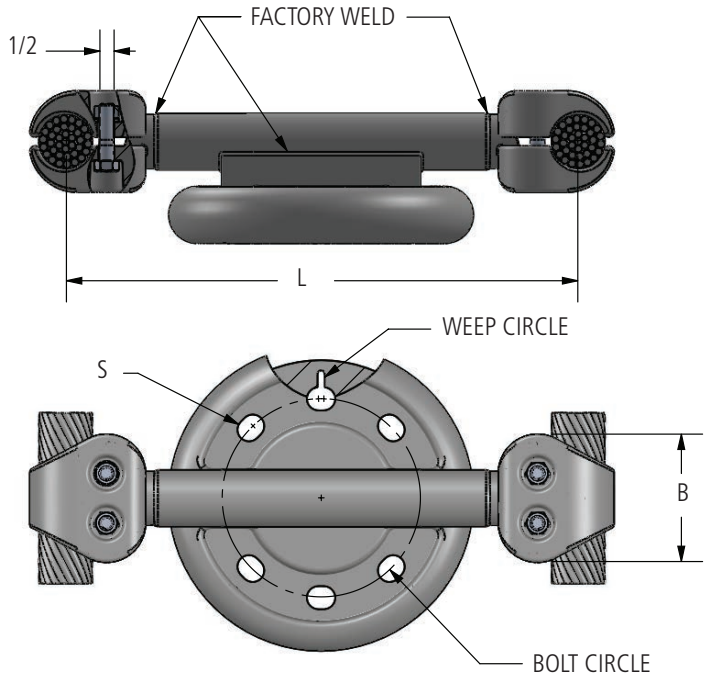

Material
Aluminum Alloy

Hardware
Aluminum bolts, lockwashers and nuts.

Mounting Hardware
Galvanized steel bolts and lockwashers.

Notes

1. Suitable for applications up to 250°C.
2. For Stainless Steel Hardware, add "-SS" to catalog number. Example: C2SWB360-8-2-V-AA-HT-SS
3. For Stainless Steel Bolts, Lockwashers and Everdur nuts, add "-SSHBN" to catalog number. Example: C2SWB250-8-5-V-AA-HT-SSHBN

AFL's Dossert® product line offers a wide range of substation accessories in low voltage up to 765 kV applications in bronze or aluminum materials.

TYPE 33800-EHV

Cable Support – High Temperature

Single conductor strain bus support is designed to be corona free for 345 kV service. Support is designed with universal groove to accept conductors with diameter from 1.545" to 2.158".

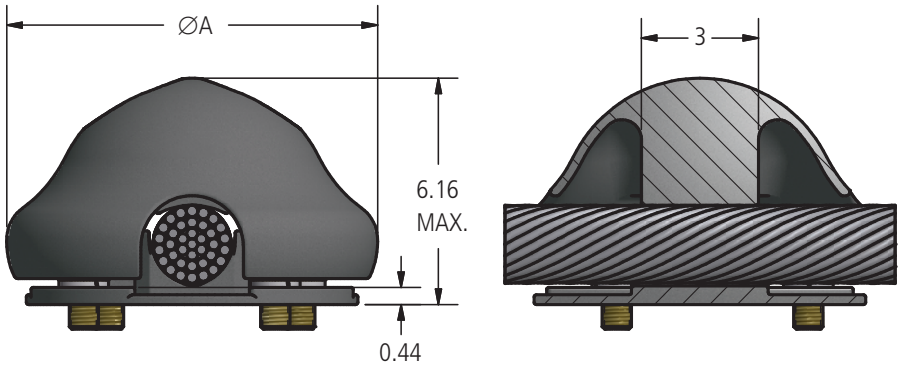

Material
Aluminum Alloy

Mounting Hardware
Galvanized steel bolts and lockwashers.

Hardware
Yellow anodized aluminum bolts, nuts, and lockwashers.

Notes

1. For use at high temperatures up to 250°C.

Ordering Information

Catalog Number	Conductor Diameter Range	Dimensions in inches	Nominal Weight lbs
		A	
5" Bolt Circle			
33805-5 EHV-HT	1.545 - 2.158	7.25	4.5
7" Bolt Circle			
33805-7 EHV-HT	1.545 - 2.158	9.5	6.6

CFTL-N-V-AA-HT

Cable to Flat Tee Connector – High Temperature

Bolted tap is designed to be corona free for 345 kV and 500 kV operation when pad covers are used to shield terminal hardware.

CFTL-N-A-AAA-HT

Material

Aluminum Alloy

Hardware

Stainless steel bolts, washers and Everdur nuts

Notes

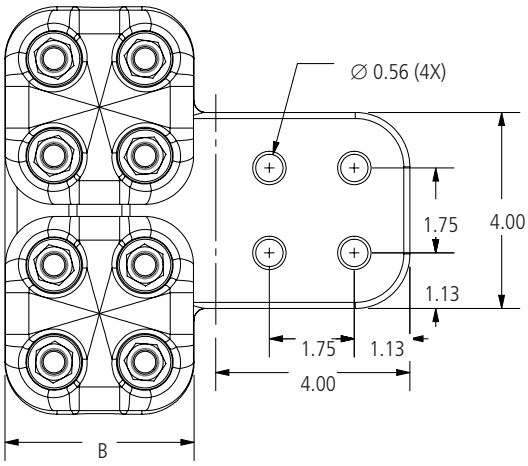

- Suitable for applications up to 250°C
- For Finished Surface on both sides of Pad, add "F" to catalog number. Example: CFTL95-4N4F-V-AA-HT
- For Hardware Shield, add "-CSBV" to catalog number. Example: CFTL95-4N4-V-AA-HT-CSBV

DOSSERT®

TYPE B6998 Series

Bolted Support, Slip or Fixed Fit
Recommended for Voltages Up to 765 kV

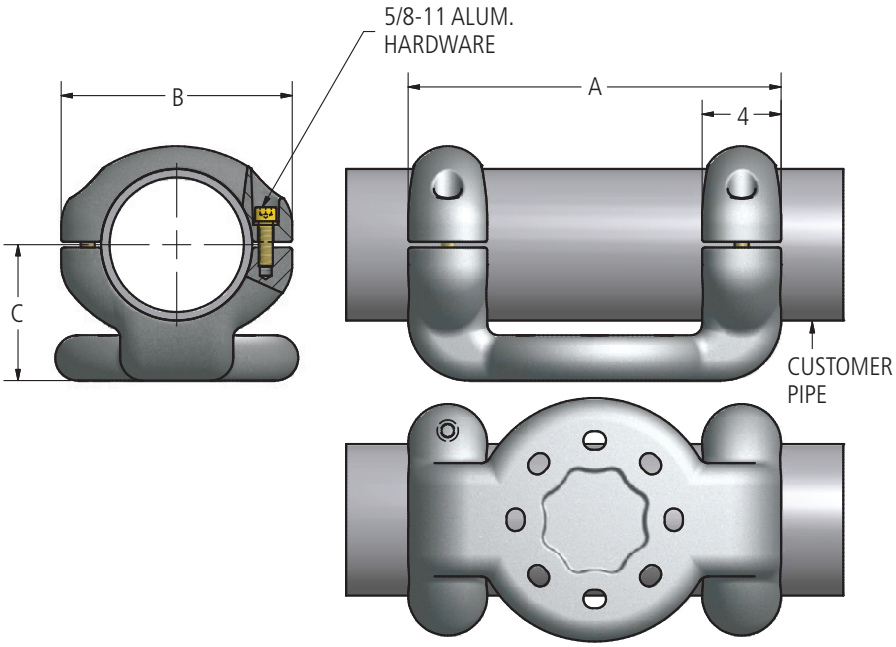

Support is designed to be corona free for 765 kV operation. Support can be supplied for fixed fit or slip fit applications. For slip fit applicaton, stainless steel chatter springs are supplied. Aluminum mounting hardware is supplied as standard; galvanized steel can be furnished on request.

Material

Aluminum Alloy

Hardware

Yellow anodized aluminum bolts, nuts, and lockwashers. Galvanized steel mounting hardware included.

DOSSERT®

TYPE B7107 Series

Welded Support, Expansion Type
Recommended for Voltages Up to 765 kV

Expansion support is designed to be corona free for 765 KV operation. Expansion support is designed for maximum bus run of 150 feet (46 m) operating between a minimun temperature of -20°F (-28.9°C) and a maximum temperature of 200°F (93.3°C). Assembly consists of support, expansion straps, corona rings and hardware. Stainless steel chatter springs are supplied with corona ring and support assembly. Aluminum mounting hardware is supplied as standard, galvanized steel can be furnished on request. Weldment end plugs can be furnished if required.

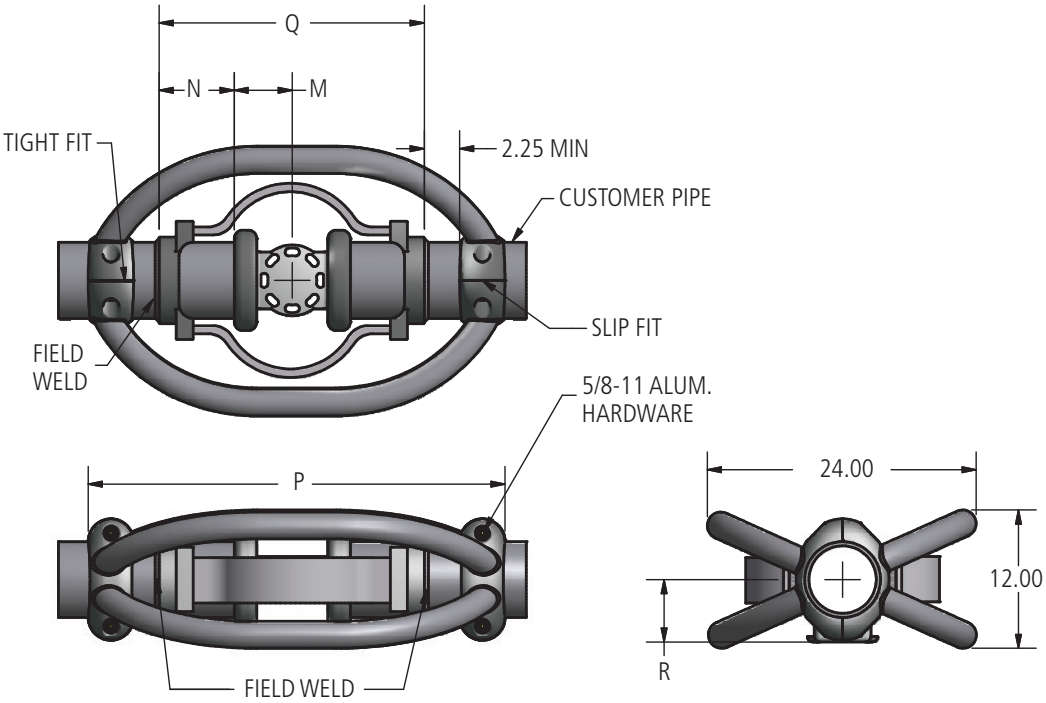

Material

Aluminum Alloy

Hardware

Yellow anodized aluminum bolts, nuts, and lockwashers. Galvanized steel mounting hardware included.

Benefits of Aluminum Bus Conductor

- Only 1/3 the weight of copper
- Highly corrosion resistant
- Dissipates heat rapidly and evenly
- Very strong yet lightweight
- Easy to fabricate
- Conducts equivalent loads of electric power with one-half as much material weight as copper

Today, aluminum is one of the most widely specified conductive materials used in the manufacture and construction of electrical power distribution components and equipment.

Typical applications presently using aluminum conductors include bus duct, bus bar, panel boards, switchgear, isolated phase bus and a host of other similarly purposed products installed virtually everywhere – from electric utility switchyards to substations construction all over the world.

Alloys and Tempers
The most commonly used alloys are 6063, 6061, and 6101. Alloy 6063 has been widely used for outdoor high voltage substation bus because of its excellent mechanical and electrical properties. Where high strength and lower conductivity is called for, alloy 6061 bus is used. Where high conductivity is required, with a minimum sacrifice in mechanical properties, alloy 6101 is used. AFL aluminum bus conductors are manufactured to meet appropriate ASTM specifications. These include B-241-00 - Aluminum Alloy Seamless Pipe and Tube for Alloys 6063 and 6061; and B-317-00 - Aluminum Alloy Extruded Bar, Rod, Pipe and Structural Shapes for Electrical Purposes for Alloy 6101.

The tempering process is an application that hardens or strengthens the metal by applying heat and/or cooling the metal. The basic temper consists of a letter followed by one or more numbers. The most common tempers are T6, T61, and T63. T6 is solution heat treated, and artifically aged to maximum mechanical property levels. T61 is an overaged temper with higher conductivity, but lower mechanical properties than T6. T63 is an "in-between" temper with higher conductivity than T6, but less than T61.

The most common alloy and temper combinations are 6063-T6, 6061-T6, 6101-T6, 6101-T61, and 6101-T63. For other alloys or tempers, please contact your AFL Sales Representative.

Special Finishes and Packaging
AFL aluminum bus conductor is manufactured with an EHV (Extra-High Voltage) finish and EHV packaged. EHV packaging consists of inter-leafed paper and cardboard boxed.

Factors to Consider When Selecting a Bus Conductor
A variety of factors must be considered in bus design. In all applications, considerations include DC or AC current, ampacity required, frequency, operating voltage, allowable voltage drop, maximum possible short circuit currents, available space, and the taps and connections required. If large currents are involved, factors affecting the economic current density must also be tabulated. And for outdoor substations, weather conditions such as possible maximum icing conditions, wind speeds and similar situations are important. Factors that may affect the design of industrial bus include ampacity for allowable temperature rise, voltage drop and power loss economics.

Conductivity
Pure aluminum has an electrical conductivity of 65 percent of the International Annealed Copper Standard. This is decreased a certain amount for any aluminum alloy, depending on the alloy's composition and temper. Internal heating of the conductor causes a loss of physical strength, which limits the conductor's current carrying capacity. Therefore, not only the temperature at which the alloy begins to anneal, but the time it takes to reach that temperature, must be taken into consideration.

Ampacity
For a given value of continuously flowing current, the temperature of a bus rises until the heat coming from the electrical losses in the bus is equal to the heat given off by radiation and convection.

Bus conductor ampacities are usually based on a continuous operating temperature of 30°C above an ambient temperature of 40°C.

Lengths
Bus Conductor is sold in various lengths ranging from 10 feet to 40 feet. Longer lengths are available in various sizes. Contact your AFL Sales Representative for more information.

Frequently Asked Questions

Do I use seamless pipe or structural pipe for substation construction?
For substation construction, seamless pipe should be used. Extruded structural pipe is produced with a bridge-type die. In the bridge die method of extrusion, the solid ingot is broken up and then rejoined in the weld chamber of the die. Thus, the pipe contains two or more "die welds" along its length. This pipe is intended for use in structural applications such as highway and bridge rails, chain link fence posts, sign structures, lighting brackets, etc. Structural pipe is not intended for applications involving fluid pressure or repeated flexure as there is a possibility of splitting along the die welds. Tubular bus in substations is frequently subjected to aeolian vibration which produces repeated flexure. Seamless pipe is extruded from hollow extrusion ingot by the die and mandrel method. The cross section is continuous; there are no die welds to separate under repeated flexure. For more information about structural pipe look at ASTM standard B-249-00 and for seamless pipe look at ASTM standard B-241-00.

What is the difference between bus pipe and bus tube?
Bus Pipe is manufactured to a "nominal" (not actual) diameter. The wall thickness is described by a "schedule." i.e. 4" Sch40. Bus Tube is a round hollow material manufactured to a specific outside diameter (O.D.) and wall thickness. It is produced to meet the end users requirements.

Does alloy and temper matter?
Yes, the alloy and temper specify the conductivity and mechanical properties.

What is the maximum length of bus conductor I can buy?
Most bus conductor is sold in lengths of 10 to 40 feet. Longer lengths are available in various sizes. Contact the AFL Commercial Team for any lengths over 40 feet.

Can I order custom sizes or custom extrusions?
Yes, contact the AFL Commercial Team for custom sizes of bus conductor and custom extrusions.

Seamless Bus Pipe

Seamless bus pipe is an extruded tubular product used to convey electricity. It is manufactured to a "nominal," not actual, inside diameter. The wall thickness is described by a "schedule." The schedules are determined by the American Standards Association.

Seamless bus pipe is generally made of 6063-T6 alloy in ANSI Schedule 40 pipe because of its excellent mechanical and electrical properties. 6061-T6 alloy tubular bus is used where high strength and lower conductivity are required.

Specification: B-241 (Seamless Pipe)

Note: For seamless bus tubing over 6 inches, see page 618.

Notes:

1. Current ratings listed in the Tables are based on 30°C temperature rise over 40°C ambient horizontally mounted conductors, with spacing sufficient to eliminate proximity effects, generally assumed not to be significant if spacing is 18 in. or over. Conduction of heat by supporting structures and taps can appreciably affect the ratings.
2. Conductors with a 2ft/sec crosswind. Nominal oxidized surface (e=0.50)
3. Current Ratings for direct current are close to those of alternating current for all except the larger sizes; and for them, the increase for dc bus is about 1.5 percent.
4. NEMA Standard SG1-3.02 (7/13/60) lists current rating for tubes of 57%-61% IACS conductivity, but without stated emissivity factors. However, even after adjustment for the 53% IACS conductivity of 6063-T6 alloy (and 43% for 6061-T6 alloy), the ratings differ somewhat from those of this table.

Seamless Bus Tube

Seamless bus tube is a round, hollow material manufactured to a specific outside diameter (O.D.) and wall thickness. It is produced to meet specific end user requirements. Tubing is described by the actual outside diameter and wall thickness, i.e. 8" O.D. x 0.500" Wall aluminum tubing.

Outdoor tubular bus is generally made of 6063-T6 alloy because of its excellent mechanical and electrical properties and is readily available. 6061-T6 tubular conductor is used where very high strength and lower conductivity is required.

Note: For seamless bus tube sizes not listed, contact the AFL Commercial Team.

Ordering Instructions

Step 1: Choose Outside Diameter

Outside Diameter	Diameter Code
8	8OD
9	9OD
10	10OD
12	12OD

Step 2: Choose Wall Thickness

Wall Thickness	Thickness Code
1/4"	250W
5/16"	312W
3/8"	375W
1/2"	500W
5/8"	625W

Step 3: Choose Alloy

Alloy Number	Alloy Code
6061	X
6063	Y
6101	Z

Step 4: Choose Temper

Temper	Temper Code
T6	T6
T61	T61
T63	T63

Step 5: Choose Packaging

Package Type	Package Code
Bare - Bat - Bundle (BBB)	B
EHV	E

See pictures on page 651

Step 6: Build Catalog Number

Outside Diameter	+	Wall Thickness	+	Alloy Code	+	Temper	+	Package Code

Example: To order 8 inch OD 1/2" wall 6101-T61 Alloy Bus Pipe with BBB packaging

8OD	+	500W	+	Z	+	T61	+	B

Completed Catalog Number is 8OD500WZT61B.

Rectangular Bar – Sharp Corners (Standard)

Rectangular shapes are the all-purpose rigid conductor for switchgear, control apparatus and busways. The use of multiple bar bus can provide a large surface area for heat dissipation. Joints and taps are easily made by bolting or welding; it is also easy to make off-sets and 90-degree bends.

For direct current, the capacity of a rectangular bar bus conductor can be controlled by varying the size or number of bars in parallel. The same is true of alternating current up to certain limits. Special arrangements of laminations are used for high-amperage alternating current.

Notes:

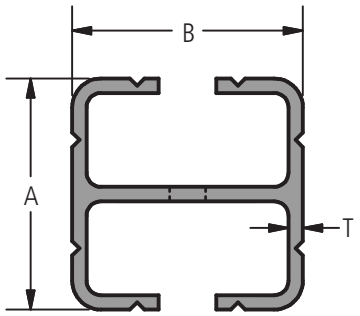

1. Ratings based on 30°C rise over 40°C ambient in still but confined air (e=0.35), corresponding to usual indoor temperature. Vertical bar ampacity based on work by House and Tuttle. Horizontal bar ampacity from industry sources.
2. Space between bars is assumed equal bar thickness.
3. For ac phase spacings less than 18 inches an allowance for proximity effect must be made.
4. Ratings are based on horizontal mounting, in air with no attachments. For dc ratings of other alloys, multiply by: For 6101-T61, 0.982; 6101-T63, 0.992; 6101-T64, 1.02; 6101-T65, 0.996. For 60Hz, the use of these multipliers is conservative.

Integral Web (IWBC)

Bus Conductor

This shape is used for station bus, open or enclosed and for the high-current bus of outdoor substations for distribution voltages, as well as for 600-volt bus for industrial plants. AFL offers the integral web bus conductor in both ventilated and non-ventilated conditions. The use of this shape makes it unnecessary to use the spacer clamps or welded tie-bars normally needed across the channels between insulator supports. Although convection airflow is less than that of a face-to-face channel arrangement, transverse strength is greater. The shallow grooves extruded on the surface facilitate location of the centers of drilled or punched holes for attaching base plates and taps.

Notes:

1. Current ratings are based on 6101-T61 alloy with standard vent-holes in web. For 6101-T6 reduce the rating by 2 percent. Indoor ratings are based on 30°C rise over 40°C ambient in still but unconfined air, normally oxidized surface (e=0.35) and similarly for outdoor ratings, except 2 ft/sec cross wind (e=0.50). Horizontal mounting is assumed with spacing sufficient to eliminate proximity effects, generally assumed to be 18-in. or over. For temperature rise of 50oC above 40oC ambient, the indoor ratings for 30oC may be increased about 30 percent. Indoor ratings (D-C and A-C) calculated by computer and verified by test rounded. Outdoor ratings are calculations only.
2. For vent and notch arrangements, consult your AFL Sales Representative. The interior perimeter varies according to the washer diameters that are to be accommodated, and as to their location per NEMA spacing. The 12 in. x 12 in. size is a opposite of two symmetric extrusions bolted together.

Ordering Instructions

Step 1: Choose Size of IWBC

Size of IWBC	Size Code
4" x 4"	I44
6" x 4"	I64
6" x 5"	I65
6" x 6"	I66
7" x 7"	I77
8" x 5"	I85
8" x 8"	I88
9" x 9"	I99
10" x 10"	I101

Step 2: Choose Wall Thickness

Wall Thickness	Thickness Code
5/32	156W
1/4	250W
5/16	312W
3/8	375W
0.550	550W
1/2	500W

Step 3: Standard Alloy

Alloy Number	Alloy Code
6101	Z

Step 4: Choose Temper

Temper	Temper Code
T6	T6
T61	T61
T63	T63

Step 5: Choose Piece Length

Piece Length is a whole number between 10 feet and 40 feet.

Step 6: Build Catalog Number

Size Code	+	Thickness Code	+	Alloy Code	+	Temper	+	Vented

Example: To order 8" x 8" IWBC with 1/2" wall thickness 6101 T-6 Alloy

I88	+	500W	+	Z	+	T6	+	V

Completed Catalog Number is I88500WZT6V.

Example: To order 4" x 4" IWBC with 1/4" wall thickness 6063 T-6 Alloy Non-vented

I44	+	250W	+	Y	+	T6	+	

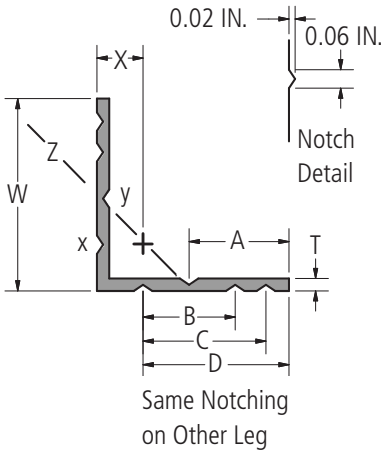

Completed Catalog Number is I44250WYT6

Universal Angle Bus Conductor (UABC)

The universal angle bus conductor is used for moderate-size outdoor substations at distribution voltages. Centerline grooves make it easy to locate bolt holes. The bus can be mounted directly on insulator caps, since both legs are of uniform thickness. In contrast to the large number of fittings sometimes required for bus installation, angle can be easily installed using bolts. Terminal connectors are used to make taps or flexible connections. Angle shapes are usually made of 6101-T6 alloy.

Standard – Non-Vented

Size W	Size T	Notching Dimensions				Area sq. in.	Weight lb/ft
in.	in.	A	B	C	D		lb/ft
3 1/4	1/4	1.500	1.750	---	2.375	1.57	1.83
4	1/4	1.875	1.750	2.00	2.813	1.93	2.27
4	3/8	1.875	1.750	2.00	2.813	2.85	3.36
4 1/2	3/8	2.187	1.750	2.00	3.006	3.23	3.80
5	3/8	2.313	1.750	2.00	3.256	3.60	4.24

Ordering Instructions

Step 1: Choose Size

Size of UABC	Size Code
3 1/4"	A325
4"	A400
4 1/2"	A450
5"	A500

Step 2: Choose Wall Thickness

Wall Thickness	Thickness Code
1/4	250W
3/8	375W

Step 3: Standard Alloy

Alloy Number	Alloy Code
6101	Z

Step 4: Choose Temper

Temper	Temper Code
T6	T6
T61	T61
T63	T63

Step 5: Build Catalog Number

Size Code + Thickness Code + Alloy Code + Temper

Example: To order 5" 3/8" Wall Thickness 6106-T6 Alloy UABC

A500 + 375W + Z + T6

Completed Catalog Number is A500375WZT6.

Notes:

1. Indoor current ratings are based on 30°C rise over 40°C ambient in still but unconfined air, normally oxidized surface (e=0.35). Outdoor ratings are based similarly, but with 2 ft/sec crosswind (e=0.50). Horizontal mounting is assumed with spacing sufficient to eliminate proximity effects, generally assumed to be 18-in. or over. Indoor ratings based on work by House and Tuttle. Outdoor ratings from IEEE paper by Prager, Pemberton, Craig and Bleshman.
2. Back-to-back angles are to be considered as separate members; not as a composite.
3. Alignment grooves are extruded to facilitate centering of holes according to NEMA standard spacings.
4. A modification of this design has a lug at top that does not interfere with bolting, yet it strengthens the shape against tendency to roll-over to the z-z axis in long spans subjected to large lateral short circuit forces. For equal weight of shape, the z-z radius of gyration is increased by 20 percent. The stress that causes roll-over is thereby increased about 40 percent.

Mechanical Properties of Aluminum Bus Conductors

The Table below shows the mechanical properties of the aluminum alloys and tempers generally used for bus conductor. From this information, the best combination of properties can be selected for a particular application. For example, where the cost of power is important, high electrical conductivity is a key factor. In outdoor applications, mechanical properties are a prime consideration. Other factors, such as yield strength and tensile strength may are taken into consideration.

Mechanical Properties of Aluminum Bus Conductor & Related Alloys

Product	Alloy and Temper	Thickness in.	Tensile Strength (ksi) at 20°C (68°F)		Typical Ultimate (b)	Typical Yield (b)	Typical (a) Elongation (Percent - in 2 in. or 4 in. Dia.)
			Minimum Ultimate (b)	Minimum Yield (b)			
Extruded rod, bar tube, pipe	6101-T6	0.125-0.500	29.0	25.0	32.0	28.0	15.0
	6101-T61	0.125-0.749	20.0	15.0			
		0.750-1.499	18.0	11.0			
		1.500-2.000	15.0	8.0			
	6101-T63	0.125-0.500	27.0	22.0			
	6101-T64	0.125-1.000	15.0	8.0			
	6101-T65	0.125-0.749	25.0	20.0			
Extruded Pipe (c)	6061-T6	Pipe size 1.0 and over	38.0	35.0	45.0	40.0	10.0 min
	6063-T6	Pipe size, all	30.0	25.0	35.0	31.0	8.0 min

(a) Elongation values apply to specimens of sizes related to product uses.
(b) Values apply to ANSI net stress area of regular or semi-finished bolts.
(c) Values apply to ASTM B241 seamless pipe.

Bending and Forming Bus Conductor

Aluminum bus conductors can be formed by the same procedures and practices that are used for other metals. The most important factors governing to consider when bending bus conductor are:

1. The ductility of the conductor
2. The size and shape of the conductor
3. The method of bending
4. The bending equipment used

A metal must be ductile enough to allow stretching and compression to take place. Elongation alone is not a complete criterion for ductility. The ration of yield strength to tensile strength must also be taken into account. A combination of a high elongation value and a low ratio of yield strength to tensile strength provides the most satisfactory ductility.

The size and the shape of the bus conductor is another factor that must be taken into consideration. For example, in case of a tube, the sharpness of a bend depends not only on the diameter of the tube, but also on the ratio of wall thickness to the diameter. When making edgewise bends of rectangular bar, tests have shown that the radius (in terms of width of the bar) around which a bar can be bent satisfactorily depends not only on the ductility of the car but also on its ratio of width to thickness.

Extruded, rolled, and sawed-plated bus bars can be bent flatwise at room temperature through an angle of 90 degrees to minimum inside radii.

Tubular conductors made alloys 6063-T6 and 6061-T6 are often bent to form turns and offsets In these cases, specifications should require seamless pipe made by holow ingot process (ASTM B241). Ideally, the ratio of tensile yield to tensile ultimate should not exceed 0.85. It is vital to specify that severe forming will be encountered and optimum heat treatments are required.

For substations, inside radii of five to seven times the nominal pipe size for ASA schedules 40 and 80 pipe of 6063-T6 and 6061-T6 alloys should produce satisfactory results with conventional bending tools.

Flatwise Bends for Rectangular Bus

Type of Bar	Alloy and Temper	Thickness in.	Radius min.[1]
Extruded	6101-T6	0.125-0.375	2 x thickness
Extruded	6101-T6	0.376-0.500	2 1/2 x thickness

Welding Aluminum Bus to Aluminum Connectors

Welding of aluminum in electrical construction offers a superior and economical means of joining conductors. Electric arc welding using an inert gas shield produces mechanically and electrically sound joints requiring no flux or special surface preparation other than the cleaning of the surface to be welded.

A welded connection that is mechanically satisfactory is also electrically satisfactory. With welded connections, there is an essentially homogeneous union that gives a permanent stable connection. It is not necessary to try to produce a connection with the same resistance as bus itself in order to have a stable permanent joint.

There are bus connectors where it is important to insure a resistance ratio of unity with the conductor itself. Small differences in resistance can affect the current distribution in some bus systems. Some bus systems require equalization bars. Welded connections are an ideal solution to both problems. Such connections can be made by following procedures outlined in The American Welding Society Handbook “Welding Aluminum.”

General Welding Specifications for Tubular Aluminum Bus Conductor

The following items cover key points that should be included in specifications for welding aluminum bus conductors. It is recommended that the references be reviewed in the preparation of proprietary welding specifications.

1. The welding process and all welding operators should be qualified in accordance with the Aluminum Association, "Aluminum Construction Manual" Section 7.2.4 "Qualification of Welding Procedure and Welding."
2. All Joints to be welded should be free of moisture and hydrocarbon. Moisture can be removed thermally, but the temperature applied should not exceed 250°F (121°C). Degreasing should be done with a non-toxic solvent so as to leave a minimum of residual on the parts. Sufficient time must be allowed for evaporation of the solvent prior to welding. Wire brushing with a stainless steel wire brush should be employed after solvent cleaning to remove thick heat-treat oxide films, water stains, etc., to permit optimum fusion and soundness of the weld.
3. All welds should be made by the gas metal-arc (MIG) or the gas tungsten-arc (TIG) welding process. Reversed polarity direct current should be used for MIG welding, whereas alternating current should be used for TIG welding. The shielding gas should be welding grade Argon, Helium, or a mixture of the two. Filler alloy 4043 should be used.
4. The working area should be substantially draft free and should be protected from atmospheric contamination.
5. All connections should be checked before, during and after the weld is made. Before the weld is begun, visually inspect the connection to determine proper edge preparation and alignment. During the weld, maintain a smooth and continuous flow of metal into the joint and maintain a constant current setting on the welding station. When several passes are to be made, check the previous pass before laying down the next one to enable detection of poor fusion or cracks. Defective areas should be removed with a dry chisel prior to application of subsequent weld passes. After the weld has been complete, it should be visually inspected again for quality and to insure the weld bead is of the correct size. The cross sectional area of the weld should not be less than that of the smallest member being joined.
6. Members being joined should be tack welded in place to prevent misalignment during the welding process.

Bus Vibration

Bus vibration is caused by a low steady wind blowing across the bus at approximately right angles to the span. Under certain low velocity wind conditions, eddies will break off alternately from the top and bottom surfaces causing the bus to vibrate in a vertical plane. The bus will vibrate at its natural frequency provided that this frequency is within the range that can be excited by the wind. All shapes of bus will vibrate provided the following conditions are present: 1) suitable winds are present, 2) span lengths are long enough to vibrate and 3) support losses are less than input by wind.

Winds causing vibration are low steady winds under 15 mph; winds over 15 mph are generally too gusty to induce vibration. A span that is "sheltered" from the wind not be as prone to vibrate as an exposed span. This shelter can be caused by trees around the station, equipment in the station or by the location of the station such as being in a valley.

Long spans are more prone to vibrate than short spans. In fact, a long span can have one, two or three (in the case of extremely long spans). A loop of vibration is the portion of a vibrating body between two node points. The "node" being the point of a vibrating body that is free of vibration (a support would be a node point). Size of the bus tube increases span length that will be free of vibration, however, whether a bus tube is Schedule 40 or Schedule 80 has relatively little effect with respect to determining if a span will vibrate or not. See tables "Maximum Vibration-Free Span Lengths" for maximum bus length that will require no vibration protection.

The support losses are an indeterminable factor which depends on support type, insulator type, structure flexibility and other related factors. In some substations the losses are high enough to provide adequate damping but in other stations the support losses are less and the bus vibrates.

In general, we can only say that a span greater than some minimum length can vibrate, not that it will vibrate (see table "Maximum Vibration-Free Span Lengths"). There are too many variables involved to definitely state that a given span will vibrate. However, due to the fact of its length it has the potential to vibrate.

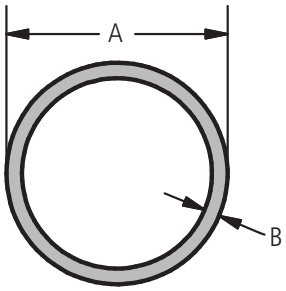

Bus vibration protection in the past has been by the method of inserting "scrap" conductor in the bus but in recent years the use of bus dampers has found increasing use of vibration protection. When the specific size of conductor is not used by a utility and has to be ordered, it is no longer "scrap" and becomes costly, particularly in the short lengths required for damping purposes. When the cost of installation is added to the purchase cost, the total cost of inserted cable becomes expensive. For this reason, the use of dampers is increasing. Dampers also have the advantage of being able to be installed in an existing station where vibration problems have occurred.

The following tables are supplied for bus vibration references:

1. Maximum vibration - free span length – Tubular Bus
2. Maximum vibration - free span length – UABC
3. Maximum vibration – free span length – IWCB
4. Damper spacing – Rigid Bus
5. Recommended sizes of ACSR to be inserted in Tubular Bus to prevent vibration

Specifications are subject to change without notice.

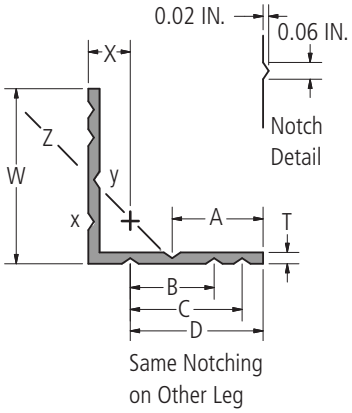

Nominal Pipe Size	Maximum Safe Span Length
1	5′ - 0″
1-1/4	6′ - 3″
1-1/2	7′ - 0″
2	9′- 0″
2-1/2	10′- 9″
3	13′ -3″
3-1/2	15′- 3″
4	17′-0″
4-1/2	19′-0″
5	21′-3″
6	25′-3″

Notes:
1. Lengths based on loop of vibration
2. Lengths apply to both Schedule 40 and Schedule 80 tubular bus.
3. Lengths can be increased approximately 20% with reasonable certainty that there will be no vibration.

Universal Angle Bus Conductor (UABC)

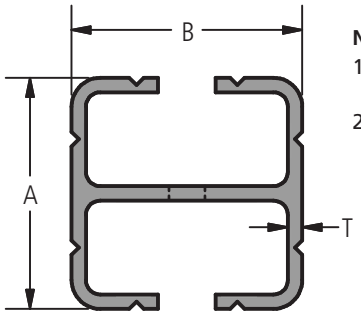

UABC Size	Maximum Safe Span Length
3 -14 x 3 -1/4 x 1/4	12′- 0″
4 x 4 x 1/4	15′- 0″
4 x 4 x 3/8	14′- 9″
4 - ½ x 4 - 1/2 x 3/8	16′ - 9″
5 x 5 x 3/8	18′ - 6″

Notes:
1. Lengths based on one loop of vibration
2. Lengths can be increased approximately 20% with reasonable certainty that will be no vibration.
3. Does not apply for double angles in back-to-back configurations

Integral Web Bus Conductor (IWBC)

UABC Size	Maximum Safe Span Length
3 -14 x 3 -1/4 x 1/4	12′- 0″
4 x 4 x 1/4	15′- 0″
4 x 4 x 3/8	14′- 9″
4 - ½ x 4 - 1/2 x 3/8	16′ - 9″
5 x 5 x 3/8	18′ - 6″

Notes:
1. Lengths based on one loop of vibration
2. Lengths can be increased approximately 20% with reasonable certainty that will be no vibration.

TYPE 1706 SERIES Bus Vibration Dampers

Tubular bus dampers are designed to control Aeolian or wind-induced vibration in long bus spans; the dampers have been proven both in the laboratory and in field service to be the most effective method of controlling tubular bus vibration. The dampers are faster and easier to install than the old method of inserting "scrap" cable into the tubular bus runs. Also, the dampers find applications for correcting a vibration problems in existing substations.

Determine catalog number based on the bus conductor size being used. To order a bus vibration damper for 2 1/2" bus conductor, the complete catalog number is 1706-288.

Specifications are subject to change without notice.

TYPE 1706 Bus Vibration Dampers

Vibration dampers for universal angle bus conductor (UABC) and integral web channel bus conductor (IWCB) are specifically designed to control Aeolian or wind-induced vibration in long bus spans. The dampers provide a fast, economical method of damping vibration. Installation is easy; the IWCB damper clamps to the bus by means of a bolt and clamp nut while the UABC damper bolts directly to the bus.

Determine catalog number based on the bus conductor size being used. Ex: A bus vibration damper for 4"x4" IWCB, the complete catalog number is: 1706-129.

Bus Vibration Dampers—Tube

Internal, Welded 345 kV, 500 kV and 765 kV

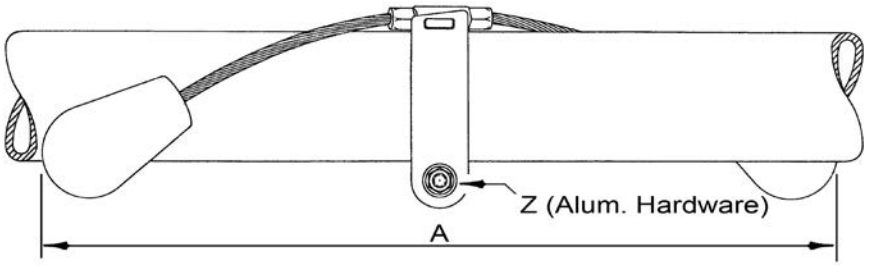

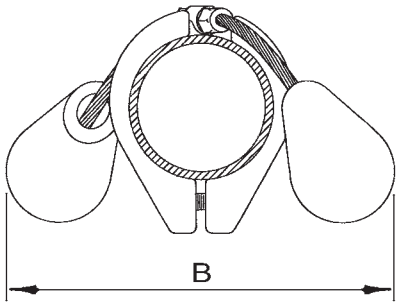

Internal damper is designed to be corona-free up to 765 kV service. Damper is designed to be welded inside bus, to be corona-free, and to present a "clean" appearance to the substation.

Conductor Size	Catalog Number	Dimensions A		Nominal Weight Aluminum		Nominal Weight Total	
		in.	mm	lb	kg	lb	kg

External, Bolted 345 kV or 500 kV

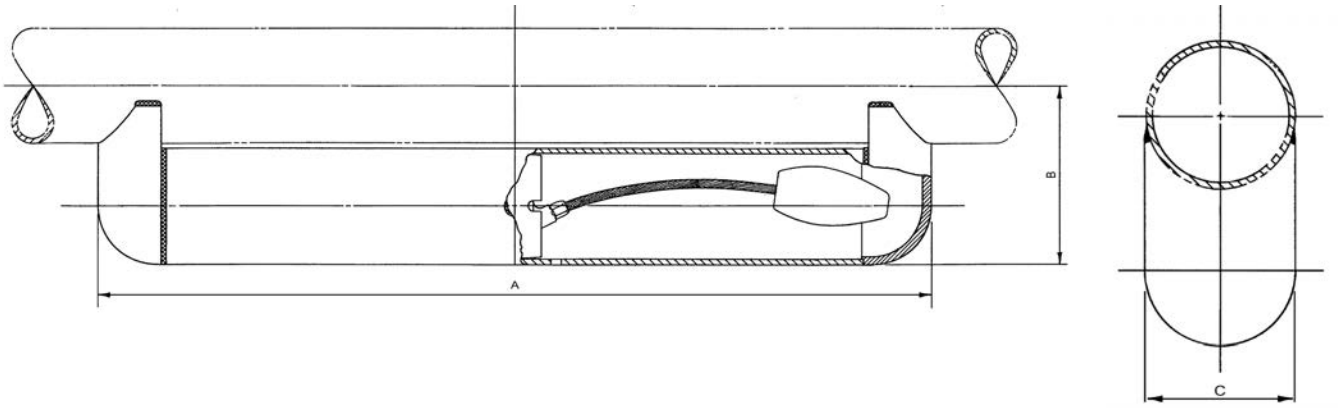

External damper is designed to be corona-free for 345 kV or 500 kV service as noted in table. Damper is designed to be bolted to outside of tube. Damper can be installed during construction or at a later time to correct vibration problems not originally anticipated.

Conductor Size SPS & EHPS	Catalog Number	Dimensions A		Dimensions B		Dimensions Z	Voltage Rating	Nominal Weight Aluminum		Nominal Weight Total

External Bus Vibration Damper for Tubular Bus

Recommended for Voltages up to 756 kV

External damper is designed to be corona-free for 765 kV operation. Damper is designed to be welded to outside of bus in order to correct vibration problems not originally anticipated.

Ordering Information: Contact AFL Technical Support for appropriate part number for this application.

Bus Vibration Test Data

Table 1 and Figures 1 thru 3 provide information on test conducted on an outdoor test span on 4,5 and 6 inch NPS.

Figure 1 illustrates the effect of conventional support vs. wire supports on the vibration amplitude of 4 inch tubular bus in a 50 foot span. The supporting arrangement does have some effect on the vibration amplitudes.

The test conducted on the 4 and 5 inch schedule 40 aluminum bus (ref. figures 2 and 3) were conducted on the spans supported by steel wires to eliminate the support "variable" and to provide the severest condition for the bus damper tests. These tests indicate that one Cat. 1706 external bus dampers reduced the vibration amplitude to a level considered safe for the bus.

Tests were conducted at the outdoor vibration lab at Massena and represent values which eliminate such variations such as bus support type, insulator type and structure type. The spans are supported by wire loops at each end and therefore the test conducted on the dampers are extremely severe in relationship to that which would actually be encountered by any substation where there would be structural damping through the insulator supports, etc.

Table 1

NPS Size	Span Length (feet)	Frequency in Cycles Per Second	Amplitude (inches)	
			Undamped	Damped
One Loop				
4" Sched 80	46	1.5	4.1	0.660
6" Sched 40	68	1.1	6.5	2.100
Two Loop				
4" Sched 80	46	6.1	2.0	0.045
6" Sched 40	68	4.0	2.2	0.050
Three Loop				
4" Sched 80	46	—	—	—
6" Sched 40	68	10.0	0.25	0.020

AFL No. 2 Electrical Joint Compound (No. 2 EJC)

AFL No. 2 Electrical Joint Compound (EJC) is the recommended compound providing efficient and trouble free service on aluminum to aluminum and aluminum to copper connections. If No. 2 EJC is kept in a dry place, it has an infinite shelf life.

Application

Terminal to dead end connections for applications under 93° C (200° F). Flat to flat surfaces such as bus to bus, aluminum to aluminum and aluminum to copper.

Features

Lowest Electrical Resistance on Flat Surfaces
No. 2 EJC has the lowest electrical reistance on flat surfaces because it is a grease type medium that dissolves the oxide on connectors. The nature of the oxide removal is not harmful. Unlike other compounds of its kind, No. 2 EJC creates a light surface etch with no deep, localized attack. It only attacks the oxide.

Weather Resistant
No. 2 EJC adheres to pad surfaces, protecting the connection against the harmful effects of the environment.

Proven Performance
Years of service and laboratory testing have proven that AFL No. 2 EJC provides efficient and trouble free service.

Ordering Information

Catalog Number	Packaging
EJC10T	Carton of 10 – 7.94 oz (225 g) tubes
EJC12CAN	Carton of 12 – 1 lb. (0.45 kg) cans
EJC1GAL	1 Gallon Pail, 10 lbs. (4.5 kg)
EJC5GAL	5 Gallon Pail, 50 lbs. (22.7 kg)

Alnox® Electrical Joint Compound

Applications

Pad to pad connections where the operating temperatures are at or below 250 °C (482 °F). Used for aluminum on aluminum, copper on aluminum, and copper on copper. Ex: Dead ends to terminals, terminals to tee taps

Features

Lowest Electrical Resistance
Alnox® contains extremely hard metalic particles with sharp and irregular shapes of carefully controlled grain size. This forms many metal to metal contact points for low resistance connections. If Alnox is kept in a dry place, it has an infinite shelf life.

Weather Resistant
Alnox® adheres to pad surfaces, protecting the connection against the harmful effects of the environment.

Wide Temperature Tolerance
Alnox® has a wide temperature tolerance. It is workable at low temperatures, -18 °C (0 °F), and does not drip at high temperatures. It has a melting point above 288 °C (550 °F).

Ordering Information

Catalog Number	Packaging
ALNOX10T	Carton of 10 - 8.82 oz (250 g) tubes

AFL Filler Compound

AFL Filler Compound (AFC) improves the mechanical holding strength and conductivity of compression fittings. Stored in a dry environment, AFC has an infinite shelf life.

Applications

Filler compound for compression accessories operating at temperatures up to 180°C (355°F). Example: dead ends, compression joints, terminals and jumper connectors.

Features

Wide Temperature Tolerance
AFC is stiff but workable at low temperatures. To improve the workability, AFC can be diluted with 5% kerosene (by weight).

Improves Holding Strength and Conductivity
AFC contains hard, metallic particles (grit). During compression, the grit is embedded between the conductor and the accessory, creating an irregular surface which provides two benefits: (1) increases the holding strength when tension is applied and (2) improves conductivity by breaking the oxide layer on bare metal to metal connections.

Weather Resistant
AFC is forced between the conductor strands during compression, filling voids and sealing out the harmful effects of air and moisture.

Fits Standard Caulking Gun
For easy filling of compression accessories, AFC is available in a tube that fits a standard caulking gun.

Visible Fill Line
AFL is the only supplier that features a visible fill line along the length of the cartridge which allows the user to visually check the fullness of the tube.

Ordering Information

AFL No.	Packaging
AFC10T	Carton of 10, 1 lb. (451 g) Tubes – Fits Standard Caulking Gun
AFC1GAL	1 Gallon Pail, 11 lbs. (5 kg)
AFC5GAL	5 Gallon Pail, 55 lbs. (25 kg)

For more information, contact the AFL Technical Support Team at 1.800.890.8878.

Specifications are subject to change without notice.

HiTemp® Universal Compound (HiTUC) for Filler and Pad-to-Pad Connections

AFL's HiTemp Universal Compound (HiTUC) is the recommended inhibitor as a filler for compression fittings, as well as a joint compound for pad-to-pad connections for the increased temperature requirements in today's Utility market.

It has been designed to withstand the increased operating temperatures of high temperature/low sag conductors (ACSS, ACCR, etc.). If kept in a dry place, HiTUC has a three-year shelf life.

Features

Low Electrical Resistance
HiTUC contains extremely hard metallic particles with sharp and irregular shapes of carefully controlled grain size. This forms many metal to metal contact points for low contact resistance.

Wide Temperature Tolerance
HiTUC has a wide temperature range. It is workable at low temperatures -40°C (-40°F) and does not drip at high temperatures. It has a melting point above 250°C (482°F).

Improves Current Flow
During compression, the metallic particles (grit) contained in HiTUC are embedded between the conductor and the inside wall of the accessory, creating an irregular surface. This irregular surface improves conductivity by forming more metal to metal connections. The grit also acts as a wire brush on the aluminum oxide that has formed on the inside of the tubular accessory. This same grit creates a low resistance connection in bolted pads of dead ends, terminals and tee taps.

Moisture Resistant
As the accessory is compressed, HiTUC is forced between the conductor strands, sealing out the harmful effects of harmful contaminates, water and salt.

Fits Standard Caulking Gun
AFL is the only supplier that features a sight gauge along the length of the tube that allows the user to check the remaining amount. For easy filling of compression accessories, HiTUC fits a standard caulking gun.

Applications

- Filler compound and pad-to-pad connections for compression accessories installed on conductors operating at temperatures up to 250°C (482°F)
- Dead ends, joints, terminals, tee taps and jumper connectors
