Field-replaceable OTDR/OLS Port Saver Connectors

AFL's new Port Saver is a Field-replaceable Connector that protects FlexScan-series OTDR's ferrule from damage due to repeated mating.

Equip your FlexScan FS200 or FS300 OTDR or TS100 Troubleshooter with a field-replaceable single-mode connector, which installs in seconds and accepts AFL's tool-free interchangeable SC, LC, FC and ST connector adapters.

Replace damaged connectors in the field: When normal wear-and-tear or poor cleaning practices damage the port saver's end-face, replace it in seconds without having to return the OTDR to a service center for an expensive and time-consuming repair.

IMAGE	TYPE	PORT	AFL NO.
	FlexScan-facing APC female to APC male field-replaceable Port Saver SMF	OTDR/OLS	2900-58-0001MR
