

## Fibre Arrangement Tool

FAT-04

The FAT-04 features an easy-to-use fibre arrangement method utilising linear travel. The FAT-04 includes a spare paste applicator to allow ribbon making to continue even if one of the paste applicators needs cleaning.

### Ordering Information

DESCRIPTION	PART NUMBER
FAT-04 Fibre Arrangement Tool*	S010212
SP-1 Foam Pads for FAT-04 (One set = 5 sheets of 25 pads each)	S009016
Paste Applicator Blocks for FAT-04 (2 pieces)	S010952

\* FAT-04 includes 4 oz. FAA-03A ribbon forming adhesive, paste applicator blocks, cleaning swabs, CL-02 clips and SP-1 foam pads.

## Ribbon Forming Adhesive

FAA-03A

A key advantage of our fibre arrangement tool is the use of the ribbon forming adhesive. Ribbons formed with this adhesive have excellent stripability, especially compared to ribbonising methods using tape. Unlike tape methods, the paste does not "gum-up" the stripping tool and cause broken fibres. The paste holds the stripped coating residue into a single piece of debris that is easily cleaned from the stripper. If needed, the ribbon can be easily separated into individual fibres using alcohol.
