To Our Valued Customers and Partners,

In support of domestic preference goals for federally funded projects, AFL proudly offers, and continues to offer, fiber optic cable and components that meet Build America, Buy America Act (BABA) requirements. We deliver a wide range of compliant products and we're ready to help you choose products that will meet your project compliance requirements.

In addition to our U.S. cable manufacturing facilities, AFL has production capabilities around the world and a robust, global network of qualified sources of supply from eligible countries. For the products that are currently not fully compliant with domestic preference regulations, AFL is taking proactive steps to obtain domestic sources and manufacture its products in the United States.

To ensure BABA requirements are appropriately captured and maintained throughout the manufacturing process, BABA (along with any other regulatory requirements) must be specified at the time of quotation and order to AFL.

Should you have any questions, please contact us at ConnectingAmerica@AFLglobal.com.

Sincerely,

A handwritten signature in black ink, appearing to read 'J. Lang'.
