

RT-02

RT-02 with FH-70-12PC

RT-02 Ribbonising Tool

The RT-02 is the latest ribbonising tool from Fujikura, and the first universal ribbonising tool on the market suitable for forming a temporary ribbon from loose 200 μm or 250 μm fibres. This is also the first tool that features a glue-less process for ribbonising and splicing 12 fibre ribbons. This saves time and money by eliminating operating inefficiencies such as cure time and contamination of splicing equipment. Simply choose the applicable fibre holder in conjunction with the RT-02 to ribbonise 200 μm or 250 μm fibres. With this tool, you can now realise the benefits of mass fusion splicing when installing the latest generation of loose fibre micro cables.

Features

- No glue required
- 200 μm & 250 μm compatible
- Loading with colour code sequence not required
- Fibres load directly into fibre holder
- Left & Right fibre holder colour codes printed on tool

Applications

- Ribbonising 200 μm & 250 μm loose fibres
- 200 μm and 250 μm MPO Termination
- Mass fusion splicing loose fibre cables

Ordering Information

DESCRIPTION	PART NUMBER
200 μm Ribbonising Kit	
RT-02 and a pair of FH-70-12PC fibre holders	S017532
RT-02 (tool only)	S017465
FH-70-12PC (pair of pitch conversion holders for 200 μm loose fibres)	S017464
FH-70-12 (pair - standard 12F ribbon holders)	S017119
