Product Approval for AFL for ACCC® High Temperature Conductor

CTC Global is pleased to approve the use of AFL products on ACCC® High Temperature Conductor. AFL is a provider of industry-leading products and solutions and their connectors and accessories have been widely used across the world and their products are the first choice for many high-profile utilities. Their compression tension fittings utilize a unique patented technology designed to hold at least 95% of the conductor rated breaking strength without compromising the integrity of the ACCC® composite core. AFL has also recently expanded their offerings for the ACCC® conductor to include ancillary hardware such as their line of HIBUS suspension clamps and Stockbridge type dampers.

Products Qualified for use on ACCC® Conductor

- Compression Dead Ends
- Compression Joints
- Compression Terminals
- Compression Tee Taps
- Compression Jumpers

Products Approved for use on ACCC® Conductor

- HIBUS Suspensions and Trunnion Units
- Stockbridge Dampers with Protective Rods
- Speed Grip Spacers
- Spacer Dampers
- Armor Rods
